

M61520FP

6ch Electronic Volume with Tone Control

REJ03F0057-0100Z

Rev.1.0

Sep.19.2003

Features

Function names	Features
Volume	Six independent high-performance independent volumes on-chip (0 to 87 dB in 1 dB steps, $-\infty$)
Input selector	L/R ch: 6 inputs with muting and attenuation
REC output	Two-channel record output (one channel includes a mute switch)
Gain control	Input gain control for FL, FR, C, SL, SR, and SW channels (0/3.6 dB) Record-input gain control (+1/+3/+4.6/+6.6 dB) Output gain control for SL, SR and C channels (0/+6 dB) Output gain control for the SW channel (+6/+10 dB) Output gain control for FL and FR channels (0/+2/+6.5/+10.5 dB) *1 Microphone-mix gain control (0/-2/+6.5/+10.5 dB) *1
Bass boost	On-chip bass-boost circuits for the FL and FR channels
Balanced output	Internal balanced outputs for the ADC

Note: 1 The microphone mix gain is coupled with output gain control for the FL and FR channels.

Application

Mini-component systems, TVs, etc.

Recommended Operating Conditions

Analog power-supply voltage range: 8.0 V to 10.0 V

Digital power-supply voltage range: 3.0 V to 5.5 V

System Block Diagram

Block Diagram with Pin Connections

Absolute Maximum Ratings

Parameter	Symbol	Ratings	Unit	Conditions
Max. power-supply voltage	AVCC	10.5	V	
	DVDD	6.5	V	
Internal power dissipation	Pd	1.4	W	
Ambient operating temperature	T _{opr}	-20 to +75	°C	
Storage temperature	T _{stg}	-40 to +125	°C	

Recommended Operating Condition

Item	Symbol	Limits			Unit	Condition
		Min.	Typ.	Max.		
Power-supply voltage	AVCC	8.0	9.0	10.0	V	
	DVDD	3.0	5.0	5.5	V	
Input voltage (L level)	V _{IL}	0.0	—	0.8	V	Pins 15, 16, and 17
Input voltage (H level)	V _{IH}	2.0	—	V _{DD}	V	Pins 15, 16, and 17

Electrical characteristics

Unless otherwise noted, T_a = 25°C, AVCC = 9.0 V, DVDD = 5.0 V, f = 1 kHz, and bass boosting is switched off.

(1) Power-supply characteristics

Item	Symbol	Limits			Unit	Condition
		Min.	Typ.	Max.		
Analog power-supply circuit current	A _{ICC}	—	20	40	mA	Current on pin 73 when AVCC = 5 V, with no signal
Digital power-supply circuit current	D _I dd	—	0.8	1.5	mA	Current on pin 24 when DVDD = 5 V, with no signal

(2) Input/output characteristics

Item	Symbol	Limits			Unit	Condition	
		Min.	Typ.	Max.			
Input impedance	Rin	30	60	90	KΩ	66pin, 74pin	
Input-selector max. input voltage	Vin	1.8	2.2	—	Vrms	66pin, 74pin	
FL, FR OUT max. output voltage	Vom	1.8	2.2	—	Vrms	Input on pins 8 and 9, output on pins 46 and 53, RL = 10 kΩ, THD = 1%, bass boost = on, fin = 80 Hz	
REC OUT max. output voltage	Vomrec	1.8	2.2	—	Vrms	Input on pins 2 and 3, output on pins 62 and 64, RL = 10 kΩ, THD = 1%, fin = 1 kHz	
C, SL, SR, SW max. output voltage	Vomvol	1.8	2.2	—	Vrms	Input on pins 10 and 11, output on pins 36 and 40. RL = 10 kΩ, THD = 1%, fin = 1 kHz, gain = 6 dB	
Bypass gain 1	Gv1	—	-8.0	—	dB	Gain from pins 4 to 74 and pins 6 to 66.	
Bypass gain 2	Gv2	—	0	—	dB	Gain from pins 8 to 53 and pins 9 to 46.	
Max. attenuation	ATT	-87	-92	—	dB	Vo = 1 Vrms, on pins 40 and 36, JIS-A filter	
ADOUT output noise voltage	Vadno	—	4.0	12.0	μVrms	JIS-A filter, when no signal is present, RG = 10 kΩ, on pins 4 and 6, "normal function" settings	
RECOUT output noise voltage	Vrecno	—	7.0	15.0	μVrms	JIS-A filter, when no signal is present, RG = 10 kΩ, on pins 62 and 64, "normal function" settings	
FL, FROUT output noise voltage	Vono1	—	7.0	15.0	μVrms	JIS-A filter, when no signal is present, Rg = 10 kΩ, volume setting: 0 dB, "normal function" settings	46, 53pin
C, SL, SRVOLOUT output noise voltage	Vvolno1	—	6.0	12.0	μVrms		40, 36pin
SW VOLOUT output noise voltage	Vvolwno1	—	12.0	24.0	μVrms		28pin
FL, FROUT output noise voltage	Vono2	—	5.0	10.0	μVrms	JIS-A filter, when no signal is present, Rg = 10 kΩ, volume setting: ∞ dB, "normal function" setting	46, 53pin
C, SL, SRVOLOUT output noise voltage	Vvolno2	—	4.0	8.0	μVrms		40, 36pin
SW VOLOUT output noise voltage	Vvolwno2	—	8.0	16.0	μVrms		28pin
Distortion on FL, FROUT	THD	—	0.01	0.05	%	On pins 46 and 53, BW = 400 to 30 kHz, Vo = 300 mVrms, RL = 30 kΩ	
Distortion on REC OUT	THDrec	—	0.01	0.05	%	On pins 62 and 64, BW = 400 to 30 kHz, Vo = 300 mVrms, RL = 51 kΩ	
Distortion on C, SL, SR, SWVOLOUT	THDvol	—	0.01	0.05	%	On pins 40 and 36, BW = 400 to 30 kHz, Vo = 300 mVrms, RL = 30 kΩ	
Crosstalk between channels	CT	—	-70	-55	dB	Vo = 0.5 Vrms, RL = 10 kΩ, JIS-A, Rg = 10 kΩ, between pins 46 and 53	
	CTrec	—	-70	-55	dB	Vo = 0.5 Vrms, RL = 30 kΩ, JIS-A, Rg = 10 kΩ, between pins 62 and 64	

Normal function settings:

- Input attenuator: -8 dB
- REC input gain amp: +1 dB
- FL, FR, C, SL, SR, SW input gain amp: 0 dB
- SL, SR, C output gain amp: 0 dB
- SW output gain amp: +6 dB

Specification of Control Data

Data is fetched on rising edges of SCK; after 16 bits have been fetched, they are internally latched on the rising edge of REQ.

	D0	D1	D2	D3	D4	D5	D6	D7	D8	D9	D10	D11	D12	D13	D14	D15

Control-Data Timing

Name	Symbol	Min.	Typ.	Max.	Unit
Time for signal to rise	t1	—	—	0.3	μs
Time for signal to fall	t2	—	—	0.3	μs
SCK clock width	t3	1	—	—	μs
SCK high pulse width	t4	0.4	—	—	μs
SCK low pulse width	t5	0.4	—	—	μs
DATA setup time	t6	0.4	—	—	μs
DATA hold time	t7	0.4	—	—	μs
REQ rise hold time	t8	0.8	—	—	μs
REQ high pulse width	t9	0.4	—	—	μs
SCK setup time	t10	0.4	—	—	μs

The IC incorporates a selector for either of two six-input channels and a mute switch. An input level for the selected input is chosen from among -4.4, -8, -9.4, -11.6, -13, and -16.6 dB.

The REC signal is mixed with the MIC signal and then output. The gain of the signal for mixing with the MIC signal is selected from among +1 dB, +3, +4.6, +6.6 dB. The REC OUT2 side includes a mute switch.

(3) Microphone mixing

In the microphone-input circuit, the input signal is passed through an op-amp buffer to prevent crosstalk between FL and FR and then mixed with FL and FR. The level of the mixed signal changes in accordance with the variable gain of the output gain amplifier (see the table below). A mute switch is incorporated to improve noise characteristics when microphone mixing is not in use.

The relation between the output gain and mixing gain

FL/FR output gain	Mixing gain
0	0
+2dB	-2dB
+6.5dB	-6.5dB
+10.5dB	-10.5dB

(4) Master volume (FL ch, FR ch, C ch, SL ch, SR ch, SW ch)

This IC incorporates six independently controlled electronic volumes, each of which has low-distortion and low-noise characteristics.

Volume: attenuation of 0 dB to -87 dB, settable in 1-dB steps.

(5) Equivalent Circuit for the Bass-Boost Circuit

Positive-feedback second-order high-pass filter circuit for the bass-boost module

Amplitude characteristics of the second-order high-pass filter

Q	G0
1	0 to 1dB
2	6dB
4	10dB
5	13dB
10	20dB

The transfer function is described by the following expressions:

$$\frac{V_{OUT}}{V_{IN}} = \frac{Ks^2}{s^2 + s \left[\frac{1}{R_2C_1} + \frac{1}{R_2C_2} + (1-K) \frac{1}{R_1C_1} \right] + \frac{1}{R_1R_2C_1C_2}}$$

$$\omega_0^2 = \frac{1}{R_1R_2C_1C_2}$$

$$Q = \frac{1}{\sqrt{\frac{R_1C_1}{R_2C_2}} + \sqrt{\frac{R_1C_2}{R_2C_1}} + (1-K)\sqrt{\frac{R_2C_2}{R_1C_1}}}$$

The bass-boost module includes the above positive-feedback second-order high-pass filter.

In the above figure, when $R_1 = 1.2 \text{ k}\Omega$, $R_2 = 470 \text{ k}\Omega$, and $C_1 = C_2 = 0.1 \text{ }\mu\text{F}$ ($K = +1$),

$F_0 = 70 \text{ Hz}$ ($f_0 = \omega_0/2\pi$), $Q = 10$.

Gain Level Diagram

Caution: Do not input a signal which exceeds the power-supply voltage level.

Keep safety first in your circuit designs!

1. Renesas Technology Corp. puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage.
Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of nonflammable material or (iii) prevention against any malfunction or mishap.

Notes regarding these materials

1. These materials are intended as a reference to assist our customers in the selection of the Renesas Technology Corp. product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Renesas Technology Corp. or a third party.
 2. Renesas Technology Corp. assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.
 3. All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Renesas Technology Corp. without notice due to product improvements or other reasons. It is therefore recommended that customers contact Renesas Technology Corp. or an authorized Renesas Technology Corp. product distributor for the latest product information before purchasing a product listed herein.
The information described here may contain technical inaccuracies or typographical errors.
Renesas Technology Corp. assumes no responsibility for any damage, liability, or other loss rising from these inaccuracies or errors.
Please also pay attention to information published by Renesas Technology Corp. by various means, including the Renesas Technology Corp. Semiconductor home page (<http://www.renesas.com>).
 4. When using any or all of the information contained in these materials, including product data, diagrams, charts, programs, and algorithms, please be sure to evaluate all information as a total system before making a final decision on the applicability of the information and products. Renesas Technology Corp. assumes no responsibility for any damage, liability or other loss resulting from the information contained herein.
 5. Renesas Technology Corp. semiconductors are not designed or manufactured for use in a device or system that is used under circumstances in which human life is potentially at stake. Please contact Renesas Technology Corp. or an authorized Renesas Technology Corp. product distributor when considering the use of a product contained herein for any specific purposes, such as apparatus or systems for transportation, vehicular, medical, aerospace, nuclear, or undersea repeater use.
 6. The prior written approval of Renesas Technology Corp. is necessary to reprint or reproduce in whole or in part these materials.
 7. If these products or technologies are subject to the Japanese export control restrictions, they must be exported under a license from the Japanese government and cannot be imported into a country other than the approved destination.
Any diversion or reexport contrary to the export control laws and regulations of Japan and/or the country of destination is prohibited.
 8. Please contact Renesas Technology Corp. for further details on these materials or the products contained therein.
