## N300 PoE Wireless Access Point, Ceiling Mount, Controller Managed

The LevelOne WAP-6111/-6111H is a high performance wireless access point designed for mounting on a ceiling. Featuring PoE, the clever and stylish AP includes embedded antennas allowing for a high position, low-profile deployment without sacrificing wireless performance. WAP-6111/-6111H can be configured in Fat AP mode or, when used in Fit mode, allows central management by the wireless controllers designed by LevelOne technologies. A captive portal provides one convenient location for authentication of WEP, WPA-PSK, WPA-TKIP, WPA2 AES for secure authentication. The device supports up to four SSIDs allowing the user to assign different configuration settings to each one, which will ensure the safety of each SSID in different service zones.
