

600mA Low Dropout Linear Regulator

Description

The FP6131 series are low dropout, positive linear regulators with very low quiescent current. The FP6131 can supply 600mA output current with a low dropout voltage at about 600mV.

The FP6131 regulator is able to operate with output capacitors as small as 1 μ F for stability. The FP6131 also offers on chip thermal shutdown feature to provide protection against overload or any condition when the ambient temperature exceeds the junction temperature.

The FP6131 series are available in fixed output voltage ranging from 1.2V to 4.5V with 0.1V interval.

The FP6131 series are available in low-profile, space-saving 3-lead SOT-23 and SOT-89 packages.

Features

- Low Dropout Voltage of 600mV at 600mA
- Guaranteed 600mA Output Current
- Very Low Quiescent Current at about 30 μ A
- $\pm 2\%$ Output Voltage Accuracy for 1.2~4.5V
- Needs Only 1 μ F Capacitor for Stability
- Thermal Shutdown Protection
- Current Limit Protection
- Low-ESR Ceramic Capacitor for Output Stability.
- Tiny SOT-23 and SOT-89 packages
- RoHS Compliant

Applications

- DVD/CD-ROM, CD/RW
- Wireless Device
- LCD Module
- Battery Power System
- Card Reader
- XDSL Router

Note 2 : To prevent oscillation, it is recommended to use minimum 1μF X7R or X5R dielectric capacitors if ceramics are used as input/output capacitors.

Functional Pin Description

Pin Name	Pin Function
VIN	Power is supplied to this device from this pin which requires an input filter capacitor. In general, the input capacitor in the range of 1μF to 10μF is sufficient.
VOUT	The output supplies power to loads. The output capacitor is required to prevent output voltage unstable. The FP6131 is stable with an output capacitor which is 1μF or greater. The larger output capacitor will be required for application with large transit load to limit peak voltage transits. Besides, it could reduce output noise, improve stability and PSRR.
GND	Common ground pin

Application Information

The FP6131 series are low dropout linear regulators that could provide 300mA output current at dropout voltage about 300mV. Besides, current limit and on chip thermal shutdown features provide protection against overload or any condition when the ambient temperature exceeds the junction temperature.

Output and Input Capacitor

The FP6131 regulator is designed to be stable with wide range of output capacitors. The ESR of the output capacitor affects stability. Larger value of the output capacitor decreases the peak deviations and improves transition response for larger current changes.

The capacitor types (aluminum, ceramic, and tantalum) have different characterizations such as temperature and voltage coefficients. All ceramic capacitors are manufactured with a variety of dielectrics, each with different behavior across temperature and applications. Common dielectrics used are X5R, X7R and Y5V. It is recommended to use 1 μ F to 10 μ F X5R or X7R dielectric ceramic capacitors with 30m Ω to 50m Ω ESR range between device outputs to ground for transient stability. The FP6131 is designed to be stable with low ESR ceramic capacitors and higher values of capacitors, and ESR could improve output stability.

So the ESR of output capacitor is very important because it generates a zero to provide phase lead for loop stability.

There are no requirements for the ESR on the input capacitor, but its voltage and temperature coefficient have to be considered for device application environment.

Protection Feature

In order to prevent overloading or thermal condition from damaging the device, FP6131 regulator has internal thermal and current limit functions designed to protect the device. It will rapidly shut off PMOS pass element during over temperature condition.

Thermal Consideration

The power handling capability of the device will be limited by allowable operation junction temperature (125°C). The power dissipated by the device will be estimated by $P_D = I_{OUT} \times (V_{IN} - V_{OUT})$. The power dissipation should be lower than the maximum power dissipation listed in "Absolute Maximum Ratings" section.
