FRS-R-9

Class RK5, Dual-element, Time Delay

Product Information Product Type: Fuse Product Family: Electrical Power Brand: Cooper Bussmann Sub-brand: Fusetron Class: RK5

Rec. Fuse Block: Rec. Cover: SAMI-2 series

Physical Properties

Dimensions: $5in.(L) \times 0.81in.(W) \times 0in.$ (H)

Certifications

UL Listed

CSA Certified

| Electrical Properties | | | | |
|--------------------------|------------------|--|--|--|
| Maximum AC Voltage: | 600 | | | |
| Maximum DC Voltage: | 300 | | | |
| Amperage Rating: | 9 | | | |
| AC Interrupting Ratings: | • 200000 at 600V | | | |
| DC Interrupting Ratings: | • 20000 at 300V | | | |
| Fuse Class: | Class RK5 | | | |
| Time Delay: | Yes | | | |

Fusetron® Dual-Element, Time-Delay Fuses Class RK5 – 600 Volt

FRS-R 1/10-60A

Dimensional Data

Catalog Symbol: FRS-R

Dual-Element, Time-Delay - 10 second (minimum) at 500%

rated current Current-Limiting

Ampere Rating: 1/10 to 60A Voltage Rating: 600Vac (or less)

Interrupting Rating: 200,000A RMS Sym.

dc Ratings (20,000AIC @ 250Vdc)

Agency Information:

UL Listed, Std. 248-12, Class RK5, Guide JDDZ, File E4273 CSA Certified, C22.2 No. 248.12, Class 1422-02, File 53787

Carton Quantity and Weight

| Ampere | Carton | Weight* | |
|---------------------|--------|---------|-------|
| Ratings | Qty. | Lbs. | Kg. |
| ½ ₁₀ –15 | 10 | 0.40 | 0.181 |
| 17.5–30 | 10 | 0.50 | 0.277 |
| 35-60 | 10 | 3.10 | 1.406 |

^{*}Weight per carton.

General Information:

- Provides motor overload, ground fault and short-circuit protection. When used in circuits subject to surge currents such as those caused by motors, transformers and other inductive components, these fuses can be sized close to full-load amperes to give maximum overcurrent protection.
- Permits the use of smaller and less costly switches. The timedelay feature makes it possible to use fuse ampere ratings which are much smaller than those of non-time-delay fuses. Considerable cost saving occurs by permitting the use of smaller size switches, panels and fuses themselves.
- Provides a higher degree of short-circuit protection (greater current-limitation) in circuits in which surge currents or temporary overloads occur.
- · Helps protect motors against burnout from overloads.
- Gives motor running back-up protection to motors without extra costs.
- Helps protect motors against burnout from single phasing on three phase systems.
- Simplifies and improves blackout prevention (selective coordination).
- Dual-element fuses can be applied in circuits subject to temporary motor overloads and surge currents to provide both high-performance, short-circuit and overload protection.
- The overload element provides protection against low level overcurrent of overloads and will hold an overload which is five times greater than the ampere rating of the fuse for a minimum of ten seconds.

Fuse Reducers For Class R Fuses

| Equipment Fuse Clips | Desired Fuse (Case) Size | Catalog Number (Pairs) 600V |
|-------------------------|--------------------------------|-----------------------------------|
| 60A | 30A | No. 663-R |
| 100A — | 30A | No. 216-R |
| 100A — | 60A | No. 616-R |
| 200A | 60A | No. 626-R |
