

CD4723BM/CD4723BC Dual 4-Bit Addressable Latch CD4724BM/CD4724BC 8-Bit Addressable Latch

General Description

The CD4723B is a dual 4-bit addressable latch with common control inputs, including two address inputs (A0, A1), an active low enable input ($\bar{E}$), and an active high clear input (CL). Each latch has a data input (D) and four outputs (Q0–Q3). The CD4724B is an 8-bit addressable latch with three address inputs (A0–A2), an active low enable input ($\bar{E}$), active high clear input (CL), a data input (D) and eight outputs (Q0–Q7).

Data is entered into a particular bit in the latch when that is addressed by the address inputs and the enable ($\bar{E}$) is low. Data entry is inhibited when enable ($\bar{E}$) is high.

When clear (CL) and enable ($\bar{E}$) are high, all outputs are low. When clear (CL) is high and enable ($\bar{E}$) is low, the channel demultiplexing occurs. The bit that is addressed has an active output which follows the data input while all unaddressed bits are held low. When operating in the address-

able latch mode ($\bar{E} = \text{CL} = \text{low}$), changing more than one bit of the address could impose a transient wrong address. Therefore, this should only be done while in the memory mode ($\bar{E} = \text{high}$, $\text{CL} = \text{low}$).

Features

- Wide supply voltage range 3.0V to 15V
- High noise immunity 0.45 V_{DD} (typ.)
- Low power TTL fan out of 2 driving 74L compatibility or 1 driving 74LS
- Serial to parallel capability
- Storage register capability
- Random (addressable) data entry
- Active high demultiplexing capability
- Common active high clear

Note 1: "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed; they are not meant to imply that the devices should be operated at these limits. The tables of "Recommended Operating Conditions" and "Electrical Characteristics" provide conditions for actual device operation.

Note 2: $V_{SS} = 0V$ unless otherwise specified.

Note 3: I_{OL} and I_{OH} are tested one output at a time.
