

AAT2077B2 Preliminary Data Sheet

75Ω Digital Attenuator 2-Bit 21 dB DC~1200 MHz

1. Product Overview

1.1 General Description

The AAT2077B2 is a GaAs MMIC two bit positive control digital attenuator. The device operates from DC to 1200 MHz with a control and supply voltage of +3 V or +5 V. The AAT2077B2 has LSB of 7 dB and a total attenuation of 21dB. The AAT2077B2 is composed of two cascade fixed attenuators. The states of attenuator are controlled by the logic level voltage. The attenuator bit values are 7 dB (LSB), 14 dB for a total attenuation of 21 dB. Attenuation accuracy is $\pm(0.5 \text{ dB} + 10 \% \text{ of attenuation setting})$ @ DC~1200 MHz.
