

Applications

- High Performance Supertrunking Links
- High Power Distribution Networks
- Redundant Ring Architectures
- FTTx Networks
- Fiber Deep Architectures

Features

- Full Function Fiber Optic Amplifier Ready for Integration
- Low Noise Figure (Typ ≤ 6.0 dB)
- Pin: -10 dBm to $+12$ dBm
- Pout: $+27$ dBm to $+37$ dBm
- Standard RS-232 Communication
- Low Electrical Power Consumption
- Input/Output Isolation $\geq 40/40$ dB
- Polarization Dependant Gain (PDG) ≤ 0.1 dB
- Polarization Mode Dispersion (PMD) ≤ 0.5 ps
- Input & Output Return Losses ≤ -40 dB
- Wavelength: 1545 nm to 1562 nm

MAFA 3000 Series Erbium Doped Fiber Micro Amplifier

EMCORE's MAFA 3000 Series Erbium Doped Fiber Amplifier (EDFA) Gain Block Module is an ideal building block for OEM system integrators. The family of MAFA 3000 EDFA Gain Blocks is designed to meet the most demanding noise performance requirements of special and CATV applications, and performs all the functions required of a high power optical amplifier for system integration.

MAFA 3000 series EDFA Gain Blocks provide optical isolation on the input and output of the gain block for stable, low noise operation. The input and output optical signal power levels are detected for monitoring and control. The input optical signal is amplified with active gain control for a constant output power level or with active output power control for constant gain mode operation.

The MAFA 3000 series EDFA Gain Blocks also provide monitors and associated alarms for all vital characteristics. The optical output of the MAFA 3000 series EDFA Gain Blocks can be split into multiple ports by an optional external splitter. Small mechanical footprint allows using this unit in very tight space environments.

Notes:

1. Unless stated otherwise, all specifications apply over the full operating temperature and humidity ranges
2. Depending on the fiber optic patchcord interface the measured value can vary up to 0.5 dB from the actual value.
3. Measured with input optical signal with Pin \approx 0 dBm and $\lambda \approx$ 1550 nm @ 25°C. May vary for some models.
4. Measured with a swept Probe Signal (Pp), where Pp \approx 0 dBm @ 25°C. May vary for some models.
5. Measured with a swept Probe Signal (Pp), and a fixed Tone Signal (Pt) @ \sim 1550 nm; (Pt \approx Pp+20 dB; Pt + Pp \approx 0 dBm) @ 25°C
6. Over polarization and specified temperature range.
7. Premium version – MAFA (with cooled pumps).
Economy version – MAFA (with uncooled pumps).

General and Mechanical Specifications

Property	Requirement	Comments
Operating Wavelength	1545 nm ~ 1562 nm	Standard
Operating Case Temperature	-40°C to 75°C -10°C to 65°C	Premium Economy
Storage Temperature	-40°C to 85°C	
Operating Humidity	20% to 85%	Non-condensing
Voltage Supply Range	+5.0V +/-5%	All versions
	+24V +/-5%	All versions (efficiency: 75% for MAFA 3030; 90% for MAFA 3037)
Optical Connectors	SC/APC; FC/APC; E2000/APC	User Specified (for MAFA 3032, MAFA 3033, MAFA 3035 and MAFA 3037, if used separately, only special high power patchcord is absolutely recommended)
Dimensions (in)	9.5"W x 6.7"D x 1.5"H	MAFA 3030 to MAFA 3037 Unit height depends on heatsink used
