## OmROn

## Enclosed Switch

## Small, High-precision Enclosed Switch

■ Employs a modified version of $Z$ Basic Switch as built-in switch.
■ Same mounting pitch as Z Basic Switch.

- A number of switch units may be ganged for application.
■ Pre-wired molded terminal models are available.
- Requires less operating force than conventional limit switches.

■ Long life expectancy and economical.

## Molded Terminal Model

The molded-terminal model is available with right-hand, left-hand and underside leads and is recommended for use where the switch is exposed to dust, oil or moisture.
The molded-terminal model is not approved by UL and CSA.

## - Ordering Information

Note: When placing your order for the switch, specify the required length of V.S.F. or V.C.T. cable in addition to the model number of the switch.
Example:
Standard type: ZC-Q2155
Location of lead output: Underside
Pre-wired terminals: $\quad$ COM and NO
Length of lead: $\quad 1 \mathrm{~m}$ (V.C.T. lead)
When placing your order for the above switch, specify the model
number as ZC-Q2155-MD3 (VCT 1 m ).
Suffix by Location of Lead Outlet

| Location of lead output | Suffix for pre-wired terminal |  |  |
| :--- | :--- | :--- | :--- |
|  | COM, NC, NO | COM, NC | COM, NO |
| Right-hand | ZC- $\square-M R$ | ZC- $\square-M R 2$ | ZC- $\square-M R 3 ~$ |
| Left-hand | ZC- $\square-M L$ | ZC- $\square$ ML2 | ZC- $\square-M L 3$ |
| Underside | ZC- $\square-M D ~$ | ZC- $\square-M D 2$ | ZC- $\square-M D 3 ~$ |

## Operation Indicator Equipped Model

All the models can be equipped upon request with a operation indicator to facilitate maintenance and inspection.
Because the indicator is incorporated in the terminal protective cover, the dimensions of the limit switch are not affected. In this model, the lead wire is to be connected to the screw terminal. (A connecting washer is provided on the tip of the lead wire).
The lead wire can be connected to either the NC or NO terminal. Operating characteristics are the same as the standard model from which the operation indicator equipped model is fabricated.

## AC Operation

The operating voltage range is from 90 to 250 VAC.
The dimensions are the same as the standard type. The top of the terminal protective cover is transparent to allow checking the operation easily.
When placing your order for the indicator equipped, AC-operated model, add suffix "L" to the end of the model number.

## Example:

Standard type: ZC-Q2255
Indicator equipped type: ZC-Q2255-L

| NC | ON | Does not <br> operate | Operates |
|  | OFF | Operates | Does not <br> operate |
|  | ON | Does not <br> operate | Operates |

Contact Circuit

Note: If the wiring is as shown above, the operation of the respective parts will be as follows:

| Contact | Neon lamp | Load | Actuator |
| :--- | :--- | :--- | :--- |
| NC | ON | Does not <br> operate | Operates |
|  | OFF | Operates | Does not <br> operate |
| NO | ON | Does not <br> operate | Operates |
|  | OFF | Operates | Does not <br> operate |

## DC Operation

The DC-operated is provided with an LED indicator.
Since a rectifier stack is incorporated into the unit to permit reversing the polarity, this type can also operate on AC power source.
The LED projects from the housing for easy visibility.
When placing your order, add suffix " $L 2$ " to " $L 5$ " to the model number of the standard type.
Example:
Standard type: $\quad$ ZC-Q2255
Indicator equipped type: ZC-Q2255-L2

| Type | Voltage rating | Leakage <br> current | Internal <br> resistance |
| :--- | :--- | :--- | :--- |
