| QUICK REFERENCE                                  | DATA   |
|--|--|
| DESCRIPTION                                      | VALUE  |
| Nominal case sizes<br>(Ø D x L in mm)            | 10 x 20; 10 x 25; 10 x 30;<br>12.5 x 20; 12.5 x 25; 12.5 x 30;<br>12.5 x 40; 16 x 20; 18 x 20;<br>16 x 25, 18 x 25; 16 x 31;<br><b>18 x 31</b> , 18 x 35, 18 x 40; 20 x 40 |
| Rated capacitance range, $C_R$                   | 5 F to 100 F   |
| Rated voltage, U <sub>R</sub><br>(65 °C / 85 °C) | 3.0 V / 2.6 V  |
| Category temperature range                       | -40 °C to +85 °C   |
| Endurance test at 85 °C                          | Up to 1500 h   |
| Useful life at 85 °C                             | Up to 2000 h   |
| Useful life at 20 °C                             | > 10 years   |
| Shelf life at 20 °C                              | 2 years  |
| Cycle life                                       | > 500 000 cycles   |

#### **FEATURES**

- · Polarized energy storage capacitor with high capacity and energy density
- Rated voltage: 3.0 V
- · Available in through-hole (radial) version
- Useful life: up to 2000 h at 85 °C
- Rapid charge and discharge
- Maintenance-free, no service necessary
- AEC-Q200 gualified
- UL 810A recognized
- Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

#### APPLICATIONS

- Power backup
- Burst power support
- Storage device for energy harvesting
- Micro UPS power source
- Energy recovery

#### MARKING

The capacitors are marked (where possible) with the following information:

- Rated capacitance (in F)
- Rated voltage (in V)
- Date code, in accordance with IEC 60062
- · Code indicating factory of origin
- Logo of manufacturer
- Negative terminal identification
- Series number (230)

#### PACKAGING

Supplied loose in box, taped ammo, or in ESD trays.

RoHS COMPLIANT

### 230 EDLC-HV ENYCAP™

#### ELECTRICAL DATA

| SYMBOL         | DESCRIPTION                                      |
|----------------|--|
| C <sub>R</sub> | Rated capacitance, tolerance -20 % / +50 %       |
| I <sub>P</sub> | Max. peak current                                |
| ١L             | Max. leakage current after 0.5 h / 72 h at $U_R$ |

Note

- Unless otherwise specified, all electrical values in Table 2 apply at  $T_{amb}$  = 20 °C, P = 86 kPa to 106 kPa and RH = 45 % to 75 %

#### Notes

<sup>(1)</sup> U<sub>MT</sub> = rated voltage at 75 °C

<sup>(2)</sup>  $U_{CT}$  = rated voltage at upper category temperature

<sup>(3)</sup> Rated capacitance C<sub>R</sub> and maximum ESR<sub>DC</sub> are typical values for case sizes

#### Table 3

| Soldering                                     | Hand or wave soldering allowed. For details refer to soldering requirements for radial aluminum electroly capacitors in supplementary document.  |  |  |  |  |  |
| Cleaning                                      | For printed circuit board cleaning apply non-aggressive cleaning agents only.<br>For details refer to cleaning requirements for aluminum electrolytic capacitors in supplement   |  |  |  |  |  |
| Environmental conditions                      | Do not expose capacitors to<br>• temperatures outside specified range<br>• high humidity atmospheres<br>• corrosive atmospheres, e.g. halogenides, sulphurous or nitrous gases, acid or alkaline solutions, etc.<br>• environments containing oil and grease |  |  |  |  |  |

#### Notes

· General remark: temperatures to be measured at capacitor case

<sup>(1)</sup> Conditions: electrical measurements at 20 °C, unless otherwise specified

<sup>(2)</sup> Rated capacitance C<sub>R</sub> and ESR<sub>DC</sub>

### 230 EDLC-HV ENYCAP™

#### **MEASURING OF CHARACTERISTICS**

www.vishay.com

#### **CAPACITANCE (C)**

Capacitance shall be measured by constant current discharge method.

- Constant current charge with 10 mA/F to U<sub>B</sub>
- Constant voltage charge at U<sub>R</sub>
- Constant current discharge with 10 mA/F to 0.1 V

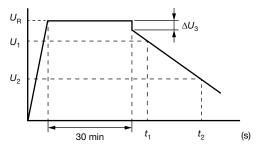

Fig. 4 - Voltage Diagram for Capacitance Measurement

Capacitance value C<sub>R</sub> is given by discharge current I<sub>D</sub>, time t and rated voltage U<sub>B</sub>, according to the following equation:

$$C_{R}[F] = \frac{I_{D}[A] x (t_{2}[s] - t_{1}[s])}{U_{1}[V] - U_{2}[V]}$$

- CR Rated capacitance, in F
- U<sub>R</sub> Rated voltage, in V
- U1 Starting voltage, 0.8 x U<sub>R</sub> in V
- U<sub>2</sub> Ending voltage, 0.4 x U<sub>R</sub> in V
- Voltage drop at internal resistance, in V  $\Delta U_3$
- Time from start of discharge until voltage U<sub>1</sub> is t1 reached, in s
- Time from start of discharge until voltage U<sub>2</sub> is t<sub>2</sub> reached, in s
- $I_D$ Absolute value of discharge current, in A

#### EQUIVALENT SERIES RESISTANCE (ESR<sub>DC</sub>)

- Constant current charge to U<sub>R</sub>
- Constant voltage charge at U<sub>B</sub>
- Constant current discharge to 0.1 V

$$\mathsf{ESR}_{\mathsf{DC}}\left[\Omega\right] = \frac{\Delta \mathsf{U}_{\mathsf{3}}\left[\mathsf{V}\right]}{\mathsf{I}_{\mathsf{D}}\left[\mathsf{A}\right]}$$

| ESR <sub>DC</sub> | Equivalent series resistance, in $\Omega$ |
|-------------------|---|
| $\Delta U_R$      | Voltage drop at internal resistance, in V |
| Iп                | Absolute value of discharge current, in A |

Absolute value of discharge current, in A

Statements about product lifetime are based on calculations and internal testing. They should only be interpreted as estimations. Also due to external factors, the lifetime in the field application may deviate from the calculated lifetime. In general, nothing stated herein shall be construed as a guarantee of durability.

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.
