

DUAL P-CHANNEL MATCHED MOSFET PAIR

GENERAL DESCRIPTION

The ALD1102 is a monolithic dual P-channel matched transistor pair intended for a broad range of analog applications. These enhancement-mode transistors are manufactured with Advanced Linear Devices' enhanced ACMOS silicon gate CMOS process.

The ALD1102 offers high input impedance and negative current temperature coefficient. The transistor pair is matched for minimum offset voltage and differential thermal response, and it is designed for switching and amplifying applications in -2V to -10V systems where low input bias current, low input capacitance and fast switching speed are desired. Since these are MOSFET devices, they feature very large (almost infinite) current gain in a low frequency, or near DC, operating environment. When used with an ALD1101, a dual CMOS analog switch can be constructed. In addition, the ALD1102 is intended as a building block for differential amplifier input stages, transmission gates, and multiplexer applications.

The ALD1102 is suitable for use in precision applications which require very high current gain, beta, such as current mirrors and current sources. The high input impedance and the high DC current gain of the Field Effect Transistors result in extremely low current loss through the control gate. The DC current gain is limited by the gate input leakage current, which is specified at 50pA at room temperature. For example, DC beta of the device at a drain current of 5mA at 25°C is $= 5\text{mA}/50\text{pA} = 100,000,000$.

FEATURES

- Low threshold voltage of 0.7V
- Low input capacitance
- Low Vos grades -- 2mV, 5mV, 10mV
- High input impedance -- $10^{12}\Omega$ typical
- Low input and output leakage currents
- Negative current (I_{DS}) temperature coefficient
- Enhancement-mode (normally off)
- DC current gain 10^9
- RoHS compliant

ORDERING INFORMATION ("L" suffix denotes lead-free (RoHS))

Operating Temperature Range*	
0°C to +70°C	0°C to +70°C
8-Pin SOIC Package	8-Pin Plastic Dip Package
ALD1102ASAL	ALD1102APAL
ALD1102BSAL	ALD1102BPAL
ALD1102SAL	ALD1102PAL

* Contact factory for high temperature versions.

APPLICATIONS

- Precision current mirrors
- Precision current sources
- Analog switches
- Choppers
- Differential amplifier input stage
- Voltage comparator
- Data converters
- Sample and Hold
- Analog inverter

PIN CONFIGURATION

BLOCK DIAGRAM

ABSOLUTE MAXIMUM RATINGS

Drain-source voltage, V_{DS} _____ -10V
 Gate-source voltage, V_{GS} _____ -10V
 Power dissipation _____ 500mW
 Operating temperature range SAL, PAL packages _____ 0°C to +70°C
 Storage temperature range _____ -65°C to +150°C
 Lead temperature, 10 seconds _____ +260°C

CAUTION: ESD Sensitive Device. Use static control procedures in ESD controlled environment.

OPERATING ELECTRICAL CHARACTERISTICS

$T_A = 25^\circ\text{C}$ unless otherwise specified

Parameter	Symbol	ALD1102A			ALD1102B			ALD1102			Unit	Test Conditions
		Min	Typ	Max	Min	Typ	Max	Min	Typ	Max
