DUAL POSITIVE AND NEGATIVE FIXED VOLTAGE REGULATORS APPROVED TO DESC DRAWING

Dual 5V, 12V and 15V, 1.5 Amp Fixed Voltage Regulators In Single Hermetic MO-078AA Package

FEATURES

- Positive And Negative Regulators In One Package
- Isolated Hermetic Package, JEDEC MO-078AA
- Output Voltages 5V, 12V and 15V
- Output Voltages Set Internally To $\pm 1.0\%$
- Built-In Thermal Overload Protection
- Short Circuit Current Limiting
- Similar to Industry Standards 7800 & 7900 Series

DESCRIPTION

This series of products offers a positive and a negative fixed voltage regulator in one hermetically sealed, 5 pin package whose outline is similar to the industry standard TO-247 package. With heat sinking, they can regulate over 1.5 Amp of output current per device. Standard voltages are + or - 5V, 12V and 15V. Output voltages are internally trimmed to $\pm 1.0\%$ of nominal voltage. These devices are ideally suited for Military applications where small size and high reliability are required.

To order, use the following Omnirel part numbers to determine the required output voltage of each regulator within one package.

Notes:

- Load and Line Regulation are specified at a constant junction temperature. Pulse testing with low duty cycle is used. Changes in output voltage due to heating effects must be taken into account separately.
 - Short Circuit protection is only assured up to $V_{IN} = 35V$.
 - If not tested, shall be guaranteed to the specified limits.
- The • denotes the specifications which apply over the full operating temperature range.
