What's New for 2011

- 1 3M™ AZ Belt 577F** Because new 3M™ AZ Belts 577F last up to 20% longer than competitive belts, you can grind more parts for about the same price you're now paying for abrasives. Its new and improved premium mineral resin system, tough durable backing, and waterproof grinding aid offers a big bang for your buck. An outstanding balance of high performance and affordability make 3M AZ Belts 577F an ideal alternative for many day-to-day grinding operations.
- 2 3M™ Flap Disc 577F** is a versatile product that delivers a fast cut, long life, and a smooth finish. Performance and price make these discs a great value and the flap design allows one disc to perform both the grinding and blending steps. Plus, the economic alumina zirconia mineral is ideal for lowering abrasive costs on both mild and stainless steel applications. For those really big jobs, try the 3M™ Giant Flap Disc 577F with 25% more thickness for aggressive cut and durability.
- 3 3M™ Speedglas™ 100 Series Welding Helmets for Women** Inspired by women welders and designed for women welders, these helmets feature uniquely feminine graphics while offering the protection and quality you expect from Speedglas 100 Series helmets.
- 4 3M™ Cubitron™ II Metalworking Belts 984F** are made with revolutionary 3M precision-shaped ceramic grain technology, engineered with ultra-sharp, fast cutting points that wear evenly, run cool, and optimize mineral breakdown to maximize belt life. Whether you are looking for faster productivity, longer life, or reduced heat on parts, Cubitron™ II metalworking belt sets the standard performance for abrasive belts.
- 5 3M™ Flexible A0 Belts 302D and 332D** are new low cost, flexible aluminum oxide belts. 302D has a flexible J weight backing for finishing highly contoured parts and 332D has a flexible X weight backing for added durability for finishing semi-contoured parts. Now, along with 341D, 3M offers a full range of backing flexibilities at an unexpected price from the brand that stands for quality.
- 6 3M™ Fall Protection Products** Count on 3M to help workers at height to get the job done safely. Reliable fall arrest equipment — harnesses, lanyards and anchoring devices — provide safety and comfort.
- 7 3M™ Cubitron™ II Fibre Discs 982C** are made with revolutionary 3M precision-shaped ceramic grain technology, engineered with ultra-sharp, fast-cutting points that wear evenly, run cool and optimize mineral breakdown to maximize disc life. 982C out performs comparable fibre discs on life, cut and cost per grind, guaranteed. Finish more parts with fewer discs regardless of grinding pressure.
- 8 3M™ Superabrasive Wheels** Do you sharpen or manufacture carbide drills, endmills, taps, reamers or other round cutting tools? Check out our selection of superabrasive wheels that are in-stock and ready to ship in 2 days!

Complete solutions. Commitment to Innovation and Quality.

Complete solutions. It's what you've come to expect from 3M, the leading supplier for metalworking industries. For over 100 years, 3M has been a proven leader, providing advanced technology and innovative solutions for increased productivity, enhanced efficiency and improved manufacturing processes.

This commitment to innovation continues with ongoing new product introductions focused on the complete metalworking experience. Today, 3M Metalworking Products encompass a broad spectrum of solution-specific products from personal safety to abrasives and high-strength adhesives. 3M presents a growing portfolio with each addition to this line of advanced solutions designed for all metalworking processes from start to finish.

3M™ Fibre Discs

Choose the performance level that fits your needs with a complete offering of 3M™ Fibre Discs. Get great performance at a great price with 3M's general purpose metalworking disc 381C. Or, set a new standard for productivity with 3M™ Cubitron™ II 982C Discs. All of 3M's fibre discs are available in a variety of sizes.

3M™ Fibre Disc Selection Guide

Select Fibre Discs for fast cutting when grinding and blending.

	Product ID	Mineral	Metal Type
Good	381C	Aluminum Oxide	Carbon Steel
	501C	Alumina Zirconia	Stainless/Aluminum
Better	501C	Alumina Zirconia	Carbon Steel
	785C	Ceramic Aluminum Oxide Blend	Stainless/Aluminum
Best	988C	Ceramic Abrasive Grain	Carbon Steel
	985C	Ceramic Abrasive Grain	Stainless/Aluminum
Premium	982C	Precision Shaped Ceramic	Carbon Steel
	987C	Precision Shaped Ceramic	Stainless/Aluminum

3M™ Flap Discs

3M™ Flap Discs offer an unbeatable system for grinding and blending in one easy step. The construction wears away, exposing fresh mineral to extend disc life and provide consistent cut rates. Great for weld grinding, blending, deburring, rust removal, surface prep and edge grinding on all types of metals. Available in both T29 or T27 constructions with or without the 5/8–11 hub.

3M™ Roloc™ Discs

3M™ Roloc™ Discs provide a fast, efficient method for grinding, blending, leveling and finishing on all types of metal. They lock securely in place with just a half twist...another half twist and they're off. Each disc is color coded by grade. (This does not include 3M Roloc TSM products.)

3M™ Belts

3M is the one-stop shop for all of your coated abrasive metalworking belt needs! We offer a product tailored to nearly every application and performance level. To select the best product for your application, check out our easy-to-use Belt Selection Guide. Each tier of product offers best-in-class performance at various price points. Once you have selected the product, use the Availability Guide to select your grade. The following section includes our most popular belt items, but remember, we can provide any size belt that you might need!

Abrasive Speed Recommendations for Off-Hand Applications

Alloy	Belt Speed (surface feet per minute)	Applicable Belt Grades
Cast Iron	7,000	24–120
Carbon Steel	6,500	24–120
Stainless Steel	6,500–7,000	36–120
Nickel Alloys	6,000	36–120
Titanium	2,500–3,000	36–180
Aluminum	7,500–8,500	24–120
	6,500–7,000	Fine Grades
Brass	7,000–8,000	36–180
Rubber	4,500	36–180
Glass	2,500–5,000	80–400
	6,000–8,000	
Stone	7,000	36–180

Tech Tip

Keep Things Cool — When working on heat sensitive alloys like stainless steel, nickel alloys and cobalt alloys, choose a product with a grinding aid.

See pages 72–77 for available accessories.

ATTENTION: Belts are available in other grades and sizes. If you need a specific belt not listed, contact your 3M Sales Specialist or 3M Authorized Distributor.

How to Use the Coated Abrasive Belt Selection Guide

1. Find the machine type that you will run this belt on.
2. Move down to the metal type that is being worked on.
3. Select the product from the list of **Good** – **Better** – **Best** finishing belts.
4. Check the Availability Guide for the grade.
5. Find the product on the following pages for available sizes.
6. If your size is not listed, contact your 3M distributor or 3M representative for ordering instructions.

Note

For the ultimate in performance for coarse grade grinding in any application, be sure to try the latest innovation: 3M™ Cubitron™ II Metalworking Belts 984F.

3M™ Belts (cont.)

3M™ Cubitron™ II Metalworking Belt 984F

- 3M precision-shaped grain
- Average up to 30% faster cutting on hard-to-grind metals than the next-best competitive belt
- Lasts up to 4 times as long as conventional ceramic aluminum oxide belts
- Cuts cooler — diverts heat from the work piece and belt to the swarf
- Helps eliminate burnishing and heat stress

See pages 72–77 for available accessories.

3M Precision Shaped Grain

Conventional Grain

Precision-Shaped Grain

Triangular-shaped grain (right) is electrostatically oriented to form sharp peaks, each acting like individual cutting tools that wear evenly for super long life and consistency.

Conventional Ceramic

3M™ Cubitron™ II

3M precision shaped grain sharpens as it wears compared to conventional ceramic abrasive grain so 3M™ Cubitron™ II abrasive belts last longer!

3M™ Trizact™ Abrasive Belts

The unique microreplicated construction used in 3M™ Trizact™ Abrasives can deliver consistent, predictable finishes, higher, more even rates of cut, cooler grinding and finishing temperatures, and reduced processing steps. 3M invented microreplication technology, which is the science of creating small, precisely shaped three-dimensional structures and then reproducing them on a variety of surfaces.

Trizact Abrasive Grading System

The unique construction of Trizact abrasives requires a different grading system. Grade is defined by the average particle size in microns and begins with an “A”.

Trizact Abrasive Grade	FEPA (P-Grade)
A5	P3000
A6	—
A10	P1500
A16	P1200
A20	P1000
A30	P600
A35	—
A45	P400
—	P320
A60	—
A65	—
A75	P240
A80	—
A90	P220
A100	P180
A110	P180
A130	P150
A160	P120

The Difference is in the Construction

Trizact abrasives allow you to say “goodbye” to erratic, inconsistent finishes generated by conventional coated abrasives. Here’s why:

Three-dimensional structures uniformly distributed over the entire surface of 3M™ Trizact™ Abrasives (left) ensure consistent performance and eliminate belt-to-belt variation. Conventional abrasives (right), which feature randomly arranged minerals, wear and finish unevenly.

Conventional abrasives start out sharp, but they dull quickly.

3M™ Trizact™ Abrasives have three-dimensional structures containing multiple layers of abrasive mineral. As these pyramid-like structures wear, fresh, sharp mineral is exposed.

ATTENTION: Belts are available in other grades and sizes. If you need a specific belt not listed, contact your 3M Sales Specialist or 3M Authorized Distributor.

3M™ Trizact™ Belts

3M™ Trizact™ 217EA

- Ideal for aluminum, copper, brass and zinc alloys to final finishing

- Good for low pressure application

- Flexible belt for intermediate finish and dimensioning

3M™ Cartridge Rolls

Cartridge rolls are ideal for getting into small, hard to reach spaces. As they wear, the wrapped layers of the cartridge roll continuously expose fresh abrasive layers for continued cutting action. Available in regular and tapered construction.

3M™ Cartridge Rolls 341D

- Aluminum oxide on an X wt. cloth backing
- Long life and fast cut
- General purpose cartridge rolls at a value price

3M™ Square and Cross Pads

Square pads are ideal for fast grinding/blending of channels, fillets, and corners, plus spotting on flat surfaces. As the square pads rotate, the corners exert a fast biting action and gradually wear down to expose fresh abrasive material.

Cross pads are used for close tolerance polishing of small radii and channels, deburring the ends and insides of tubing, and other special applications.

3M™ Square Pads 341D

- Premium aluminum oxide on an X wt. cloth backing
- Long life and fast cut
- General purpose square pads at a value price

Scotch-Brite™ Discs

Make tough jobs easier. Scotch-Brite™ Discs can help you achieve a burr-free, paintable finish in fewer steps without damaging the base material. The non-woven, open web, durable construction is designed to resist loading and greatly increase the life of the disc. As a result, you will not have to change it as often. However, when you do change your disc, the Roloc™ attachment or Hook-and-Loop attachment makes it fast and easy.

Scotch-Brite™ Surface Conditioning Belts

The easiest way to a perfect finish. Choose Scotch-Brite™ Surface Conditioning Belts for cleaning, finishing, blending and deburring. The reinforced backing offers good flexibility whether working on a file belt or backstand. The non-woven material combined with abrasive grain is an ideal way to add a great finish or remove burrs without gouging or undercutting the work piece. Trust Scotch-Brite belts to deliver fantastic finishes.

Scotch-Brite™ Wheels

Get high performance and durability in a variety of cleaning, deburring, finishing and polishing applications. Used on right angle grinders and bench tools, Scotch-Brite™ Wheels produce great results on all types of metal, composites and glass.

Convolute Wheels Selection Guides

Scotch-Brite™ Convolute Wheel performance differences can be attributed to mineral (aggressiveness) and density (hardness). The combination of these two characteristics and subtle variations determine if the wheel will cut more aggressively or will be more durable and less conformable (See below).

Legend

CP	Cut and Polish Wheel	LDW	Light Deburring Wheel	MU	Multi-Finishing Wheel
EXL	EXL Deburring Wheel	MF	Metal Finishing Wheel	XR	XR Metalworking Wheel

* Numeric designators (8/9) represent mineral aggressiveness; not density.

** XR Wheel Density: H = Hard

	Scotch-Brite™ Convolute Wheel	Application				
		Cleaning	Deburring	Blending	Finishing	Polishing
Best	EXL Deburring		●	●	●	●
	EXL-XP Deburring		●	●	●	●
	Metal Finishing	●		●	●	
	Cut and Polish			●		
	Multi-Finishing			●	●	
	XR Metalworking		●	●		
	Light Deburring		●		●	

Density Number (prefix to mineral)

soft ← → hard

2	4	6	7	8	9	10	11
---	---	---	---	---	---	----	----

Mineral Abbreviations (prefix to grade)

A—Aluminum Oxide mineral
S—Silicon Carbide mineral

ATTENTION: Wheels are available in other grades and sizes. If you need a specific wheel not listed, contact your 3M Sales Specialist or 3M Authorized Distributor.

See pages 72–77 for available accessories.

Scotch-Brite™ Convolute Wheels

Scotch-Brite™ EXL-XP Deburring Wheels

- The new long life addition to the EXL family
- Excellent for deburring, polishing and finishing all types of metals, composites and glass

Unitized Wheels Selection Guides

Scotch-Brite™ Unitized Wheel performance differences can be attributed to mineral (aggressiveness) and density (hardness). The combination of these two characteristics and subtle variations determine if the wheel will cut more aggressively or will be more durable and less conformable (See below).

Legend	
	CP Cut and Polish Unitized Wheel
	EXL EXL Unitized Wheel
	CS Clean and Strip Unitized Wheel
	MF Metal Finishing Unitized Wheel

* No mineral: Use with abrasive compound.

Scotch-Brite™ Unitized Wheel	Application				
	Cleaning	Deburring	Blending	Finishing	Polishing
Best EXL Deburring		●	●		●
Cut and Polish		●	●		●
Metal Finishing			●	●	
Clean and Strip	●				

Density Number (prefix to mineral)

soft ←————→ hard

2	4	6	7	8	9	10	11
---	---	---	---	---	---	----	----

Mineral Abbreviations (prefix to grade)

A—Aluminum Oxide mineral
S—Silicon Carbide mineral

See pages 72–77 for available accessories.

Scotch-Brite™ Unitized Wheels

Scotch-Brite™ EXL Unitized Deburring Wheels

- Strong and efficient for deburring and polishing of all metal alloys
- Excellent in resisting smearing and minimizing heat buildup on the work piece
- Conformable wheel in a variety of densities and grades for maximum cut and durability

Less Aggressive/Finer Finish

More Aggressive/Coarser Finish

Scotch-Brite™ Ultra Fine Hand Pad 7448 (Gray)

- Ultra fine consistent finishes on metals, woods, plastics and composites
- Provides similar performance as steel wool grade 00

Scotch-Brite™ General Purpose Hand Pad 7447 (Maroon)

- Standard for surface conditioning worldwide
- Clean, blend, finish, and deburr faster, easier and with better results than conventional abrasives
- Provides similar performance as steel wool grade 1

Scotch-Brite™ Production Hand Pad 8447 (Maroon)

- High cut for paint preparation, blending, and scuffing
- Long life performance on aluminum, stainless steel, plastics, wood and fiberglass
- Provides similar performance as steel wool grade 2

Scotch-Brite™ Blending Hand Pad 7446 (Gray)

- Specially designed for hand blending and finishing stainless steel
- Mineral coarseness blends surface scratches on many metals, wood and synthetic surfaces
- Provides similar performance as steel wool grade 3

Scotch-Brite™ Heavy Duty Hand Pad 7440 (Tan)

- Most durable and aggressive pad for quick stock removal
- Cuts fast to remove contaminants and oxides in the most demanding cleaning and finishing applications
- Provides similar performance as steel wool grade 4

on stock wheels
within the U.S.!

The superabrasive products featured in this catalog are 3M's best, "go-to" wheels for cutting tool applications ranging from short runs and re-sharpening to "lights-out" and long production runs. All are in-stock, and are available for fast, two-day shipping within the U.S. **If you require an item that is not listed, please contact your 3M Customer Service Representative at 1-800-736-2500.**

Typical Abrasive Wheels Used for Round Tool Grinding

1 Gashing — Grinding a slot or notch along the cutting face to allow for chip flow.

2 Primary Relief — Removing material directly behind the cutting edge to provide clearance.

3 Secondary Relief — A slight bevel next to the primary relief.

4 Cut-off — Using a thin wheel to trim blanks to length. Typically used on the cutting end of the tool when re-grinding and on the shank end when forming a blank.

6 OD Grinding — Grinding to final diameter.

5 Fluting — Flutes are the helical or straight grooves in the body of the tool. This provides a pathway to permit the removal of chips, and to allow coolants to reach the cutting surface.

7 End Work — Grinding a small clearance, or relief angle, on the face (tip) of the tool.

When to use Diamond vs. CBN

For optimal grinding results, make sure you know what material the tools are made of.

Can't find what you need?

Simply provide us with the following information, and we'll help you select the optimal product for your application.

Contact 3M Customer Service for more information.

E-mail	Fax	Phone
superabrasives@mmm.com	973-884-0392	800-736-2500

To order, specify: Wheel Shape, Dimension, Mineral, Grade and Product ID.

1. Are you manufacturing new tools or sharpening?

- Manufacturing Resharpening

2. What is your application?

- Fluting OD Grinding Step Grinding
 Gashing Primary Relief Other _____
 End Work Secondary Relief _____

3. What kind of material are you grinding?

- Carbide High Speed Steel Other _____

4. What type of equipment are you using?

- CNC Grinder Manual Tool & Cutter Other _____

If CNC Grinder...what is the model?

- ANCA—HP _____ Walters—HP _____ Other _____
 Rollomatic—HP _____ Tru Tech—HP _____ HP _____

5. What type of coolant are you using?

- Straight Oil Water Based Other _____
 Chilled? Yes No

6. What is the size/grade of your wheel(s)?

Shape	Diameter	Thickness	Hole	Grade
1F1				
1V1				
11A2				
12A2				
11V9				
12V9				
1A1R				
Other:				

Also Specify:

Radius: _____ Rim Width: _____
 Face Angle: _____ Rim Width: _____

7. What do you want to change/accomplish?

- Cut Faster Less Frequent Sticking Other _____
 Better Finishing Run Longer Without Re-truing

8. Which wheels have you tried?

Which 3M wheels in this brochure have you tested? _____

If none, what wheels do you currently use? _____

Fluting Wheel Performance Characteristics

3M has six standard constructions that are ideal for a variety different operations.

Product Performance (Diamond / CBN)		
654DJ / 144DI	665PK / 164PK	650HJ / 154HK
<ul style="list-style-type: none"> • Phenolic resin bond • Good cut rate/stock removal • Holds shape • Use for lower temperature operations • Can be run with water • Ideal for small re-grind shops or in-house re-sharpening 	<ul style="list-style-type: none"> • Polyimide resin bond • Higher cut rate/fast stock removal • Better form retention • Designed for higher temperature operations 	<ul style="list-style-type: none"> • Hybrid bond • Fastest cut rate • Best form retention • Designed for higher temperature operations than polyimide bond • Reduced frequency of dressing and minimal "white sticking" required • Ideal for long, uninterrupted runs

Wheel Performance Characteristics

3M™ Superabrasive Wheels are available in a variety of constructions, each with its own unique characteristics. Choose the 3M Wheel with the best balance of form retention and cut rate for your application.

- Less Form Retention
 - Shorter Production Runs
 - Free Cutting
 - Fast Cutting
- Best Form Retention
 - Close Tolerances
 - Long Wheel Life
 - Long Production Runs
 - Slower Cut Rate

The wheels listed in this catalog are in stock and intended as a general starting point for the application indicated. **These wheels are recommended for wet applications.** For dry applications or wheel configurations/grades not listed here, please contact your 3M Customer Service Representative at 1-800-736-2500.

Primary and Secondary Relief Grinding

Cutting edges are typically "relieved" to enhance chip clearance. Primary relief involves removing material directly behind the cutting edge. For secondary relief, a slight bevel is ground next to the primary relief.

Scotch-Brite™ Product Guide

Density Number (prefix to mineral)

Mineral Abbreviations (prefix to grade)

- A—Aluminum Oxide mineral
- S—Silicon Carbide mineral
- T—Talc mineral

Grade Abbreviations

- ULF—Ultra Fine
- SFN—Super Fine
- VFN—Very Fine
- FIN—Fine
- MED—Medium
- CRS—Coarse
- XCS—Extra Coarse

Example:

2S MED = Soft Density,
Silicon Carbide Mineral,
Medium Grade

Measurement Conversions:

- 1 inch = 25.4 millimeters
- 1 millimeter = 0.039370 inches
- 1 micron (μ) = 0.000039 inches

ANSI—American National Standards Institute

FEPA—Federation of European Producers of Abrasives Products

*Scotch-Brite™ Surface Conditioning Grade (Generates finish approximately equivalent to indicated coated abrasive grade.)

3M™ Adhesive Selection Guide

Note: The technical information and data on these pages should be considered representative or typical only and should not be used for specification purposes. Final product selection should be made only after consideration of a variety of factors and evaluations of sample bonds.

*Produces a temporary bond on these materials. (1) Adhesives must be force dried and bonded while warm. (2) For best results, preheat the substrate to a minimum of 120°F (49°C). (3) Evaluate usage surface activator.

3M™ Non-Structural Adhesives

3M™ Aerosol Adhesives

Only a finger's touch puts a job-matched formulation to work on paper, plastic, cardboard, foam, metal and more. 3M Aerosol Adhesives contain no methylene chloride, chlorofluorocarbons (CFCs), or 1,1,1-trichloroethane (methyl chloroform) and are California compliant.

3M™ EPX™ Applicators & Accessories

Mixing nozzle will perform to your requirements. With consistent air pressure for easy uniform application, the Duo-Pak cartridge will give you the flow rate needed. Fast, convenient way to simultaneously meter, mix and apply two-part adhesives and potting compounds. System features handy Duo-Pak Adhesive Cartridges that snap quickly into the durable, lightweight EPX applicator. A slight squeeze on the trigger advances the plunger into the cartridge. Accurate measurement and the mixing nozzle provides thorough mixing and precise placement of material. Ideal system for assembly, maintenance and in-field service.

How to use this selection guide: The 3M™ Protective Tape Products Selection Guide is a quick reference of standard 3M™ Protective Tape Products to help the user select appropriate tapes for consideration and evaluation in their applications. Products are color-coded by product family for easy reference. It is essential that the user evaluate the 3M™ Protective Tape Product to determine whether it is suitable for a particular purpose to meet the user's expectation.

Many factors can affect the use and performance of a 3M™ Protective Tape Product in a particular application:

- Surface texture of substrate
- Surface preparation of substrate (including use of solvents)
- Method and conditions of tape application
- Time and environmental conditions
- Storage conditions

Ordering Information

3M™ Protective Tapes are custom ordered products. Please contact your local 3M Authorized Distributor or your 3M Sales Specialist for ordering information. For further assistance, call PolyMask Corporation at 1-800-241-2031.

3M™ VHB™ Tapes

For over 30 years, engineers have been specifying 3M™ VHB™ Tapes to permanently bond and seal many metals, plastics, and other surfaces for increased productivity, high strength, long term durability and improved appearance.

3M™ VHB™ Tape's all-acrylic construction seals against moisture and most solvents, providing long-term resistance to UV and temperature cycles. The tape's unique foam acts as a shock absorber for outstanding impact resistance. Unlike the stress points common to mechanical fasteners, 3M™ VHB™ Tapes distribute the stress. You can use thinner, light-weight materials with less material fatigue.

Product Number		Color	Temperature Resistance		
			Short	Long	
4941	(45 mils)	Gray	300°F (149°C)	200°F (93°C)	Conformable and plasticizer resistant. Good adhesion to metals, plastics and plasticized vinyls.
4611	(45 mils)	Dark Gray	450°F (232°C)	300°F (149°C)	Bonds to bare metal and holds parts together during the washes and high temperature bake of a powder paint cycle. Used for hat channel and stiffeners.
5952	(45 mils)	Dark Gray	300°F (149°C)	200°F (93°C)	Bonds to most liquid and powder painted surfaces, and ABS blends, without the need to prime the surface first.
4945	(45 mils)	White	300°F (149°C)	200°F (93°C)	Plasticizer resistant. High strength firm core. Bonds to most painted substrates. Good adhesion to substrates containing plasticizers.
4950	(45 mils)	White	300°F (149°C)	200°F (93°C)	Bonds to most metals and high surface energy substrates.

3M™ Masking Products

**CLASS I
MASKING**

**CLASS II
MASKING**

**CLASS III
MASKING**

Increasing Holding Power, Line Sharpness,
and Clean Removal

Performance (30 minute bake)

Tapes with best-in-class holding power for critical paint lines and clean removal on high valued products or processes.

2693 Up to 325°F (163°C)

231 Up to 300°F (149°C)

232 Up to 250°F (121°C)

Tapes with reliable masking and clean removal on surfaces for functional coatings or paints, splicing, and heavy duty maintenance.

2380 Up to 325°F (163°C)

2364 Up to 300°F (149°C)

234 Up to 250°F (121°C)

Tapes with clean removal for light duty bundling, attaching and labeling.

2307 Up to 200°F (93°C)

200 Up to 200°F (93°C)

2214 Up to 150°F (66°C)

- What is your application?
- To what temperature will the tape be exposed during use?
- Do you need maximum holding power during use?
- Do you need maximum paint edge sharpness when the tape is removed?
- Do you want to remove the tape without slivering and adhesive residue?

Scotch® High Strength Tapes— Bundling and Reinforcing Solutions

3M has developed a wide range of high strength tapes, resistant to abrasion, moisture and scuffing, for the bundling and reinforcing challenges faced in the industrial marketplace. Applications for these high performance products can vary dramatically — from tabbing the end lap of metal coils to stabilizing pallets to reinforcing large bulk containers or just a single carton.

These tapes balance tensile strength and adhesive holding power, even under extreme conditions, providing secure, cost-effective solutions for a variety of strapping, bundling and reinforcing applications.

Scotch® Box Sealing Tapes

With Scotch Box Sealing Tapes, you have the flexibility to seal boxes in a wide range of environments for durable and secure closure in packing stations. The tape is tough enough to resist score-line breaking and center-seam splitting, even when subject to rough handling.

Features: Strong backing with either pressure-sensitive hot melt synthetic rubber resin adhesive or acrylic adhesives for reliable closures. A variety of hand-held dispensers allow for quick and easy application.

Technologies

	Cool Flow™ Exhalation Valve. Proprietary one-way valve for easy exhalation and cool, dry comfort.		Advanced Electret Media. Electrostatically charged microfibers help make breathing easier and cooler.		Adjustable Buckle Straps. A single tug helps provide a comfortable, secure fit.
	M-noseclip. Adjusts easily for fewer pressure points and greater comfort.		Carbon Filter Material. Carbon layers remove many nuisance level odors* for greater wearer comfort.		P-series Filter. Featuring Advanced Electret Media, appropriate for prolonged use in oil and non-oil containing environments.
	Faceseal. Soft and secure, conforms closely to face for long-lasting comfort.		Cake-resistant Filter Media. Specially designed filter layers for welding provide longer respirator life and easier breathing.		Compatibility. Accommodates a wide range of safety equipment, including eye and hearing protection.

* Nuisance level odors refers to concentrations not exceeding the OSHA PEL or other applicable government exposure limits, whichever is lower.

See Warning on Page 122

3M™ Full and Half Facepiece Reusable Respirators

Respirator and filters provide an easy-to-use, comfortable, wide range of respiratory protection.

Applications: Use in a variety of applications including painting, welding, metalworking and auto manufacturing (when used with appropriate cartridges, filters or supplied air).

1. Choose Facepiece

Half Facepiece

5000 Series

Features and Benefits

- Single use respirator: cartridges are permanently attached
- Made from soft, lightweight thermoplastic elastomer
- No ongoing maintenance necessary
- Resealable storage bag helps keep respirator clean between uses
- Low profile design provides wider field of vision and greater comfort while wearing goggles or glasses
- For convenience and simplicity, some respirator assemblies come with 3M™ Filters P95 along with 3M™ Filter Retainers 501

6000 Series

Features and Benefits

- Made from soft, lightweight thermoplastic elastomer
- Easy to adjust head straps
- Supplied with reclosable storage bag
- Swept back design improves balance and visibility
- NIOSH approved for negative pressure air purifying and positive pressure dual airline applications
- Can be used with 3M™ Filters and Cartridges or 3M™ Dual Airline System
- Available with a standard or drop-down head harness option. Drop-down model allows wearers to lower the respirator without removing hard hat or faceshield.

7500 Series

Features and Benefits

- Made from soft, resilient silicone and heat resistant plastics
- Unique head harness design gives to the user the option of wearing the respirator in traditional or drop-down mode
- 3M™ Cool Flow™ Exhalation Valve makes breathing easier, and helps reduce heat and moisture buildup in the facepiece and provides cool, dry comfort

Full Facepiece

6000 Series

Features and Benefits

- Soft, silicone face seal
- Four strap suspension for easy donning and doffing
- Bayonet attachment
- Swept back cartridge design
- Wide field of vision
- Meets all the requirements of ANSI Z87.1-2003 for high impact (Z87+)
- Integrated optical correction limits distortion as you look from the left to the right
- Directs exhaled breath and moisture downward
- Smooth surface allows for quick and easy cleaning
- Available with negative pressure and dual airline models

7800S Series

Features and Benefits

- Double-flange face seal and six adjustable straps help provide a secure fit
- Made of silicone for increased comfort and durability
- Extra-large inhalation and exhalation valves help make breathing easier
- Use with 3M™ Filters and Cartridges and/or a variety of powered and supplied air systems

FF-400 Series

Features and Benefits

- Large lens featuring Scotchgard™ Protector
- Passive speaking diaphragm
- 3M™ Cool Flow™ Valve makes breathing easier, helps reduce heat and moisture buildup in the facepiece, and provides cool, dry comfort
- Durable, long-lasting head harness and comfort cradle
- Soft, silicone nose cup and face seal

* 3M recommended for relief against nuisance levels of organic vapors and acid gases. Nuisance level organic vapor and acid gas refers to concentrations not exceeding OSHA PEL or applicable government occupational exposure limits, whichever is lower. Do not use for respiratory protection against acid gases or organic vapors (except hydrogen fluoride).

** Reminder: These cartridges are approved for respiratory protection from hydrogen sulfide gas up to 10 times the permissible exposure limit (PEL) with half facepiece respirators and full facepiece respirators when qualitatively fit tested, or up to less than 300 parts per million (ppm) with full facepiece respirators when quantitatively fit tested or according to specific OSHA standards or applicable government regulations, whichever is lower. 300 ppm is the concentration considered Immediately Dangerous to Life or Health (IDLH) for hydrogen sulfide.

† As recommended by the California Department of Pesticide Regulation No. 01-009-Methyl Bromide Field Fumigation. 3M recommended for use against radioiodine and methylbromide. Note: not NIOSH approved for methylbromide or radioiodine.

3M™ Sorbents

3M™ Maintenance Sorbents: Fast acting, highly absorbent, easy to use and absorb almost any type of non-aggressive liquids such as oils, coolants, hydraulic fluids and water. Its high fluid capacity means the need to change the sorbent is less frequent, saving on material, labor and disposal costs.

3M™ Petroleum Sorbents: Sorbs oil and other petroleum-based liquids while repelling water. Available in a variety of configurations to best suit your needs including: folded, pads, booms, pillows, sweeps, rolls and drum covers.

Product Number/Description	Model	Size	UPC (051138-)	Qty./Case
3M™ Maintenance Sorbents				
Folded M-FL550DD, High Capacity				
 <p>3835</p> <ul style="list-style-type: none"> • Easy-to-use solution for cleaning up spills, drips and fluid leaks • Versatile: can be used in pillow, pad, roll or boom configuration • Scrim on one side to increase strength and help eliminate linting • Dispenses from a carrying/dispenser box in the form of a continuous roll • Less waste: perforated every 16 inches so you can select the length required • Absorbs 31.5 gallons per case • Applications range from maintenance to spill response 	M-FL550DD	5" x 50'	29071-9	3
Rug M-RG36300E				
 <p>3841</p> <ul style="list-style-type: none"> • Use in areas where foot and vehicle traffic is a concern • Will sorb non aggressive liquids while enduring the punishment of being tread upon • Durable and versatile • Use in industrial maintenance applications • Absorbs 32 gallons per rug 	M-RG36300E	36" x 300'	29002-3	1
Mini-Boom				
 <p>3840</p> <ul style="list-style-type: none"> • Tube-like shape is ideal for placing around machinery to contain spills and prevent leaks from spreading into adjacent work areas • 3 inch diameter scrim on the outside of the boom identifies the use while containing particulate sorbent material designed for the application • Absorbs 12 gallons per case 	M-MB304	3" x 4'	21526-7	12
	M-MB308	3" x 8'	21527-4	6

3M™ Fall Protection

The Height of Confidence — It is our mission at 3M to provide those responsible for the safety of workers at height with reliable fall arrest equipment. We offer the knowledge and support to help take the fear out of height.

Harnesses

3M™ Elavation™ Harness

- The premium 3M™ Fall Arrest Harness
- Premium padding
- Intuitive adjustment hardware
- Web designed for additional abrasion resistance
- Rubber protective shield for label pack

3M™ Ameba Harness

- Features comfort forming webbing
- Non-elastic helical yarn moves with wearers to assist comfort and mobility
- Value padding for added comfort and moisture wicking
- Laminated sleeve helps protect label

3M™ SafeLight™ Harness

- The economical choice in fall arrest harnesses
- Quality construction at a value price
- Bright color web assists worker visibility on a jobsite

Self-Retracting Lanyards

3M™ ReLoad™ Retractable Lifeline

- Can be inspected and serviced onsite by authorized technicians for lower maintenance costs
- Clicking sound provides audible indication that pawls are functioning correctly
- 400 lbs. max capacity for cable units; 310 lbs. for web units
- Cable units range from 23–50 feet, available in galvanized or stainless steel
- Web units range from 7–23 feet

3M™ Thor™ Galvanized Cable Lifeline

- Durable aluminum housing
- Spring cushion cable guide helps reduce cable rewind damage
- Swivel top housing for enhanced mobility
- 310 lbs. max capacity
- Cable units range from 10–30 feet, available in galvanized or stainless steel
- Web units range from 7–50 feet

3M™ Retractable Lifeline (G-Series)

- Versatile product suitable for multiple industries
- Assembled in the U.S.A. from high quality materials
- Rugged durability and lightweight design
- 310 lbs. max capacity
- Cable units range from 20–50 feet, available in galvanized or stainless steel
- Web units range from 7–20 feet

3M™ Fall Protection (cont.)

Anchorage Devices

3M™ SafeClaw Reusable Concrete Anchor

- Trigger mechanism allows unit to be easily inserted and removed from pre-drilled poured concrete
- Available in 5000 lbs. (Model 4075) and 10,000 lbs. (Model 4077) rated designs

Model	UPC (78371-)	Qty./Case
4075	01071-0	1
4077	01162-5	

3M™ Reusable Roof Anchor

- Hinged anchor for wood and metal decking
- Steel design
- Fits most pitch angles
- Appropriate for Horizontal Lifeline Applications

Model	UPC (78371-)	Qty./Case
4000	00050-6	1

3M™ Beamwalk III

- Lightweight aluminum construction
- Dual axis swivel D-ring helps prevent entanglement
- Smooth sliding, non-chattering mobility across exposed I and H beams

Model	UPC (78371-)	Qty./Case
4650-3	62716-1	1

3M™ Industrial Anchor

- Permanent D-bolt anchor
- Includes nut, bolt and washer hardware

Model	UPC (78371-)	Qty./Case
4005	00053-7	1

Kits

3M™ General Fall Protection Kit

- Designed for use with rental lifts
- Includes 3M™ SafeLight™ Harness (10910), 6-ft 3M™ SafeLight™ Lanyard (209512) and tool bag for equipment storage
- Can be personalized with a customer logo

Model	UPC (78371-)	Qty./Case

Safety Warnings

⚠ WARNING: RESPIRATORS

These respirators help protect against certain airborne contaminants. Before use, the wearer must read and understand the *User Instructions* provided as a part of the product packaging. A written respiratory protection program must be implemented meeting all the requirements of OSHA 29 CFR 1910.134 including training, fit testing and medical evaluation. In Canada, CSA standards Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate. **Misuse may result in sickness or death.** For proper use, see package instructions, supervisor, or call 3M Occupational Health and Safety Division (OH&ESD) Technical Service in U.S.A. at 1-800-243-4630. In Canada, call 1-800-267-4414.

⚠ WARNING: WELDING PRODUCTS

These welding safety products must be used only by qualified persons trained in their use and maintenance and only in strict accordance with and adherence to the detailed instructions and precautionary statements provided in the instruction manual which accompanies each product. **Failure to comply with these instructions could result in sickness, serious bodily injury or death.** For proper use of these products read *User Instructions* and WARNINGS on the package. Any questions concerning proper use should be directed to your supervisor, on-site training specialist, industrial hygienist or 3M Occupational Health and Safety Division (OH&ESD) Technical Service in the U.S.A. at 1-800-243-4630. In Canada, call 1-800-267-4414.

⚠ WARNING: HEARING PROTECTION

These hearing protectors help reduce exposure to hazardous noise and other loud sounds. **Misuse or failure to wear hearing protectors at all times that you are exposed to noise may result in hearing loss or injury.** For proper use, see supervisor, *User Instructions*, or call 3M Occupational Health and Environmental Safety Division (OH&ESD) Technical Service in the U.S.A. at 1-800-243-4630. In Canada, call 1-800-267-4414. If there is any drainage from your ear or you have an ear infection, consult with your physician before wearing ear plugs. Failure to do so may result in hearing loss or injury.

⚠ WARNING: PROTECTIVE EYEWEAR

These eye and face protection products help provide limited eye and face protection. **Misuse or failure to follow warnings and instructions may result in serious potential injury, including blindness or death.** For proper use, selection, and applications against flying particles, optical radiation and/or splash see supervisor, read *User Instructions* and WARNINGS on the package, or call 3M Occupational Health and Environmental Safety Division (OH&ESD) Technical Service in the U.S.A. at 1-800-243-4630. In Canada, call 1-800-267-4414.

⚠ WARNING: SORBENTS

Failure to properly handle and dispose of sorbents contaminated by hazardous materials can result in serious physical injury or death and/or environmental harm. For proper handling, consult the Material Safety Data Sheet for the material absorbed, applicable safety and health standards, contact your supervisor, or call 3M Occupational Health and Environmental Safety Division (OH&ESD) Technical Service at 1-800-243-4630. To reduce the risk of serious physical injury or death, always use respiratory protection and protective clothing appropriate for handling the material to be absorbed. Transportation and disposal of spent sorbents must comply with all applicable federal, state and local laws and regulations. Caution: Sorbents may become slippery when used on flooring. Do not walk on sorbent or place in high traffic areas.

⚠ WARNING: FALL PROTECTION

Compliant fall protection and emergency rescue systems help prevent serious injury during fall arrest. Users must read and understand the *User Instructions* provided with the product and be properly trained by their employer prior to use per OSHA 1910.66 and 1926.503 or applicable local standards. **Misuse or failure to follow warnings and instructions may result in serious personal injury or death.** For proper use, see supervisor, *User Instructions*, or call 3M Occupational Health and Environmental Safety Division (OH&ESD) Technical Service in the U.S.A. at 1-800-243-4630. In Canada, call 1-800-267-4414.

3M™ Maintenance Aerosols

3M™ Maintenance Aerosols: 3M's line of aerosol cleaners are the fast and easy solution for removing grease, grime, inks, and residues on electrical equipment and components.

Product Number/Description	Size	UPC (021200-)	Qty./Case
3M™ 5-Way Penetrant			
 <ul style="list-style-type: none"> • Inhibits rust and corrosion by spreading a thin, even film that actually penetrates the pores of the surface • It displaces moisture and "dries out" electrical parts and equipment to help prevent shorting and increase conductivity • Spray it on to free rusted, frozen bolts, nuts, and screws • Lubricate delicate machines and precision instruments • Penetrates and demulsifies • Ideal as a tapping lubricant for stainless steel and aluminum • Contains no methylene chloride, 1, 1, 1-trichloroethane or chlorofluorocarbons <p>243698</p>	24 fl. oz.	21305-2	12
3M™ Citrus Base Cleaner			
 <ul style="list-style-type: none"> • Multi-purpose cleaner • Will dissolve and flush away dirt, grease, tar, most noncuring type adhesive films and similar substances • Citrus oil-based cleaner that emulsifies when flushed with water • Contains no petroleum distillates • Use to clean and degrease metal parts, motors, tools, printing presses and concrete • Contains no methylene chloride, 1, 1, 1-trichlorofluorocarbons <p>243700</p>	24 fl. oz.	76394-6	12
Product Number/Description	Size	UPC (048011-)	Qty./Case
3M™ Stainless Steel Cleaner and Polish			
 <ul style="list-style-type: none"> • Cleans and polishes stainless steel, chrome aluminum and laminated plastic surfaces • High gloss in one step • Contains no ozone depleting chemical <p>76621</p>	21 fl. oz.	14002-0	12

3M™ Electrical Products

3M™ Purification Series NB Liquid Bag Filters

3M™ Purification Series NB liquid bag filter products combine filtration experience and manufacturing expertise to provide high quality, cost effective solutions for those applications where a rated bag filtration is appropriate.

Series NB bag products are available in polypropylene felt and polyester felt in Size #1 and Size #2 configurations in grades ranging from 1–200 microns. The bags feature an all welded construction with a plastic sealing collar for consistent and reproducible filtration.

Series NB bag products are also available in nylon monofilament materials of construction in Size #1 and Size #2 configurations in grades ranging from 25–1200 microns. The high strength and uniform porosity of the NMO bags make them an excellent choice for applications looking for removal of oversized contaminants while allowing for passage of desired fluid particles (metallic paints...).

THREE EASY WAYS TO CONTACT US FOR ALL 3M INDUSTRIAL PRODUCTS:

3M can provide additional products and accessories to meet your needs. Please contact us in any of the following ways that you prefer:

- 1 Contact your local 3M authorized distributor directly. For information on a 3M distributor or sales representative in your area, contact us at the numbers below:

For the contiguous 48 United States:

Call 1-866-279-1288

Fax 1-877-369-2923

- 2 E-mail us at 3MIndustrial@mmm.com
- 3 For additional 3M product information call 1-800-3M Helps or visit us at www.3M.com

Prices subject to change without notice.

Important Notice to Purchaser

Safety Information: Always read and follow all safety information included with the product. Do not exceed maximum operating RPM's. Use guards provided with machine. Follow safety operation procedures posted in work areas.

Product Use: All statements, technical information and recommendations contained in this document are based upon tests or experience that 3M believes are reliable. However, many factors beyond 3M's control can effect the use and performance of a 3M product in a particular application, including the conditions under which the product is used and the time and environments conditions in which the product is expected to perform. Since these factors are uniquely within the user's knowledge and control, it is essential that the user evaluate the 3M product to determine whether it is fit for a particular purpose and suitable for the user's method of application.

Warranty and Limited Remedy: Unless stated otherwise in 3M's product literature, packaging inserts or product packaging for individual products, 3M warrants that each 3M product meets the applicable specifications at the time 3M ships the product. Individual products may have additional or different warranties as stated on product literature, package inserts or product packages. 3M MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY IMPLIED WARRANTY ARISING OUT OF A COURSE OF DEALING, CUSTOM OR USAGE OF TRADE. User is responsible for determining whether the 3M product is fit for a particular purpose and suitable for user's application. If the 3M product is defective within the warranty period, your exclusive remedy and 3M's and seller's sole obligation will be at 3M's option, to replace the product or refund the purchase price.

Limitation of Liability: Except where prohibited by law, 3M and seller will not be liable for any loss or damage arising from the 3M product, whether direct, indirect, special, incidental, or consequential, regardless of the legal theory asserted, including warranty, contract, negligence, or strict liability.
