

features

- SMD platinum thin film thermal sensors
- T.C.R. is in accordance with JIS-DIN standards
- Suitable for temperature control in various industrial equipment
- Suitable for both flow and reflow solderings
- Products with lead-free terminations meet EU RoHS requirements

* Please consult with us about the products equivalent to class B of JIS.

** Thermal time constant and thermal dissipation constant are reference values, which are values of elements and vary with connecting or fixing methods. Thermal dissipation constant is approx. 4mW/°C under the surface mounting condition.

*** Specified current is a current value that is used at reliability test under the condition of self heat-generation that can be disregarded. Ordinarily recommended measuring currents are 1mA for 100Ω and 0.1mA for 500Ω.

Note: Desired temperature values are obtained by adding temperatures in the vertical and horizontal axes. When calculating a resistance value of 105°C, read the value in the column where 100°C in the vertical axis and 5°C in the horizontal axis cross. The value will be 140.40Ω. The value for 500Ω at 0°C will be the value obtained by multiplying the resistance value in this table by 5.
