Resistive load life at different voltages

- Note:
- 1、The rated electrical life is based on resistance load test. The load max inductance≤300 μ H; If used with inductive load, please do contact the factory first.
 - 2、The above curve is drawn according to the test and infer data. Suggest users confirm in practical use.
 - 3、When the product' s Dielectric withstand voltage、insulation resistance is less than the product parameters in the table, the product is defined as a life to an end.
 - 4、Product max pick-up current is 650A to avoid contact cold welding.
