AVE0709 - Automatic Winding Machine for Multi-tab Electrolytic Capacitors

MAIN FEATURES

- Winding elements of diameter up to 40 mm; width min. 12 mm - max. 55 mm.
- Winding of brittle foils and low density papers.
- Precise foil length, tab length and positioning.
- Suitable for automatic assembly of finished capacitor.
- Equipped with 2 independent winding mandrels.
- Films and tabs feeding/assembly by mechanical grippers for better control of length and positioning.
- Air guides on foils and papers.
- Outside tabs length pre-settable for each tab in one element.
- Aluminum dust collectors.
- Compact design and good machine accessibility.
- Efficiency and high productivity**.**
