Thin-Fin™ Heat Sinks

For computers and custom applications

LOW PROFILE COPPER HEAT SINKS IDEAL FOR PCI AND AGP CHIP SETS

When space is at a premium, Aavid's Thin-fin heat sinks reduce package case temperature by as much as 20°C. These flexible, copper spreaders attach to the electronic package using pre-applied adhesive, providing an off-the-shelf solution for PCI and AGP chip sets. A laminated dielectric coating prevents shorting, making the Thin-Fin ideal for BGA devices and multimedia applications.

FEATURES:

- Offer significant cooling with limited headroom
- Pre-applied adhesive for rapid assembly
- Dielectric coating prevents shorting
- Fits many IC package styles

APPLICATIONS:

- Graphics Processors
- FPGA's
- Embedded Processors
- DSP's
- Any device using a BGA, PGA, or a QFP package
