

MIA-GPS-15-C

EMBEDDED ACTIVE GPS MICROSTRIP ANTENNA

Part #: 189-00070-01

Description

The MIA-GPS-15-C is a high gain antenna customized for GPS frequencies. This advanced ceramic patch antenna includes an LNA and front-end SAW filter to reduce out of band noise with IPEX MHFI® (U.FL compatible) connector and 55mm cable length. This antenna is designed for embedded applications which feature high performance GPS applications such as GPS handheld units, mobile devices, and tracking devices.

The MIA-GPS-15-C utilizes a special semi ceramic based material which leads to higher upper hemisphere efficiency and a lower axial ratio as compared to regular patch antennas. This allows the antenna to be superior and a top choice for demanding GPS multi-band/multi-frequency antenna requirements.

Our patch antenna offerings are perfect for projects with a smaller scope and budget for which high-performance and lower weight is not a primary factor for consideration for the antenna. It features a low noise figure and high-linearity LNA. The interface connector is available in U.FL or other. Cable length can also be customized.

Electrical Specifications

Parameter	Specification
Frequency Range	1575.42 ± 3MHz
Band Width	CF ± 5MHz
Polarization	RHCP
Gain	5dBic @ Zenith
VSWR	< 1.5
Impedance	50 Ω
Axial Ratio	≤ 5dB
Current Consumption	9mA

Mechanical Specification

Parameter	Specification
Antenna Dimensions	Ø 15x15x4 mm
Operating Temperature	-40°C to 85°C
Connector	IPEX or others
Cable	RF1.13 or others
Substance Compliance	RoHS

Features

- GPS L1 frequency
- Active LNA circuitry
- Compact size
- Custom tuning
- Custom connector/Cable size
- Excellent out-of-band signal rejection
- Ideal antenna solution for RTK systems

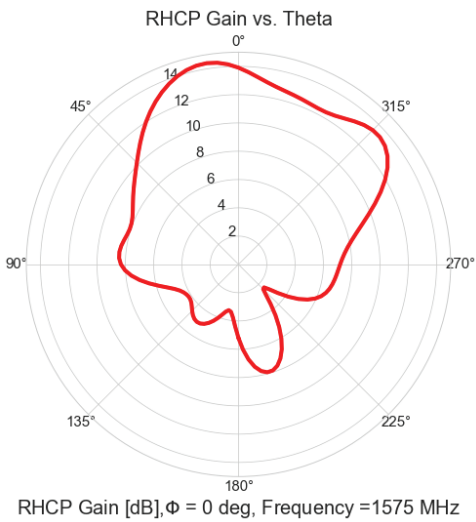

Applications

- Vehicle and fleet tracking
- Military & security
- Asset tracking
- Embedded applications
- Oil & gas industries
- Navigation devices
- Mining equipment
- LBS & M2M applications
- Handheld devices
- Law enforcement
