REVISION HISTORY

The following table summarizes revisions to this document.

Revision	Date	Description
7	Mar. 2007	<ul style="list-style-type: none">• Corrected and updated Part Numbers in Tables 8, 10 and 11, Component Designations and Values, to RoHS compliant part numbers, p. 6-8
8	July 2007	<ul style="list-style-type: none">• Replaced Case Outline 1514-01 with 1514-02, Issue D, p. 1, 12-14. Case updated to add missing dimension for Pin 1 and Pin 3.
9	Mar. 2008	<ul style="list-style-type: none">• Removed Footnote 2, Continuous voltage and current applied to device, from Table 2, Maximum Ratings, p. 1• Corrected Fig. 13, Single-Carrier W-CDMA Adjacent Channel Power Ratio versus Output Power y-axis (ACPR) unit of measure to dBc, p. 5• Corrected S-Parameter table frequency column label to read "MHz" versus "GHz" and corrected frequency values from GHz to MHz, p. 9, 10
10	Feb. 2012	<ul style="list-style-type: none">• Corrected temperature at which Theta_{JC} is measured from 25°C to 118°C and added "no RF applied" to Thermal Characteristics table to indicate that thermal characterization is performed under DC test with no RF signal applied, p. 1• Table 6, ESD Protection Characterization, removed the word "Minimum" after the ESD class rating. ESD ratings are characterized during new product development but are not 100% tested during production. ESD ratings provided in the data sheet are intended to be used as a guideline when handling ESD sensitive devices, p. 3• Removed I_{CC} bias callout from applicable graphs and Table 12, Common Emitter S-Parameters heading as bias is not a controlled value, p. 4-10• Added .s2p File availability to Product Software, p. 15
