

UNIVERGE® SV8500 Communications Server

The Next Generation Server for Pure IP

At a Glance

- Offers secure end-to-end communication
- Uses open standards to provide an advanced communication platform
- Integrates with current IT infrastructure
- Complies with green initiatives

With the UNIVERGE SV8500 Communications Server, NEC has realized the promised potential of IP telephony through a forward-looking, highly efficient system that provides the investment protection required by today's enterprise. It embodies NEC's UNIVERGE®360 commitment to unifying communications by providing a flexible, scalable solution that uses open standards, a large pool of compatible applications, and mobility options to meet each user's needs.

The SV8500 is also the premier IP communications server for regional and global expansion, worker mobility and environmental responsibility. It offers an extensive IP feature set in a flexible, scalable, secure package that ensures business continuity and provides the means to simplify business processes.

In server gateway architecture NEC SV8500 acts as a main server and NEC SV8300 & SV8100 acts as remote gateways.
