

Integrated 802.11 b/g/n WLAN Module

FEATURES

- IEEE 802.11 b/g/n (single stream n)
- Typical WLAN Transmit Power:
 - +19.0 dBm, 1 Mbps, CCK (b)
 - +15.8 dBm, 54 Mbps, OFDM (g)
 - +15.0 dBm, HT20 MCS7 (n)
- Typical WLAN Sensitivity:
 - -90 dBm, 8% PER, 11 Mbps (b)
 - -73 dBm, 10% PER, 54 Mbps (g)
 - -71 dBm, 10% PER, MCS7 (n)
- Miniature footprint: 10.5 mm x 10.5 mm
- Low height profile: 1.4 mm
- Operating voltage: 3.13V to 3.46V
- Operating temperature: -40 to +85° C
- Compact design based on Broadcom BCM4390 SoC
- Integrated ARM Cortex-M3 apps processor
- Wireless Security WEP, WPA Personal, WPA2 Personal
- Transmit and receive antenna diversity
- UART serial host interface
- Simple integration with microcontrollers and microprocessors
- Worldwide acceptance: FCC (USA), IC (Canada), and CE (Europe)
- Modular certification allows reuse of LSR FCC ID and ETSI certification without repeating the expensive testing on your end product
- RoHS compliant
- Streamlined development with LSR Design Services

APPLICATIONS

- Thermostats, appliances, HVAC controller, and remote displays, Smart Energy
- Home entertainment control
- Sensor Networks
- Medical
- Home Monitoring
- Toys

DESCRIPTION

The TiWi-C-W is a high performance 2.4 GHz WLAN module that contains an IP networking stack in a pre-certified footprint that simplifies the process of implementing internet connectivity.

The module includes the necessary PHY, MAC, and network layers to support WLAN applications on the integrated applications processor, or through a simple host interface.

Need to get to market quickly? Not an expert in 802.11. Need a custom antenna? Would you like to own the design? Would you like a custom design? Not quite sure what you need? Do you need help with your host board? LSR Design Services will be happy to develop custom hardware or software, or assist with integrating the design. Contact us at sales@lsr.com or call us at 262-375-4400.

- Home automation
- Home Network aggregators
- Remote appliance diagnostics/support
- Home security
- Remote storage devices
- Home network appliance
- Cameras and video surveillance
- Fitness
- Cable replacement for medical and personal healthcare

ORDERING INFORMATION

Order Number	Description
450-0118C	TiWi-C-W Module (Cut Tape)
450-0118R	TiWi-C-W Module (Tape and Reel, SPQ = 2000)
450-0137	TiWi-C-W Evaluation Platform
450-0143	TiWi-C-W Development Kit featuring TiWiConnect
450-0164	TiWi-C-W Serial-to-WiFi Development Kit

Table 1 Orderable TiWi-C-W Part Numbers

MODULE ACCESSORIES

	Order Number	Description
	001-0001	2.4 GHz Dipole Antenna with Reverse Polarity SMA Connector
	080-0001	U.FL to Reverse Polarity SMA Bulkhead Cable 105mm
	001-0014	2.4 GHz FlexPIFA Antenna
	001-0030	2.4 GHz Metal FlexPIFA Antenna w/U.FL Cable, 100 mm

FUNCTIONAL BLOCK FEATURES

WLAN Features

- IEEE802.11b/g/n 1x1 2.4 GHz Radio
- Single Transmit and Single or Dual Receive Antenna Support
- **Media Access Controller (MAC)**
- Baseband Processor
- **Standards**
 - IEEE 802.11b, 802.11g, 802.11n
 - IEEE 802.11 d/i (regulatory domains and WPA2)
 - IEEE 802.11r (fast roaming between Aps)
 - IEEE 802.11w (secure management frames)

Network Stack Supported Protocols

- **Transport layer:**
 - TCP
 - UDP
- **Network layer:**
 - IPv4, IPv6
 - Ping
 - DHCP
 - HTTP
 - NTP
 - DNS Client
- **Link layer:**
 - ARP

Wireless Security System Features

- **Supported modes:**
 - Open (no security)
 - WEP
 - WPA Personal
 - WPA2 Personal
- **Supported encryption types:**
 - Open
 - WEP
 - AES (hardware accelerator)
 - TKIP (hardware accelerator)

TIWI-C-W MODULE FOOTPRINT AND PIN DEFINITIONS

To apply the TiWi-C-W module, it is important to use the module pins in your application as they are designated below, and in the corresponding pin definition table found on pages 8 and 9. Not all the pins on the TiWi-C-W module may be used, as some are reserved.

Figure 2 TiWi-C-W Pinout (Top View)

PIN DESCRIPTIONS

Module Pin	Name	I/O Type	Description
1	GND	GND	GROUND
2	VCC	PI	POWER TO MODULE (3.13-3.46 VDC)
3	GND	GND	GROUND
4	RESET_N	DI	ACTIVE LOW RESET INPUT. MUST BE PULLED UP TO VCC WITH A 10k OHM RESISTOR.
5	GPIO_A11	DIO	GPIO A11
6	FLASH_OVERRIDE	DIO	INTERNAL FLASH PROGRAMMING OVERRIDE. CAN BE USED TO ASSIST IN A FORCED FLASH ERASE. SHOULD BE BROUGHT TO AND EXTERNAL PAD OR PIN.
7	OSC_32K_OUT	DO	32.768 kHz OSCILLATOR OUTPUT
8	VCC_OSC	PI	POWER TO 32.768 kHz OSCILLATOR (3.13-3.46 VDC)
9	GND	GND	GROUND
10	ANTENNA 1	RF	ANTENNA 1, 50 OHMS, SECONDARY RX ANTENNA
11	GND	GND	GROUND
12	GPIO_A10	DIO	GPIO A10
13	GND	GND	GROUND
14	ANTENNA 0	RF	ANTENNA 0, 50 OHMS, TX AND PRIMARY RX ANTENNA
15	GND	GND	GROUND
16	I2S_WS_UART2_TXD_A7	DIO	UART2 TRANSMIT DATA OUTPUT / GPIO A7
17	I2S_WS_UART2_RXD_A9	DIO	UART 2 RECEIVE DATA INPUT / GPIO A9
18	GPIO_A8	DIO	GPIO A8
19	GPIO_A6	DIO	GPIO A6
20	GND	GND	GROUND
21	UART1_CTS_N_A1	DIO	UART 1 ACTIVE LOW CLEAR-TO-SEND / GPIO A1
22	UART1_RXD	DI	UART 1 RECEIVE DATA INPUT
23	UART1_RTS_N_A0	DIO	UART 1 ACTIVE LOW REQUEST-TO-SEND / GPIO A0
24	UART1_TXD	DO	UART 1 TRANSMIT DATA OUTPUT
25	GND	GND	GROUND
26	VCC	PI	POWER TO MODULE (3.13-3.46 VDC)
27	GND	GND	GROUND
28	JTAG_TCK_A3	DIO	APPS JTAG TCK / GPIO A3

The information in this document is subject to change without notice.

Module Pin	Name	I/O Type	Description
29	JTAG_TDO_A5	DIO	APPS JTAG TDO / GPIO A5
30	JTAG_TMS_A2	DIO	APPS JTAG TMS / GPIO A2
31	JTAG_TDI_A4	DIO	APPS JTAG TDI / GPIO A4
32	WRF_GPIO_OUT	DIO	
33	UART4_TXD	DO	UART 4 TRANSMIT DATA OUTPUT
34	UART4_RXD	DI	UART 4 RECEIVE DATA INPUT
35	NC	-	NO CONNECT (DO NOT CONNECT)
36	NC	-	NO CONNECT (DO NOT CONNECT)
37	CLK_IN	-	UNUSED CLOCK IN. CONNECT TO GND THROUGH 1k OHM RESISTOR.
38	NC	-	NO CONNECT (DO NOT CONNECT)
39	NC	-	NO CONNECT (DO NOT CONNECT)
40	NC	-	NO CONNECT (DO NOT CONNECT)
41	GPIO_B2	DIO	GPIO B2
42	GPIO_B3	DIO	GPIO B3
43	GPIO_B5	DIO	GPIO B5
44	GPIO_B6	DIO	GPIO B6
45	GPIO_B4	DIO	GPIO B4
46	GND	GND	GROUND
47	VCC	PI	POWER TO MODULE (3.13-3.46 VDC)
48	GND	GND	GROUND
49	GPIO_B0	DIO	GPIO B0
50	GPIO_B1	DIO	GPIO B1
51	GPIO_B9	DIO	GPIO B9
52	GPIO_B10	DIO	GPIO B10
53	GPIO_B11	DIO	GPIO B11
54	GPIO_B8	DIO	GPIO B8
55	GPIO_B7	DIO	GPIO B7
56	GND	GND	GROUND
57	GND	GND	GROUND

Power Down Mode		-		-	uA

Table 8 WLAN Power Consumption

Power Supply Requirements

Parameter	Min	Typical	Max	Unit
VCC	3.13	3.30	3.46	V
Supply Current	-	800	-	mA

Table 9 Power Supply Requirements

Although the Max continuous supply current to the module is >360 mA, when providing power to the module, a power source capable of supplying 800 mA peak current for a duration of ~30 mSec is required by the module transmitter during calibration.

Module calibration occurs:

- (1) When the Module is initially powered up.
- (2) The module is reset.
- (3) When the radio is initialized.
- (4) Every 2 minutes after the radio is initialized.

Note: Radio calibration will not occur while the module is in modes Doze, Deep Sleep, Power Down or if the radio is not initialized.

Figure 3 shows the current profile of the TiWi-C-W module during calibration. If current is limited to <800mA during this process, the module will fail to calibrate.

Figure 3 Module RF Calibration Current Profile

UART HOST INTERFACE

The main interface to the TiWi-C-W Module is a Universal Asynchronous Receiver Transmitter (UART). This section describes the UART host interface.

Overview

The UART is a standard TTL level 4-wire interface (RX, TX, RTS, and CTS) with support for baud rates from 9600 bps to 4.0 Mbps. Default parameters are 115200 baud, 8 data bits, no parity bits, 1 stop bit, hardware flow control disabled.

UART Interface

Figure 4 UART Connection from TiWi-C-W to Host

UART Signal Description

Port Name	Input/Output	Description
UART1_TXD	DO	UART 1 TRANSMIT DATA OUTPUT
UART1_RXD	DI	UART 1 RECEIVE DATA INPUT
UART1_RTS_N_A0	DO	UART 1 ACTIVE LOW REQUEST-TO-SEND
UART1_CTS_N_A1	DI	UART 1 ACTIVE LOW CLEAR-TO-SEND

Table 16 UART Interface Signal Description

UART TIMING

The information in this document is subject to change without notice.

Soldering Recommendations

Reflow for Lead Free Solder Paste

- Optimal solder reflow profile depends on solder paste properties and should be optimized as part of an overall process development.
- It is important to provide a solder reflow profile that matches the solder paste supplier's recommendations.
- Temperature ranges beyond that of the solder paste supplier's recommendation could result in poor solderability.
- All solder paste suppliers recommend an ideal reflow profile to give the best solderability.

Recommended Reflow Profile for Lead Free Solder

Figure 6 Recommended Soldering Profile

Note: The quality of solder joints on the surface mount pads where they contact the host board should meet the appropriate IPC Specification. See IPC-A-610-D Acceptability of Electronic Assemblies, section 8.2.1 "Bottom Only Terminations."

CLEANING

In general, cleaning the populated modules is strongly discouraged. Residuals under the module cannot be easily removed with any cleaning process.

- Cleaning with water can lead to capillary effects where water is absorbed into the gap between the host board and the module. The combination of soldering flux residuals and encapsulated water could lead to short circuits between neighboring pads. Water could also damage any stickers or labels.
- Cleaning with alcohol or a similar organic solvent will likely flood soldering flux residuals into the RF shield, which is not accessible for post-washing inspection. The solvent could also damage any stickers or labels.
- Ultrasonic cleaning could damage the module permanently.

OPTICAL INSPECTION

After soldering the Module to the host board, consider optical inspection to check the following:

- Proper alignment and centering of the module over the pads.
- Proper solder joints on all pads.
- Excessive solder or contacts to neighboring pads, or vias.

REWORK

The TiWi-C-W module can be unsoldered from the host board if the Moisture Sensitivity Level (MSL) requirements are met as described in this datasheet.

Never attempt a rework on the module itself, e.g. replacing individual components. Such actions will terminate warranty coverage.

SHIPPING, HANDLING, AND STORAGE

Shipping

Bulk orders of the TiWi-C-W modules are delivered in reels of 2000.

Handling

The TiWi-C-W modules contain a highly sensitive electronic circuitry. Handling without proper ESD protection may damage the module permanently.

Moisture Sensitivity Level (MSL)

Per J-STD-020, devices rated as MSL 3 and not stored in a sealed bag with desiccant pack should be baked prior to use.

Devices are packaged in a Moisture Barrier Bag with a desiccant pack and Humidity Indicator Card (HIC). Devices that will be subjected to reflow should reference the HIC and J-STD-033 to determine if baking is required.

If baking is required, refer to J-STD-033 for bake procedure.

Storage

Per J-STD-033, the shelf life of devices in a Moisture Barrier Bag is 12 months at <40°C and <90% room humidity (RH).

Do not store in salty air or in an environment with a high concentration of corrosive gas, such as Cl₂, H₂S, NH₃, SO₂, or NO_x.

Do not store in direct sunlight.

The product should not be subject to excessive mechanical shock.

Repeating Reflow Soldering

Only a single reflow soldering process is encouraged for host boards.

AGENCY CERTIFICATIONS

FCC ID: TFB-1001, 15.247

IC ID: 5969A-1001, RSS 210

CE: Compliant to standards EN 60950-1, EN 300 328, and EN 301 489

AGENCY STATEMENTS

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC CAUTION: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Industry Canada Statements

This Device complies with Industry Canada License-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that permitted for successful communication.

This device has been designed to operate with the antenna(s) listed below and having a maximum gain of 2.0 dBi (LSR Dipole), 2.0 dBi (LSR FlexPIFA), 2.0 dBi (LSR mFlexPIFA), and 0.5dBi (Johanson Chip). Antennas not included in this list or having a gain greater than 2.0 dBi, 2.0 dBi, 2.0 dBi, and 0.5dBi are strictly prohibited for use with this device. The required antenna impedance is 50 ohms.

List of all Antennas Acceptable for use with the Transmitter

- 1) LSR 001-0001 2.4 GHz center-fed dipole antenna and LSR 080-0001 U.FL to Reverse Polarity SMA connector cable.
- 2) LSR 001-0014 2.4 GHz FlexPIFA antenna.
- 3) LSR 001-0030 2.4 GHz Metal FlexPIFA (mFlexPIFA) antenna.
- 4) Johanson 2450AT18A100 chip antenna.

Cet appareil est conforme avec Industrie Canada , exempts de licence standard RSS (s). L'opération est soumise aux deux conditions suivantes: (1) cet appareil ne peut pas provoquer d'interférences et (2) cet appareil doit accepter toute interférence, y compris les interférences qui peuvent causer un mauvais fonctionnement de l'appareil.

Pour réduire le risque d'interférence aux autres utilisateurs, le type d'antenne et son gain doivent être choisis de manière que la puissance isotrope rayonnée équivalente (PIRE) ne dépasse pas celle permise pour une communication réussie.

Cet appareil a été conçu pour fonctionner avec l'antenne (s) ci-dessous, et ayant un gain maximum de 2,0 dBi (LSR Dipole), 2.0 dBi (LSR FlexPIFA), 2.0 dBi (LSR mFlexPIFA), et 0.5dBi (Johanson Chip). Antennes pas inclus dans cette liste ou présentant un gain supérieure à 2,0 dBi, 2.0 dBi, 2.0 dBi, et 0.5dBi sont strictement interdits pour une utilisation avec cet appareil. L'impédance d'antenne requise est de 50 ohms.

Liste de toutes les antennes acceptables pour une utilisation avec l'émetteur

- 1) Antenne LSR 001-0001 2.4 GHz de centre-dipôle alimenté et LSR 080-0001 U.FL inverser câble connecteur SMA à polarité.
- 2) LSR 001-0014 antenne FlexPIFA 2,4 GHz.
- 3) LSR 001-0030 antenne Métal FlexPIFA (mFlexPIFA) 2,4 GHz.
- 4) Antenne de puce Johanson 2450AT18A100.

OEM RESPONSIBILITIES TO COMPLY WITH FCC AND INDUSTRY CANADA REGULATIONS

The TiWi-C-W Module has been certified for integration into products only by OEM integrators under the following conditions:

This device is granted for use in Mobile only configurations in which the antennas used for this transmitter must be installed to provide a separation distance of at least 20cm from all person and not be co-located with any other transmitters except in accordance with FCC and Industry Canada multi-transmitter product procedures.

As long as the two conditions above are met, further transmitter testing will not be required. However, the OEM integrator is still responsible for testing their end-product for any additional compliance requirements required with this module installed (for example, digital device emissions, PC peripheral requirements, etc.).

IMPORTANT NOTE: In the event that these conditions cannot be met (for certain configurations or co-location with another transmitter), then the FCC and Industry Canada authorizations are no longer considered valid and the FCC ID and IC Certification Number cannot be used on the final product. In these circumstances, the OEM integrator will be responsible for re-evaluating the end product (including the transmitter) and obtaining a separate FCC and Industry Canada authorization.

Le module de TiWi-C-W a été certifié pour l'intégration dans des produits uniquement par des intégrateurs OEM dans les conditions suivantes:

Ce dispositif est accordé pour une utilisation dans des configurations mobiles seul dans lequel les antennes utilisées pour cet émetteur doit être installé pour fournir une distance de séparation d'au moins 20cm de toute personne et ne pas être colocalisés avec les autres émetteurs, sauf en conformité avec la FCC et de l'Industrie Canada, multi-émetteur procédures produit.

Tant que les deux conditions précitées sont réunies, les tests de transmetteurs supplémentaires ne seront pas tenus. Toutefois, l'intégrateur OEM est toujours responsable de tester leur produit final pour toutes les exigences de conformité supplémentaires requis avec ce module installé (par exemple, les émissions appareil numérique, les exigences de périphériques PC, etc.)

NOTE IMPORTANTE: Dans le cas où ces conditions ne peuvent être satisfaites (pour certaines configurations ou de co-implantation avec un autre émetteur), puis la FCC et Industrie autorisations Canada ne sont plus considérés comme valides et l'ID de la FCC et IC numéro de certification ne peut pas être utilisé sur la produit final. Dans ces circonstances, l'intégrateur OEM sera chargé de réévaluer le produit final (y compris l'émetteur) et l'obtention d'un distincte de la FCC et Industrie Canada l'autorisation.

OEM LABELING REQUIREMENTS FOR END-PRODUCT

The TiWi-C-W module is labeled with its own FCC ID and IC Certification Number. The FCC ID and IC certification numbers are not visible when the module is installed inside another device, as such the end device into which the module is installed must display a label referring to the enclosed module. The final end product must be labeled in a visible area with the following:

“Contains Transmitter Module FCC ID: TFB-1001”

“Contains Transmitter Module IC: 5969A-1001”

or

“Contains FCC ID: TFB-1001”

“Contains IC: 5969A-1001”

The OEM of the TiWi-C-W Module must only use the approved antenna(s) listed above, which have been certified with this module.

Le module de TiWi-C-W est étiqueté avec son propre ID de la FCC et IC numéro de certification. L'ID de la FCC et IC numéros de certification ne sont pas visibles lorsque le module est installé à l'intérieur d'un autre appareil, comme par exemple le terminal dans lequel le module est installé doit afficher une étiquette faisant référence au module ci-joint. Le produit final doit être étiqueté dans un endroit visible par le suivant:

“Contient Module émetteur FCC ID: TFB-1001”

“Contient Module émetteur IC: 5969A-1001”

ou

“Contient FCC ID: TFB-1001”

“Contient IC: 5969A-1001”

Les OEM du module TiWi-C-W ne doit utiliser l'antenne approuvée (s) ci-dessus, qui ont été certifiés avec ce module.

OEM END PRODUCT USER MANUAL STATEMENTS

The OEM integrator should not provide information to the end user regarding how to install or remove this RF module or change RF related parameters in the user manual of the end product.

The user manual for the end product must include the following information in a prominent location:

This device is granted for use in Mobile only configurations in which the antennas used for this transmitter must be installed to provide a separation distance of at least 20cm from all person and not be co-located with any other transmitters except in accordance with FCC and Industry Canada multi-transmitter product procedures.

Other user manual statements may apply.

L'intégrateur OEM ne devraient pas fournir des informations à l'utilisateur final sur la façon d'installer ou de supprimer ce module RF ou modifier les paramètres liés RF dans le manuel utilisateur du produit final.

Le manuel d'utilisation pour le produit final doit comporter les informations suivantes dans un endroit bien en vue:

Ce dispositif est accordé pour une utilisation dans des configurations mobiles seule dans laquelle les antennes utilisées pour cet émetteur doit être installé pour fournir une distance de séparation d'au moins 20cm de toute personne et ne pas être co-localisés avec les autres émetteurs, sauf en conformité avec FCC et Industrie Canada, multi-émetteur procédures produit.

Autres déclarations manuel de l'utilisateur peuvent s'appliquer.

EUROPE

CE Notice

This device has been tested and certified for use in the European Union. See the Declaration of Conformity (DOC) for specifics.

If this device is used in a product, the OEM has responsibility to verify compliance of the final product to the EU standards. A Declaration of Conformity must be issued and kept on file as described in the Radio and Telecommunications Terminal Equipment (R&TTE) Directive.

The 'CE' mark must be placed on the OEM product per the labeling requirements of the Directive.

Declaration of Conformity (DOC)

This DOC can be downloaded from the LSR Wiki.
