IN DETAIL:

(a). Reset (FF)

The MDT80C06 reset to initial mode as power on and transmit FA, AA, 00 to system 8042. Then set default states as below :

sampling rate : 100 reports/s
2 dots/count
non-autospeed
stream mode
disable

(b). Resend (FE)

- When MDT80C06 receives an invalid command, it returns a Resend code to the system.
- If MDT80C06 receives a Resend command, its last packet of data will send again to the system.

(c). Set Default (F6)

Initializes mouse conditions to the power-on default states.

(d). Disable(F5)

To disable mouse transmissions to system.

(e). Enable (F4)

To enable mouse transmissions to system if in stream mode.

(f). Set Sampling Rate (F3, XX)

Sets the sampling rate as described below

Second byte XX	Sample Rate
