

125W Quad Output Switching Power Supply

RQ-125 series

Features:

- Protections: Short circuit / Overload / Over voltage
- Cooling by free air convection
- LED indicator for power on
- 100% full load burn-in test
- All using 105℃ long life electrolytic capacitors
- Withstand 300VAC surge input for 5 second
- Withstand 5G vibration test
- High efficiency, long life and high reliability
- 3 years warranty

NOTE	Ripple & noise are measured Tolerance : includes set up Line regulation is measured Load regulation is measured Each output can work within The power supply is consid EMC directives.	pecially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. assured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor. tet up tolerance, line regulation and load regulation. sured from low line to high line at rated load. assured from 20% to 100% rated load, and other output at 60% rated load. within current range. But total output power can't exceed rated output power. considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets is measured at cold first start. Turning ON/OFF the power supply very quickly may lead to increase of the set up time.
