Introduction

RES-P3242GCL series is 26-port rack mount managed Redundant Ring Ethernet switch with 24x10/100Base-T(X) and 2xGigabit Combo ports, SFP socket. These switches are designed for power substation application and rolling stock application, fully compliant with the requirement of IEC 61850-3 and IEEE 1613. With completely support of Ethernet Redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection), Open-Ring, O-Chain, and MSTP/RSTP:2004/STP (IEEE 802.1s/w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. RES-P3242GCL series can be managed centralized and convenient by a powerful windows utility — Open-Vision. RES-P3242GCL series also supports functions of network management, such as SNMP, RMON, Port Trunking, and Port/Tag-based VLAN security. RES-P3242GCL series provided multi power inputs design, such as two DC inputs or two AC inputs, the redundant power inputs guarantee a non-stop operation. And support wide operating temperature from -40 to 85°C. One additional relay output is provided for system alarm warning, Therefore, RES-P3242GCL series is one of the most reliable choice for highly-managed and Fiber Ethernet power substation and rolling stock application.
