

LOW CAPACITANCE MINIATURE TVS ARRAY**DFN-2 PACKAGE****DESCRIPTION**

The P5V0S1ULC is a transient voltage suppressor array (TVS) designed to protect applications such as wireless telecommunication devices and portable electronics. The P5V0S1ULC is available in a bidirectional configuration with a working voltage of 5.0V and a minimum breakdown voltage of 6.0V. This device is rated for 110 Watt peak pulse power using the 8/20 μ s waveform, which is sufficient protection for tertiary type lightning threats at key interface locations.

The P5V0S1ULC is also suited to protect data lines against ESD and EFT. This device meets the IEC 61000-4-2 and IEC 61000-4 requirements. At higher operating frequencies or faster edge rates, insertion loss and signal integrity are a major concern. This device in conjunction with passive components integrated into a TVS/filter network can be used for EMI/RFI protection.
