## CERAMIC RESONATOR Data Sheet

PRODUCT 产品: CERAMIC RESONATOR

MODEL NO 型 号: ZTA···MG

PREPARED编制: Fengyu

CHECKED 审 核: York

APPROVED 批 准: Lijiating

DATE 日期: 2008-01-25

#### 1 SCOPE

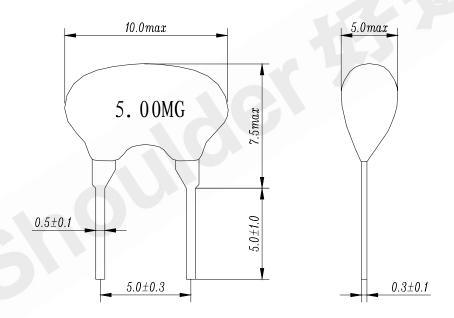

This specification shall cover the characteristics of the ceramic resonator 1.84–6.00MHZ.

#### 2 PART NO.

| PART NUMBER | CUSTOMER PART NO | SPECIFICATION NO |
|-------------|------------------|------------------|
| ZTA···MG    |                  |                  |

#### 3. OUTLINE DIMENSIONS AND MARK

- 3.1 Appearance: No visible damage and dirt.
- 3.2 Construction: Leads are soldered on electrode and body is molded by resin.
- 3.3 The products conform to the RoHS directive and national environment protection law.
- 3.4 Dimensions and mark

#### 4. ELECTRICAL SPECIFICATIONS

#### 4.1 RATING

| Items                                       | Requirement     |  |
|---|-----------------|--|
| Withstanding Voltage (V)                    | 50 (DC, 1min)   |  |
| Insulation Resistance Ri, $(M \Omega)$ min. | 100 (10V, 1min) |  |
| Operating temperature                       | -25°C∼85°C      |  |
| Storage temperature                         | -55°C∼+85°C     |  |
| Rating Voltage UR (V)                       | 6V DC           |  |
| Rating voltage UK (V)                       | 15V p-p         |  |

#### 4.2 ELECTRICAL SPECIFICATIONS

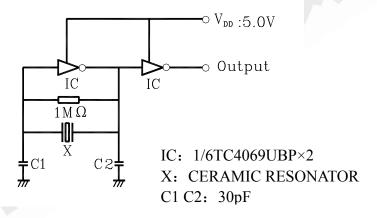

| Items                                  | Requirement                             |  |
|--|---|--|
| Oscillation Frequency Fosc (MHz)       | 1.84-6.00                               |  |
| Frequency Accuracy (%)                 | ±0.5                                    |  |
| Resonant Impedance Ro $(\Omega)$ max.  | 80                                      |  |
| Temperature Coefficient of Oscillation | $\pm 0.3$ (Oscillation Frequency drift, |  |
| Frequency (%) max.                     | -25°C∼+85°C)                            |  |
| Aging Rate (%) max.                    | $\pm 0.3$ (For Ten Years)               |  |

#### 5. TEST

#### 5.1 Test Conditions

Parts shall be tested under the condition (Temp.:  $20\pm15^{\circ}$ C,Humidity:  $65\pm20\%$  R.H.) unless the standard condition(Temp.:  $25\pm2^{\circ}$ C,Humidity:  $65\pm5\%$  R.H.) is regulated to measure.

#### 5.2 Test Circuit

#### 6 PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

| No. | Item                            | Condition of Test   | Performance<br>Requirement |
|-----|---------------------------------|---|----------------------------|
| 6.1 | Humidity                        | Subject the resonator at $40\pm2^{\circ}$ C and 90%-95% R.H. for 500h, resonator shall be measured after being placed in natural conditions for 1h. | It shall fulfill Table 1.  |
| 6.2 | High<br>Temperature<br>Exposure | Subject the resonator to $85 \pm 2$ °C for 500h, resonator shall be measured after being placed in natural conditions for 1h.                       | It shall fulfill Table 1.  |
| 6.3 | Low<br>Temperature<br>Exposure  | Subject the resonator to $-25 \pm 2$ °C for 500h, resonator shall be measured after being placed in natural conditions for 1h.                      | It shall fulfill Table 1.  |
| 6.4 | Temperature<br>Cycling          | After temperature cycling of blow table was performed 5 times, resonator shall be measured after being placed in natural conditions for 1h.         | It shall fulfill Table 1.  |

|       |                                    | Temperature   | Time                     |   |
|-------|------------------------------------|---|--------------------------|---|
|       |                                    | -25±3°C   | $30\pm3 \text{ min}$     |   |
|       |                                    | 85±3℃   | $30\pm3 \text{ min}$     |   |
|       |                                    |   | vibration for 2h.Each in |   |
|       | T71 (*                             | x y and z axis with the amplitude of 1.5mm, The   |                          | It shall fulfill Table  |
| 6.5   | Vibration                          | frequency shall be varied uniformly between the limits of 10Hz-55Hz-10Hz and then resonator   |                          | 1.  |
|       |                                    | shall be measured.  |                          |   |
|       | Mechanical                         | Resonator shall be m  | easured after 3 times    | No visible damage   |
| 6.6   | Shock                              | random dropping from the height of 1m on  |                          | and it shall fulfill  |
| SHOCK |                                    | concrete floor.   |                          | Table 1.  |
| 6.7   | Resistance<br>to Soldering<br>Heat | Lead terminals are immersed up to 2 mm from resonator's body in soldering bath of $260^{\circ}\text{C} \pm 5$ °C for $10\text{s} \pm 1\text{s}$ and then resonator shall be measured after being placed in natural conditions for 1h. |                          | It shall fulfill Table 1.   |
| 6.8   | Solderability                      | Lead terminals are immresonator's body in sold °C for 3s±0.5s.  |                          | More than 95% of the terminal surface of the filter shall be covered with fresh solder. |

## 6. ENVIRONMENTAL TEST

| No.                   | Item  | Condition of Test  | Performance<br>Requirements                     |
|-----------------------|---|--|---|
| 6.9<br>6.9.1<br>6.9.2 | Terminal Strength Terminal Pulling Terminal Bending | Force of 5N is applied to each lead in axial direction for 10s±1s.  When force of 5N is applied to each lead in axial direction, the lead shall folded up 90 ° from the axial direction and folded back to the axial direction. The speed of folding shall be each 3s. | No visible damage and it shall fulfill Table 1. |

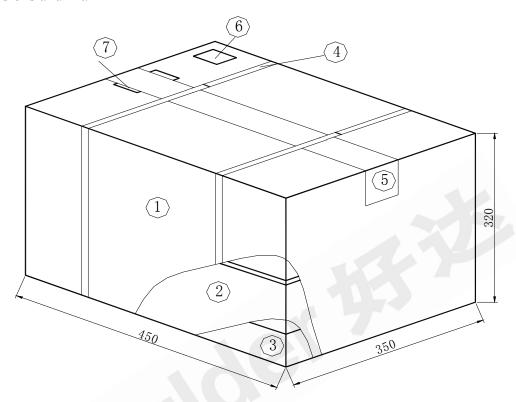

## Table 1

| Item  | Specification after test |  |
|---|--------------------------|--|
| Oscillation Frequency Change  Δ fosc/fosc (%) max.                        | ±0.3                     |  |
| Resonant Impedance Ro (Ω) max.  | 80                       |  |
| The limits in the above table are referenced to the initial measurements. |                          |  |

#### 7. PACKAGE

To protect the products in storage and transportation, it is necessary to pack them (outer and inner package) .On paper pack, the following requirements are requested.

#### 7.1 Dimensions and Mark

| NO. | Name                    | Quantity |
|-----|-------------------------|----------|
| 1   | Package                 | 1        |
| 2   | Box                     | 2        |
| 3   | Inner Box               | 40       |
| 4   | Belt                    | 2.9 m    |
| 5   | Adhesive tape           | 1.2 m    |
| 6   | Label                   | 1        |
| 7   | Certificate of approval | 1        |

#### 7.2 Section of Package

Package is made of corrugated paper with thickness of 0.8cm.Package has 2 boxes, each has 20 inner boxes.

#### 7.3 Quantity of Package

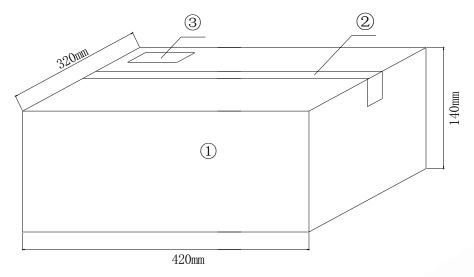

Per plastic bag
Per inner box

Per package

500 pieces
3 plastic bag
40 inner boxes

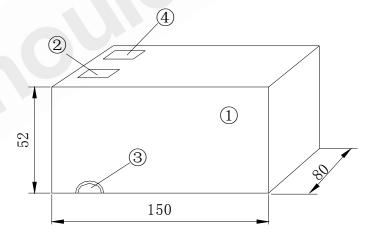

(60000 pieces of piezoelectric ceramic part )

#### 7.4 Inner Package

| NO. | Name          | Quantity |
|-----|---------------|----------|
| 1   | Inner package | 1        |
| 2   | Adhesive tape | 1.2 m    |
| 3   | Label         | 1        |

### 7.5 Inner Box Dimensions

| NO. | Name       | Quantity |
|-----|------------|----------|
| 1   | Inner Box  | 1        |
| 2   | RoHS Label | 1        |
| 3   | QC Label   | 1        |
| 4   | Label      | 1        |

#### 8. EIAJ Monthly Code

| 2005 / 2007 / 2009 |      | 2006 / 2008 / 2010 |      |
|--------------------|------|--------------------|------|
| MONTH              | CODE | MONTH              | CODE |
| JAN                | A    | JAN                | N    |
| FEB                | В    | FEB                | P    |
| MAR                | С    | MAR                | Q    |
| APR                | D    | APR                | R    |
| MAY                | E    | MAY                | S    |
| JUN                | F    | JUN                | T    |
| JUL                | G    | JUL                | U    |
| AUG                | Н    | AUG                | V    |
| SEP                | J    | SEP                | W    |
| OCT                | K    | OCT                | X    |
| NOV                | L    | NOV                | Y    |
| DEC                | M    | DEC                | Z    |

#### 9. OTHER

- 9.1 Caution
- 9.1.1 Don't apply excess mechanical stress to the component and terminals at soldering. Do not use this product with bend.
- 9.1.2 Do not clean or wash the component for it is not hermetically sealed.
- 9.1.3 Do not use strong acidity flux, more than 0.2wt% chlorine content, in flow soldering.
- 9.1.4 Don't be close to fire.
- 9.1.5 All kinds of re-flow soldering must not be applied on the component.
- 9.1.6 This specification mentions the quality of the component as a single unit. Please insure the component is thoroughly evaluated in your application circuit
- 9.1.7 Expire date (Shelf life) of the products is 12 months after delivery under the conditions of a sealed and an unopened package. Please use the products within six months after delivery. If you store the products for a long time (more than six months), use carefully because the products may be degraded in the solderability or rusty. Please confirm solderability and characteristics for the products regularly.
- 9.1.8 Please contact us before using the product as automobile electronic component.
- 9.2 Notice
- 9.2.1 Please return one of this specification after your signature of acceptance.
- 9.2.2 When something gets doubtful with this specifications, we shall jointly work to get an agreement.
