

DESCRIPTION

The A4006 is a single lithium battery charge indicator chip, using CMOS process to achieve, small size and ease of installation of portable products.

The A4006 with built-in comparator and feedback loop, to materialize the detection of the four voltage point. By the internal trimming technology, you can ensure that the voltage detection accuracy of $\pm 1\%$. The output using OPENDRAIN structure, ease of customer use IO ports or LED indication.

The A4006 is available in SOT-26 package.
