

Si APD

S9717 series

High reliability, surface-mount ceramic package

S9717 series are Si APD (avalanche photodiodes) encapsulated in a surface-mount ceramic package that ensures high reliability in the same wide operating temperature range (-20 to +85 °C) as metal package devices. S9717 series also allows downsizing of equipment in various photometric application fields.

Features

- Surface-mount package with high reliability equivalent to metal package
(No dark current increase after high temperature/humidity testing at 85 °C, 85 % for 1000 hours.)
- Small, thin package: 3.5 × 4.0 mm
- S9717-02K/-05K: Flat glass window
S9717-05L: Lens glass window

Applications

- Rangefinder
- Laser rader
- Spatial light transmission
