Product Overview

TSS-13LN+ (RoHS compliant) is an advanced wideband amplifier with shutdown feature. It is fabricated using E-PHEMT technology and offers extremely high dynamic range over a broad frequency range and with low noise figure. In addition, the TSS-13LN+ has good input and output return loss over a broad frequency range. TSS-13LN+ is enclosed in a 3mm x 3mm, 12-lead MCLP package and has very good thermal performance.

Key Features

Feature	Advantages
Broad Band: 1MHz to 1GHz	Broadband covering primary wireless communications bands: VHF, UHF, Cellular
Extremely High IP3 38.4 dBm typical at 1 MHz 39.2 dBm typical at 0.5 GHz	The TSS-13LN+ matches industry leading IP3 performance relative to device size and power consumption. The combination of the design and E-PHEMT Structure provides enhanced linearity over a broad frequency range as evidence in the IP3 being approximately 11-18 dB above the P1dB point. This feature makes this amplifier ideal for use in: <ul style="list-style-type: none">• Driver amplifiers for complex waveform up converter paths• Drivers in linearized transmit systems• Secondary amplifiers in ultra-High Dynamic range receivers
Shutdown feature	Allow users to turn on and off the amplifier with pulsed signals while keeping the power supply at constant voltage to minimize DC power consumption
Low Noise Figure 1.1 dB at 0.5 GHz	Enables lower system noise figure performance and along with High OIP3 provides high dynamic range
Low Supply Voltage	TSS-13LN+ supports low supply voltage operation which indicate low power consumption.
