

Half-pitch (1.27mm) Interface Connector

DF02 Series

CONNECTOR

MB-0276-4

April 2015

RoHS Compliant

Receptacle

Plug

**Outline**

The DF02 Series is an interface connector compatible with the half-pitch (1.27mm) which is used as a standard in the industrial instrument market. The DF02 Series realizes light weight by using a resin-made hood and also has sufficient measures against EMI shielding with Ni plating.

Furthermore, it has a superior operability by using a one-touch lock method.

<Application>

FA equipment, semiconductor manufacturing equipment, communication devices, measuring instrument, broadcasting equipment, and others.

Features**<Receptacle>**

- Dual use specifications with one-touch lock and screw-lock.
- Structure that prevents short circuit by foreign substances by attaching a cover to the terminals.
- Improved resistance against twisting with a hook integrated with the shell.

<Plug>

- Miniaturization, weight and cost saving realized by using resin for hood material. Also it has sufficient measures against EMI shielding with Ni plating.
- Excellent workability with two-unit structure hood and superior reparability with latch lock method.
- Available in IDC type (28AWG to 30AWG) for labor-saving in termination works.
- Realizes to shorten working time with a structure that enables streamlining of the harness assembly processes such as the screw fixing work.

General Specifications

Specification	
Rated Current	0.5A / 1pos.
Rated Voltage	AC250Vr.m.s
Contact Resistance	35m Ω max. (initial) Variance ± 25 m Ω max. (after test)
Insulation Resistance	Individual connector 100M Ω min. (initial) 10M Ω min. (after test)
Dielectric Withstanding Voltage	Individual connector AC500Vr.m.s (initial) AC300Vr.m.s (after test)
Operating Temperature	-20 Deg. C to +80 Deg. C

Line-up

Item	Line-up	
	Receptacle	Plug
Pin Count Variation	14pos., 20 pos., 26 pos., 36 pos., 50 pos.,	14pos., 20 pos., 26 pos., 36 pos., 50 pos., 68pos.,
Termination Variation	Through-hole	Soldering (22AWG to 30AWG) IDC (28AWG, 30AWG)

Materials and Finishes

Product		Part	Materials /Finishes

Technical Documents

	Technical Document No. (Contents of Documents)
Specification	JACS-30303
Handling Instruction	JAHL-30303

Notice:

1. The values specified in this brochure are only for reference. The products and their specifications are subject to change without notice. Contact our sales staff for further information before considering or ordering any of our products. For purchase, a product specification must be agreed upon.

2. Users are requested to provide protection circuits and redundancy circuits to ensure safety of the equipment, and sufficiently review the suitability of JAE's products to the equipment.

3. The products presented in this brochure are designed for the uses recommended below. We strongly suggest you contact our sales staff when considering use of any of the products in any other way than the recommended applications or for a specific use that requires an extremely high reliability.

(1) Applications that require consultation:

(i) Please contact us if you are considering use involving a quality assurance program that you specify or that is peculiar to the industry, such as:

Automotive electrical components, train control, telecommunications devices (mainline), traffic light control, electric power, combustion control, fire prevention or security systems, disaster prevention equipment, etc.

(ii) We may separately give you our support with a quality assurance program that you specify, when you think of a use such as :

Aviation or space equipment, submarine repeaters, nuclear power control systems, medical equipment for life support, etc.

(2) Recommended applications include:

Computers, office appliances, telecommunications devices (terminals, mobile units), measuring equipment, audiovisual equipment, home electric appliances, factory automation equipment, etc

Japan Aviation Electronics Industry, Limited
