## Size

Detail Size Information [Please refer to the catalog](#)

## Electrical Characteristics

|                                                        |         |
|--------------------------------------------------------|---------|
| Maximum Operating Voltage [DC]                         | 460V    |
| Maximum Operating Voltage [AC]                         | 350Vrms |
| Nominal DischargeCurrent In [8/20μs, 15times]          | 1.5kA   |
| Maximum Surge Current I <sub>max</sub> [8/20μs, 1time] | 2.5kA   |
| Energy Absorption                                      | 45J     |
| Capacitance (Typ.)                                     | 160pF   |

## Other

|                             |                                                                                         |
|-----------------------------|-----------------------------------------------------------------------------------------|
| Operating Temperature Range | <a href="#">Please refer to the catalog</a>                                             |
| Soldering Method            | <a href="#">Please refer to the document (Soldering Instructions)</a>                   |
| Safety Standard             | <a href="#">Please refer to the document (Approvals)</a>                                |
| AEC-Q200                    |                                                                                         |
| Packing Information         | <a href="#">Please refer to the document (Taping, Packaging and Lead Configuration)</a> |
