

MI600ERW Series

2:1 Input, 6W, Ultra-Miniature DC/DC Converters

Key Features:

- 6W Output Power
- 2:1 Input Voltage Range
- Miniature 1" x 1" Case
- 1,500 VDC Isolation
- 24 Standard Models
- Single & Dual Outputs
- -40°C to +85°C Operation
- Industry Standard Pin-Out
- Chassis Mount Option
- DIN Rail Option

RoHS

Electrical Specifications

Specifications typical @ +25°C, nominal input voltage & rated output current, unless otherwise noted. Specifications subject to change without notice.

Input

Parameter	Conditions	Min.	Typ.	Max.	Units
Input Voltage Range	12 VDC Input	9.0	12.0	18.0	VDC
	24 VDC Input	18.0	24.0	36.0	
	48 VDC Input	36.0	48.0	75.0	
Input Start Voltage	12 VDC Input			9.0	VDC
	24 VDC Input			18.0	
	48 VDC Input			36.0	
Input Filter	Pi (π) Filter				

Output

Parameter	Conditions	Min.	Typ.	Max.	Units
Output Voltage Accuracy			±1.0	±2.0	%
Output Voltage Balance	Dual Outputs, Balanced Loads		±0.5	±1.5	%
Line Regulation	VIN = Min to Max		±0.2	±0.5	%
Load Regulation	IOUT = 5% to 100%		±0.5	±1.0	%
Cross Regulation	See Note 1			±5.0	%
Ripple (20 MHz)	See Note 2		15	25	mV P - P
Noise (20 MHz)	See Note 2		50	75	mV P - P
Transient Recovery Time, See Note 3			300	500	μSec
Transient Response Deviation	25% Load Step Change		±3.0	±5.0	%
Temperature Coefficient				±0.03	%/°C
Output Over Voltage Protection		110	120	140	%VOUT
Output Short Circuit	Continuous (Autorecovery)				

General

Parameter	Conditions	Min.	Typ.	Max.	Units
Isolation Voltage	60 Seconds	1,500			VDC
Isolation Resistance	500 VDC	1,000			MΩ
Isolation Capacitance			1,000		pF
Switching Frequency			300		kHz

EMI Characteristics

Parameter	Standard	Level
Radiated Emissions	See Note 4 EN 55022	Class A
Conducted Emissions	See Note 4 EN 55022	Class A
ESD	EN 61000-4-2	Criteria B; ±4 kV Contact
RS	EN 61000-4-3	Criteria A; 10V/m
EFT	See Note 5 EN 61000-4-4	Criteria B; ±2 kV
	See Note 5 EN 61000-4-4	Criteria B; ±4 kV
Surge	See Note 6 EN 61000-4-5	Criteria B; ±2 kV
CS	EN 61000-4-6	Criteria A; 3 Vrms
Voltage Dips	EN 61000-4-29	Criteria B; 0% - 70%

Environmental

Parameter	Conditions	Min.	Typ.	Max.	Units
Operating Temperature Range	Ambient	-40	+25	+85	°C
Operating Temperature Range	Case			+105	°C
Storage Temperature Range		-55		+125	°C
Cooling	Free Air Convection				
Humidity	RH, Non-condensing			95	%

Physical

Case Size	1.00 x 1.00 x 0.461 Inches (25.4 x 25.4 x 11.7 mm)
Case Material	Aluminum (UL94-V0)
Weight	0.46 Oz (15g)

Reliability Specifications

Parameter	Conditions	Min.	Typ.	Max.	Units
MTBF	MIL HDBK 217F, 25°C, Gnd Benign	1.0			MHours

Absolute Maximum Ratings

Parameter	Conditions	Min.	Typ.	Max.	Units
Input Voltage Surge (1 Sec)	12 VDC Input	-0.7		25.0	VDC
	24 VDC Input	-0.7		50.0	
	48 VDC Input	-0.7		100.0	
Lead Temperature	1.5 mm From Case for 10 Sec			300	°C

Caution: Exceeding Absolute Maximum Ratings may damage the module. These are not continuous operating ratings.

MI648D-15ERW	48	36.0 - 75.0	142	3	±15.0	±200	±10	88	20.0	100	300

Notes:

1. Cross regulation is measured on dual output models with one output at 50% load while the other output is varied from 10% load to 100% load.
2. When measuring output ripple & noise, it is recommended that an external capacitor (10 μ F) be placed from the +Vout to the -Vout pins for single output units and from each output to common for dual output models.
3. Transient recovery is measured to within a 1% error band for a load step change of 25%.
4. With the addition of the **DCFM-0x** (or a similar discrete filter), all models will meet EN 55022 class B. Suggested input circuits are shown in the connection diagrams below & on page 3. Contact the factory for more information.
5. To meet the requirements of EN 61000-4-4 ($\pm$ 2 kV), external components are needed. The connection diagrams below & on page 3 shows an external input filter that would typically achieve this. With the addition of the **DCFM-0x**, EN 61000-4-4 ($\pm$ 4 kV) can be achieved. Contact the factory for more information.
6. To meet the requirements of EN 61000-4-5 ($\pm$ 2 kV), external components are needed. This can be done discretely (as shown in the connection diagrams below & on page 3), or with the addition of the **DCFM-0x**. Contact the factory for more information.
7. Dual output units may be connected to provide a 10V, 24V, or 30 VDC output. To do this, connect the load across the positive (+Vout) and negative (-Vout) outputs and float the output common.
8. Operation at no-load will not damage these units. However, they may not meet all specifications. The recommended minimum load is given in the model selection table above.
9. It is recommended that a fuse be used on the input of a power supply for protection. See the Model Selection table above for the correct rating.

Derating Curve

Typical Board Layout: With DCFM-01 Input Module (See note at left)

Input noise and surge suppression modules are available for a number of MPD DC/DC converters. An **MI600xERW** connection (with a **DCFM-01/02**) is illustrated in the diagram at right. With this connection, the converter will meet the specified EMI/EMS levels. Recommended values for the components shown are:

Output	<48VDC Input	>48VDC Input
Fuse	See Table Above	
C1	330 μ F/50V	330 μ F/100V

For pricing or full technical information on these modules (**DCFM-01** and **DCFM-02**) please contact the factory.

Typical Connection

For applications that require meeting EMC standards, the diagram above illustrates a typical connection of the **MI600xERW** series. The units do not require external components to operate as specified. Some notes on this diagram (starting with the input circuit) are:

1. An external fuse should be used in all power module applications. The recommended fuse is shown in the model chart on page 2.
2. To protect against a surge, an external MOV is recommended on the input. A suggested value is given in the table at right.
3. To protect against voltage spikes, it is recommended that a TVS be used on the input. A suggested value is given in the table at right.
4. The output filtering capacitor (C₃) is a high frequency, low resistance electrolytic capacitor. Care must be taken in choosing this capacitor not to exceed the capacitive load specification for the unit. Voltage derating of capacitors should be 60% or greater.

5. Recommended values for components are:

Component	12 V _{IN}	24 V _{IN}	48 V _{IN}
MOV	---	S14K35	S14K60
LDM1	---	56 μ H	56 μ H
TVS	SMCJ28A	SMCJ48A	SMCJ90A
C ₁	680 μ F/25V	330 μ F/50V	330 μ F/100V
C ₂	1 μ F/50V	1 μ F/50V	1 μ F/100V
LDM2	4.7 μ H	4.7 μ H	4.7 μ H
CY1	1nF/2 kV	1nF/2 kV	1nF/2 kV
CY2	1nF/2 kV	1nF/2 kV	1nF/2 kV
C ₃	10 μ F	10 μ F	10 μ F
C ₄	10 μ F	10 μ F	10 μ F

6. The drawings below show typical board layouts for the EMC/EMI circuit shown above (one for single output models and one for dual output units).

7. In many applications simply adding input/output capacitors will enhance the input surge protection and reduce output ripple sufficiently. The value of the input capacitor can range from 10 μ F to 330 μ F, depending on the needs of the application. The output capacitor would typically be 10 μ F.

Typical Board Layout: With External Filter/Surge Components for Single Output Unit

Typical Board Layout: With External Filter/Surge Components for Dual Output Unit

Mechanical Dimensions

www.micropowerdirect.com

Pin Connections

Pin	Single Output	Pin	Dual Output
1	+VIN	1	+VIN
2	-VIN	2	-VIN
3	+VOUT	3	+VOUT
4	No Pin	4	Common
5	-VOUT	5	-VOUT

Notes:

- All dimensions are typical in inches (mm)
- Pin Section Tolerance x.xxx = ± 0.004 (± 0.100)
- General Tolerance x.xx = ± 0.01 (± 0.25)
- Pin 1 is marked by a "dot" or indentation on the top of the unit

All **M1600xERW** models are available on adapters for chassis or DIN RAIL mounting. Specifications for these adapters are shown in the diagrams below. Contact the factory for more information.

Chassis Mount Option: (-A2 added to Model No.)

DIN Rail Option: (-A4 added to Model No.)

Pin Connections

Pin	Single Output	Pin	Dual Output
1	No Connection	1	No Connection
2	-VIN	2	-VIN
3	+VIN	3	+VIN
4	-VOUT	4	-VOUT
5	No Connection	5	Common
6	+VOUT	6	+VOUT

Pin Connections

Pin	Single Output	Pin	Dual Output
1	No Connection	1	No Connection
2	-VIN	2	-VIN
3	+VIN	3	+VIN
4	-VOUT	4	-VOUT
5	No Connection	5	Common
6	+VOUT	6	+VOUT

Notes:

- All dimensions are typical in inches (mm)
- General Tolerance x.xx = ± 0.02 (± 0.50)
- Wire Range is 24 AWG to 12 AWG
