## GENERAL INSTALLATION / OPERATION / MAINTENANCE REQUIREMENTS

This drinking water system must be maintained according to the manufacturer's instructions, including replacement of filter cartridges. The substances reduced or removed by this system are not necessarily in your water. Read the performance data sheet.

It is recommended that before purchasing a water treatment unit, you have your water tested to determine your actual treatment needs.

Space required: 15W x 22H x 13D in (38W x 56H x 33D cm) including 2-1/2 inches of clear space under unit for cartridge change

Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts.

A separate drinking water faucet is required

Install vertically with cartridge hanging down

Use minimum length of tubing possible

Flush new cartridge at full flow for three minutes to purge air

Replace both cartridges at the same time; either when capacity is reached, or when flow becomes too slow. To ensure optimum water filtration, cartridges should be changed annually.

### Health Claim Performance Certified by NSF\*
