

DIP to SOIC Adapter Modules

DIP to SOIC ADAPTER MODULES ELIMINATE THE NEED TO REDESIGN MOTHERBOARDS OR MAY BE USED FOR BREADBOARD PROTOTYPING

DESCRIPTION

The Accutek SOIC family of Adapter Modules permit the connection of older Dual-Inline-Packages onto circuit board sites which are designed for standard pitch SOIC devices.

Accutek SOIC's provide a one-to-one footprint with standard SOIC's for adapting DIP packages onto printed circuit boards. These adapter modules save costly motherboard redesigns.

Accutek SOIC's are offered with standard 8, 14, 16 and 20 pin counts to accommodate components with 0.050" (0.65mm) lead spacing and 0.250" (5.0mm) body width.

Accutek DIP to SOIC Adapter Modules are available with 0.032" pin holes ready to solder a DIP IC into, or they are available with a socket installed ready for the DIP IC to be inserted.

All modules are designed in-house using PCB CAD workstations. Final assembly and 100% testing are also performed in-house.

FEATURES

- Saves costly redesign of current motherboards
- Fully tested with lifetime limited warranty
- IC assembly and testing available
- EPROM and Flash programming available
- Custom configurations available

ORDERING OPTIONS

- Adapter only
- Customer supplies chips - Accutek assembles on Accutek adapters, tests and delivers finished product in antistatic tubes.
- Complete turnkey - Accutek purchases IC's and passives. Then assembles, tests and delivers finished product in antistatic tubes.
