ZL CONNECTOR

Disconnectable Crimp style Wire-to-wire connectors

ZL connectors are reliable, smoothly mating wire-to-wire connectors.

Features

• **Housing lances**

The lances on the resilient housing are not affected by external force. They allow the contact to be easily inserted and securely locked into the housing, and require only a light insertion force.

• **Retainer**

The retainer ensures high reliability by preventing non-insertion or accidental release of the contact. Installed after the contacts are inserted, it locks and secures the contacts at the lance sections.

• **Box-shaped contacts**

Our box-shaped contacts serve as socket contacts in a wide variety of applications from low-voltage, low-current signal circuits to power supply circuits.

• **Mountable on a variety of panels**

Due to our unique panel installation locking mechanisms, the housing can be easily installed on panels of various thicknesses without using tools.

Specifications

- Current rating: 10A AC, DC max.
 - Voltage rating: 300V AC, DC max.
 - Temperature range: -25°C to +90°C
(including temperature rise in applying electrical current)
 - Contact resistance: Initial value/7m Ω max.
After environmental testing/10m Ω max.
 - Insulation resistance: 1,000M Ω min.
 - Withstanding voltage: 1,500V AC/minute
 - Applicable wire: AWG #26 to #16
0.13 to 1.25mm²
 - Applicable panel thickness: 0.7 to 2.4mm(.028" to .094")
- * Contact JST for details.

Note: The current rating varies depending on the number of circuits and the wire size used in each connector.

The table below lists the current rating as a function of the number of circuits and wire size.

Current unit: A

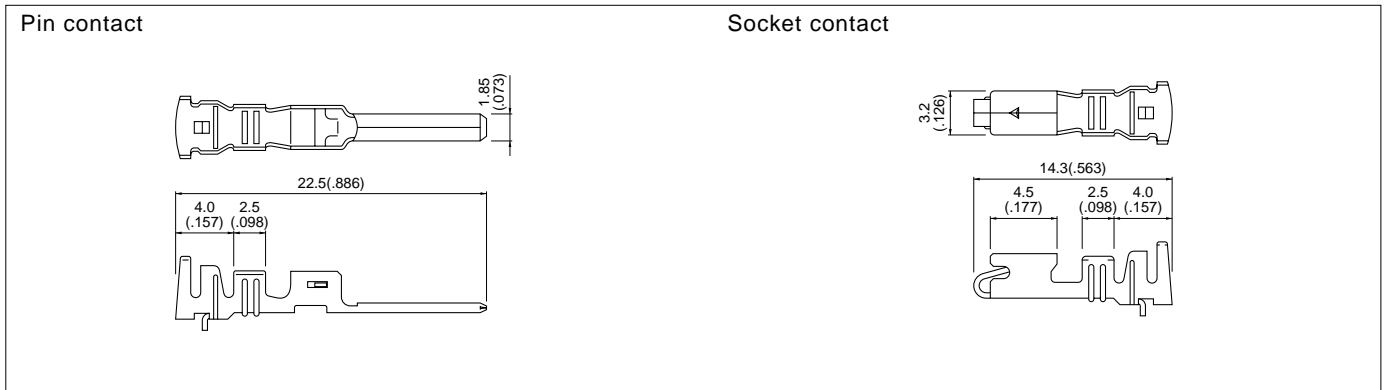

Circuits	Wire size (AWG)					
	#16	#18	#20	#22	#24	#26
2	10	6	5	4	3	2
4	9	5	4	3	3	2
6	8	4	3	3	2	2
8	6	4	3	3	2	2
12	6	4	3	3	2	2
16	5	3	2	2	1	1

Note:

1. Punch holes in the panel according to the sketch and table shown above. Burrs must be removed.
2. The strength of the panel must be considered when punching two or more holes.
3. The connector must be inserted from the same side as the hole is punched.
