DESCRIPTIONS

The 200VFI series is a family of cost effective 2 watt single and dual output DC/DC converters. 18 models operate from input bus voltages of 5V, 12V and 24V; producing output voltage levels of 5V, 12V, 15V, $\pm 5V$, $\pm 12V$ and $\pm 15V$ for a wide range of choices.

The 200VFI series is ideal for a variety of applications including distributed power systems, mixed analog / digital subsystems, portable test equipment, local power networks and battery backed systems.

The image displays two orthographic views of a mechanical part: a Side View (top) and a Bottom View (bottom).

Side View: Shows a rectangular component with a width of 1.25 (31.8) and a height of 0.40 (10.2). The mounting holes are located 0.15 (3.8) from the bottom edge. The hole diameter is specified as 0.020 (0.50) PIN DIA.

Bottom View: Shows the component's footprint with a width of 0.100 (2.54) and a depth of 0.10 (2.5). The mounting holes are arranged in a grid. The distance between the center of the first hole and the center of the last hole in the first row is 0.08 (2.0). The distance between the center of the first hole and the center of the last hole in the second row is 0.600 (15.22). The distance between the center of the first hole and the center of the last hole in the third row is 0.80 (20.3). The holes are numbered 1 through 12.
