DESCRIPTION

DRF4431F27/DRF4432F27 is a type of low cost RF front-end transceiver module based on SI4431/SI4432 from Silicon labs. It keeps all the advantages of RFIC SI4431/SI4432 but simplifies the circuit design. The high sensitivity (-122dBm) and 27dBm output power make the module suitable for long range applications. DRF4431F27/DRF4432F27 module consists of RFIC Si4431/SI4431, thin SMD crystal, LDO and PA circuit. The antenna port is well matched to standard 50 Ohm impedance. Users don't need to spend time in RF circuit design. It is fully compatible with DRF4431F13 and DRF4432F20 modules.
