

## Description

## Mechanical Dimensions

## Features

- LOW COST
- HIGH SURGE CAPABILITY
- DIFFUSED JUNCTION
- LOW LEAKAGE CURRENT
- HIGH TEMPERATURE CAPABILITY
- MEETS UL SPECIFICATION 94V-0

| Electrical Characteristics @ 25°C.                                                    | FR3501 ... 3510 Series |        |        |                      |        |        |        | Units                       |

|                                                                                       |                        |        |        | 350                  |        |        |        | $\mu\text{Amps}$            |
| Typical Junction Capacitance... $C_J$ (Note 1)                                        |                        |        |        | 400                  |        |        |        | pF                          |
| Typical Thermal Resistance... $R_{\theta JC}$ (Note 2)                                |                        |        |        | 1.0                  |        |        |        | $^\circ\text{C} / \text{W}$ |
| Typical Reverse Recovery Time... $t_{RR}$                                             |                        |        |        | 3.0                  |        |        |        | $\mu\text{S}$               |
| Operating & Storage Temperature Range... $T_J, T_{STRG}$                              |                        |        |        | -50 to 175           |        |        |        | $^\circ\text{C}$            |

Ratings at  
25 Deg. C ambient  
temperature  
unless otherwise  
specified.

Single Phase Half  
Wave, 60 HZ  
Resistive or  
Inductive Load.

For Capacitive  
Load, Derate  
Current by 20%.

- NOTES:**
1. Measured @ 1 MHz and applied reverse voltage of 4.0V.
  2. Thermal Resistance Junction to Ambient, Jedec Method.
  3. When Mounted to heat sink, from body.
