

ROHS M HF 441 Series - 0603 High I2t Fuse

Description

This 100% Lead-free, RoHS compliant and Halogen-free fuse series has been designed specifically to provide over current protection to circuits that see high working ambient temperatures (up to 150°C) and high inrush currents.

The general design ensures excellent temperature stability and performance reliability.

This high I2t fuse series is designed to have ultra high inrush current withstand capability to avoid nuisance fuse open.

- 1. DC Interrupting Rating tested at rated voltage with time constant < 0.8 msecs.
- 2. Nominal Resistance measured with < 10% rated current.
- 3. Nominal Melting I²t measured at 1 msec. opening time.
- 4. Nominal Voltage Drop measured at rated current after temperature has stabilized.

Devices designed to carry out rated current for 4 hours minimum. It is recommended that devices be operated continuously at no more than 80% rated current. See "Temperature Rerating Curve" for additional rerating information.

Devices designed to be mounted with marking code facing up.

Temperature Rerating Curve

Note

 Rerating depicted in this curve is in addition to the standard rerating of 20% for continuous operation.

For continuous operation at 75 degrees celsius, the fuse should be rerated as follows: $I = (0.80)(0.85)I_{\rm RAT} = (0.68)I_{\rm RAT}$
