

## Kxxxzy SIDAC

RoHS

### Schematic Symbol

### Description

The SIDAC is a silicon bilateral voltage triggered switch. Upon application of a voltage exceeding the SIDAC breakover voltage point, the SIDAC switches on through a negative resistance region to a low on-state voltage. Conduction continues until the current is interrupted or drops below the minimum holding current of the device.

SIDACs feature glass-passivated junctions to ensure a rugged and dependable device capable of withstanding harsh environments.

### Features

- AC Circuit Oriented
- RoHS Compliant
- Triggering Voltage of 79V to 330V

### Applications

Suitable for high voltage power supplies, natural gas igniters, high-pressure Sodium lamps, and Xenon flash ignition.

### Electrical Specifications ( $T_J = 25^\circ\text{C}$ , unless otherwise specified)

| Symbol    | Parameters                        | Test Conditions | Min | Max | Unit |
|-----------|-----------------------------------|-----------------|-----|-----|------|
| $V_{BO}$  | Breakover/Trigger Voltage         | K0900y          | 79  | 97  | V    |
|           |                                   | K1050y          | 95  | 113 |      |
|           |                                   | K1100y          | 104 | 118 |      |

| Do not exceed                                          |                                    | 280°C                   |

### Physical Specifications

|                        |                                                               |
|------------------------|---------------------------------------------------------------|
| <b>Terminal Finish</b> | 100% Matte Tin Plated / Pb-free Solder Dipped                 |
| <b>Body Material</b>   | UL recognized epoxy meeting flammability classification 94V-0 |
| <b>Lead Material</b>   | Copper Alloy                                                  |

### Design Considerations

Careful selection of the correct device for the application's operating parameters and environment will go a long way toward extending the operating life of the Thyristor. Overheating and surge currents are the main killers of SIDACs. Correct mounting, soldering, and forming of the leads also help protect against component damage.

### Reliability/Environmental Tests

| Test                                     | Specifications and Conditions                                                        |

**Notes:**

1. Type 70 lead form as shown is standard for the E package.
2. All leads are insulated from case. Case is electrically nonconductive (rated at 16000V ac rms for one minute from leads to case over the operating temperature range.)
3. Mold flash shall not exceed 0.13 mm per side.

Technical drawing of a 16-pin connector assembly, showing side and top views with dimensions in inches and millimeters.

**Side View Dimensions:**

- Overall height: 1.30 (33.0)
- Height from base to top of pins: 0.708 (18.0)
- Height from base to top of mounting holes: 0.354 (9.0)
- Pin pitch: 0.50 (12.7)
- Pin diameter: 0.025 (6.35)
- Mounting hole diameter: 0.157 (4.0)
- Mounting hole pitch: 0.125 (3.2) MAX
- Base thickness: 0.236 (6.0)
- Pin height above base: 0.02 (0.5)

**Top View Dimensions:**

- Overall width: 14.17 (360.0)
- Pin pitch: 0.50 (12.7)
- Pin diameter: 0.025 (6.35)
- Mounting hole diameter: 0.157 (4.0)
- Mounting hole pitch: 0.125 (3.2) MAX

**Assembly Details:**

- The assembly consists of a base with 16 pins and 8 mounting holes.
- The pins are spaced at 0.50 (12.7) inches.
- The mounting holes are spaced at 0.125 (3.2) inches maximum.
- The pins are 0.025 (6.35) inches in diameter.
- The mounting holes are 0.157 (4.0) inches in diameter.
- The base is 1.30 (33.0) inches high.
- The pins are 0.708 (18.0) inches high from the base.
- The mounting holes are 0.354 (9.0) inches high from the base.
- The pins are 0.02 (0.5) inches high above the base.
- The base is 0.236 (6.0) inches thick.
- The pins are 0.025 (6.35) inches in diameter.
- The mounting holes are 0.157 (4.0) inches in diameter.
- The mounting hole pitch is 0.125 (3.2) inches maximum.
- The pin pitch is 0.50 (12.7) inches.
- The overall width is 14.17 (360.0) inches.
- The overall height is 1.30 (33.0) inches.
- The height from base to top of pins is 0.708 (18.0) inches.
- The height from base to top of mounting holes is 0.354 (9.0) inches.
- The pins are 0.02 (0.5) inches high above the base.
- The base is 0.236 (6.0) inches thick.
- The pins are 0.025 (6.35) inches in diameter.
- The mounting holes are 0.157 (4.0) inches in diameter.
- The mounting hole pitch is 0.125 (3.2) inches maximum.
- The pin pitch is 0.50 (12.7) inches.
- The overall width is 14.17 (360.0) inches.

Dimensions are in inches (and millimeters).
