1.0 Description

The P1RX6-SX51-01M (RX-SX51) is an optical module that receives and converts an optical HDMI™ signal. The RX-SX51 incorporates a bi-directional optical subassembly (OSA) to receive an optical HDMI™ video signal, along with the HDCP/EDID/CEC functionality, from one strand of multimode fiber and restore it to its original electrical HDMI™ signal. The HDCP encoding remains intact and unmodified throughout the entire process.

2.0 Features

- 5 receive lanes and 1 transmit lane over 1 multimode fiber
- Compatible with HDMI™ compliant sources and sinks
- Scalable to HDMI™ 1.3a 16-bit color
- On-board hardware and firmware for HDCP/EDID/CEC functionality
- Outputs TMDS signals through its 40 pin plug-down connector
- Automatic laser disable upon fiber disconnect

This device is **EXTREMELY SENSITIVE** to Electrostatic Discharge (ESD). At a minimum, all handling must be performed in accordance with an ANSI-compliant ESD Control Program (ANSI/ESD S20.20-2007) to mitigate possible ESD-induced damage. Reliability and life of the device will be adversely affected if these precautions are not met.

This device is a Class 3R Laser device (per IEC 60825-1:2007) and can cause damage to eye sight if used improperly. Refer to ANSI Z136 for proper handling and usage of Class 3R devices.
