Safety Instructions

Integrated circuits on computer boards are sensitive to static electricity. To avoid damaging chips from electrostatic discharge, observe the following precautions:

- Do not remove boards or integrated circuits from their anti-static packaging until you are ready to install them.
- Before handling a board or integrated circuit, touch an unpainted portion of the system unit chassis for a few seconds. This helps to discharge any static electricity on your body.
- Wear a wrist-grounding strap, available from most electronic component stores, when handling boards and components. Fasten the ALLIGATOR clip of the strap to the end of the shielded wire lead from a grounded object. Please wear and connect the strap before handle the HS-4701 to ensure harmlessly discharge any static electricity through the strap.
- Please use an anti-static pad when putting down any components or parts or tools outside the computer. You may also use an anti-static bag instead of the pad. Please inquire from your local supplier for additional assistance in finding the necessary anti-static gadgets.

NOTE: *DO NOT TOUCH THE BOARD OR ANY OTHER SENSITIVE COMPONENTS WITHOUT ALL NECESSARY ANTI-STATIC PROTECTION.*

This Page is intentionally left blank.

Chapter 1

General Description

The HS-4701 is an Intel® 82845GE/82801DB chipset-based board designed for PCI Bus PGA 478 Intel® Pentium® 4 up to 2.4GHz(400MHz FSB)/3.06GHz(533MHz FSB) CPU compatibility. These features combine and make the HS-4701 an ideal all-in-one industrial single board computer. Additional features include an enhanced I/O with CRT/LVDS Panel, DIO, LAN, Audio and 4COM ports interface.

Its onboard ATA/33/66/100 to IDE drive interface architecture allows the HS-4701 to support data transfers of 33, 66 or 100MB/sec. to each IDE drive connection. Designed with the Intel® 82845GE/82801DB core logic chipset, the board supports all PGA 478 Pentium® 4 CPU series operating up to 2.4GHz(400MHz FSB)/3.06GHz(533MHz FSB). The display controller is Intel® 82845GE with 1MB or 8MB memory supporting CRT display up to 1280 x 1024 at 32-bit colors, it also provides LVDS panel interface.

System memory is also sufficient with the two DDR sockets that can support up to 2GB.

Additional onboard connectors include an advanced USB2.0 port providing faster data transmission, and one internal 5x2 connector for 10/100 Base-TX Ethernet use.

1.1 Major Features

The HS-4701 comes with the following features:

- PGA 478 for Intel® Pentium® 4 up to 2.4GHz(400MHz FSB)/ 3.06GHz(533MHz FSB) CPU
- Intel® 82845GE/82801DB system chipset
- Two DDR sockets with a max. capacity of 2GB
- Winbond W83627, SMC SP37E760 super I/O chipset
- Fast PCI ATA/33/66/100 IDE controller
- Three RS-232 and one RS-232/422/485 serial ports
- Intel 82845GE CRT display controller
- Supports LVDS Panel interface
- Intel 82562 10/100 Based LAN
- AC97 3D audio controller
- Supports USB2.0, two connectors
- Supports Hardware Monitor function
- Supports 16-bit Digital Input/Output function (optional)
- Supports TV-Out function (optional)

1.2 Specifications

- **CPU:** PGA 478 for Intel® Pentium® 4 up to 2.4GHz(400MHz FSB)/ 3.06GHz(533MHz FSB)
- **Bus Interface:** PCI and Mini AGP Bus
- **Memory:** Two DDR sockets supporting up to 2GB
- **Chipset:** Intel® 82845GE/82801DB
- **I/O Chipset:** Winbond W83627, SMC SP37E760
- **PCI Slot:** One standard PCI slot
- **Digital I/O:** 16-bit Digital Input/Output port (optional)
- **VGA:** Intel 82845GE with 1MB or 8MB memory supporting CRT display up to 1280 x 1024 at 32-bit colors
- **Panel Display:** Supports LVDS Panel interface
- **IDE:** Four IDE disk drives supporting ATA/33/66/100 and with transfer rates of up to 33/66/100MB/sec.
- **FDD:** Supports up to two floppy disk drives
- **Parallel:** One enhanced bi-directional parallel port supporting SPP/ECP/EPP
- **LAN:** Intel® 82562 10/100 Based LAN
- **Audio:** AC97 3D audio controller
- **Serial Port:** 16C550 UART-compatible RS-232/422/485 x 1 and RS-232 x 3 serial ports with 16-byte FIFO
- **USB:** Supports USB2.0, two connectors
- **TV-Out:** Supports PAL or NTSC TV systems (optional)
- **Keyboard/Mouse:** 8-pin connector supporting standard PC/AT keyboard and PS/2 mouse
- **BIOS:** Award PnP Flash BIOS
- **Watchdog Timer:** Software program time-out intervals from 1~256 sec.
- **CMOS:** Battery backup
- **Power Connector:** One 4-pin and one 20-pin ATX power connector
- **Operating Temperature:** -10~+60°C
- **Hardware Monitor:** Winbond W83627
- **Board Size:** 20.3 x 14.6 cm

1.3 Board Dimensions

Chapter 2

Unpacking

2.1 Opening the Delivery Package

The HS-4701 is packed in an anti-static bag. The board has components that are easily damaged by static electricity. Do not remove the anti-static wrapping until proper precautions have been taken. Safety Instructions in front of this manual describe anti-static precautions and procedures.

2.2 Inspection

After unpacking the board, place it on a raised surface and carefully inspect the board for any damage that might have occurred during shipment. Ground the board and exercise extreme care to prevent damage to the board from static electricity.

Integrated circuits will sometimes come out of their sockets during shipment. Examine all integrated circuits, particularly the BIOS, processor, memory modules, and keyboard controller chip to ensure that they are firmly seated. The HS-4701 delivery package contains the following items:

- HS-4701 Board x 1
- Utility CD Disk x 1
- ATA/100 IDE flat cable x 2
- FDD flat cable x 1
- Parallel flat cable x 1
- VGA cable +DB15 x 1
- 10-pin LAN cable + RJ-45 connector x 1
- 8-pin USB split type cable with bracket x 1
- MIC/Audio 8-pin cable + 2 phone jacks x 1
- 4-in-1 COM Port cable + DB9 connectors x 1
- PS/2 K/B & Mouse split-type cable x 1
- Jumper Bag x 1
- User's Manual

It is recommended that you keep all the parts of the delivery package intact and store them in a safe/dry place for any unforeseen event requiring the return shipment of the product. In case you discover any missing and/or damaged items from the list of items, please contact your dealer immediately.

Chapter 3

Hardware Installation

This chapter provides the information on how to install the hardware using the HS-4701.

3.1 Before Installation

After confirming your package contents, you are now ready to install your hardware. The following are important reminders and steps to take before you begin with your installation process.

1. Make sure that all jumper settings match their default settings and CMOS setup correctly. Refer to the sections on this chapter for the default settings of each jumper.
2. Go through the connections of all external devices and make sure that they are installed properly and configured correctly within the CMOS setup. Refer to the sections on this chapter for the detailed information on the connectors.
3. Keep the manual and diskette in good condition for future reference and use.
4. Make sure your power supply is using for P4 only. One of 4-pin connector is for +12V lead which should connect to PW2 and 20-pin ATX connector to PW1.

3.2 Board Layout

3.3 Jumper List

Jumper	Default Setting	Setting	Page
JP1	Bus Clock Rate Select: <i>Auto Detect</i>	Short 1-2	10
JP2	Clear CMOS: <i>Normal Operation</i>	Short 1-2	18
J3	Only for Debug	----	----
J6	Use RS-232 or RS-422/485 Select: <i>RS-232</i>	Short 1-3, 2-4, 7-9, 8-10	15

3.4 Connector List

Connector	Definition	Page
CN1	MIC In/Audio Out Connector	20
CD2	Line In Connector	20
CN2	External Speaker Connector	20
CN3	HDD LED Connector	19
CN4	2-pin ATX Power On/Off Switch	18

PCI1	PCI Expansion Slot	21
KB1	8-pin KB/MS Connector	19
LPT1	Parallel Connector	16
USB1/USB2	USB Connectors	17

3.5 Configuring the CPU

The HS-4701 offers the convenience in CPU installation with its auto-detect feature. After installing a new microprocessor onboard, the HS-4701 automatically identifies the frequency and clock speed of the installed microprocessor chip, thereby eliminating the need for user to do additional CPU configuration or hardware settings related to it.

- **JP1: Bus Clock Rate Select**

Options	Settings
Auto Detect (default)	Short 1-2
100MHz	Short 2-3
133MHz	Empty

3.6 System Memory

The HS-4701 provides two DDR sockets at locations *DM1* and *DM2*. The maximum capacity of the onboard memory is 2GB.

3.7 VGA Controller

NOTE 1: *HS-4701 does not support DSTN/STN Panel.*

NOTE 2: *HS-4701 does not support 640*480 TFT Panel.*

NOTE 3: *There are specific panel cable and inverter for each different LCD. If clients need for others LCD (different from TOSHIBA LTM10C348F), please contact with your sales.*

The onboard Intel 82845GE with 1MB or 8MB memory supporting CRT display up to 1280 x 1024 at 32-bit colors. The HS-4701 provides two connection methods of CRT and LVDS Panel device. *CN10* offers an internal CRT connector, and *J4*, *J5* offer two LVDS Panel connectors.

- **CN10: Internal CRT Connector**

3.8 PCI E-IDE Drive Connector

IDE1 and *IDE2* are standard 40-pin connector daisy-chain driver connector serves the PCI E-IDE drive provisions onboard the HS-4701. A maximum of four ATA/33/66/100 IDE drives can connect to the HS-4701 via *IDE1* and *IDE2*.

● IDE1: Primary IDE Connector

3.14 CMOS Data Clear

The HS-4701 has a Clear CMOS jumper on JP2.

- **JP2: Clear CMOS**

Options	Settings
Normal Operation (default)	Short 1-2
Clear CMOS	Short 2-3

IMPORTANT: Before you turn on the power of your system, please set JP2 to short 1-2 for normal operation.

3.15 Power and Fan Connectors

HS-4701 provides one 20-pin and one 4-pin ATX power connectors at PW1 and PW2.

HS-4701 must using P4 power supply. One of 4-pin connector is for +12V lead which should connect to PW2.

20-pin ATX Power Connector can connect to Backplane or to PW1.

- **PW2: 4-pin ATX Power In Connector**

PIN	Description	PIN	Description
1	GND	2	GND
3	+12V	4	+12V

- **CN4: 2-pin ATX Power On/Off Switch**

PIN	Description
1	5VSTBY
2	Power On/Off

Connector *FN1*, *FN2* and *FN3* onboard HS-4701 are 3-pin fan connectors.

- **FN1, FN2 and FN3: Fan Connectors**

PIN	Description
1	GND
2	+12V
3	Fan Speed

3.16 Keyboard/Mouse Connectors

The HS-4701 offers one possibility for keyboard/mouse connection is via *KB1*.

- **KB1: 8-pin Keyboard/Mouse Connector**

PIN	Description
1	GND
2	VCC
3	MS_DATA
4	MS_CLK
5	GND
6	VCC
7	KB_DATA
8	KB_CLK

3.17 System Front Panel Connectors

The HS-4701 has one LED at location *CN3* that indicates the HDD status.

- **CN3: HDD LED Connector**

PIN	Description
1	150Ω Pull +5V
2	HDD ACTIVE#

CN5 is the Reset Button connector onboard. The *CN6* is Green function LED indicates.

- **CN5: Reset Button Connector**

PIN	Description
1	GND
2	External Reset

- **CN6: Green LED Connector**

PIN	Description
1	150Ω Pull +5V
2	ACTIVE#

3.18 External Speaker

Aside from the buzzer at location *BZ1* onboard, the HS-4701 also offers a connector (*CN2*) for an external speaker connection. The table below lists the pin assignments of *CN2*.

- **CN2: External Speaker Connector**

PIN	Description
1	VCC
2	GND
3	GND
4	Speaker Signal

3.19 Audio Connectors

The HS-4701 has an onboard AC97 3D audio interface. The following table list the pin assignments of the MIC In / Audio Out and Line In connector.

- **CN1: MIC In / Audio Out Connector**

PIN	Description	PIN	Description
1	AOUT_L	2	AOUT_R

3.21 TV Out Function

HS-4701 can support TV-Out function which input could be up to 800 x 600 graphics resolutions. World Wide Video standards are supported including NTSC-M (North America, Taiwan), NTSC-J (Japan), PAL-B, D, G, H, I (Europe, Asia), PAL-M (Brazil), PAL-N (Uruguay, Paraguay) and PAL-NC (Argentina).

- **J2: TV-Out Connector**

PIN	Description	PIN	Description
1	GND	2	TVCVB

3.22 Mini AGP Connector

HS-4701 provides one Mini AGP expansion slot, has at location *J7*, you can use slot for expansion when necessary.

3.23 PCI Expansion Slot

HS-4701 provides one standard PCI expansion slot at PCI1.

Chapter 4

Award BIOS Setup

The HS-4701 uses Award BIOS for the system configuration. The Award BIOS setup program is designed to provide the maximum flexibility in configuring the system by offering various options that could be selected for end-user requirements. This chapter is written to assist you in the proper usage of these features.

4.1 Starting Setup

The Award BIOS is immediately activated when you first power on the computer. The BIOS reads the system information contained in the CMOS and begins the process of checking out the system and configuring it. When it finishes, the BIOS will seek an operating system on one of the disks and then launch and turn control over to the operating system.

While the BIOS is in control, the Setup program can be activated in one of two ways:

1. By pressing immediately after switching the system on, or
2. By pressing the key when the following message appears briefly at the bottom of the screen during the POST (Power On Self Test).

Press DEL to enter SETUP.

If the message disappears before you respond and you still wish to enter Setup, restart the system to try again by turning it OFF then ON or pressing the "RESET" button on the system case. You may also restart by simultaneously pressing <Ctrl>, <Alt>, and <Delete> keys. If you do not press the keys at the correct time and the system does not boot, an error message will be displayed and you will again be asked to...

PRESS F1 TO CONTINUE, DEL TO ENTER SETUP

4.2 Using Setup

In general, you use the arrow keys to highlight items, press <Enter> to select, use the <PageUp> and <PageDown> keys to change entries, press <F1> for help and press <Esc> to quit. The following table provides more detail about how to navigate in the Setup program using the keyboard.

Up arrow	Move to previous item
Down arrow	Move to next item
Left arrow	Move to the item in the left hand
Right arrow	Move to the item in the right hand
Esc key	Main Menu -- Quit and not save changes into CMOS Status Page Setup Menu and Option Page Setup Menu -- Exit current page and return to Main Menu
PgUp key	Increase the numeric value or make changes
PgDn key	Decrease the numeric value or make changes
+ key	Increase the numeric value or make changes
- key	Decrease the numeric value or make changes
F1 key	General help, only for Status Page Setup Menu and Option Page Setup Menu
(Shift)F2 key	Change color from total 16 colors. F2 to select color forward, (Shift) F2 to select color backward
F3 key	Calendar, only for Status Page Setup Menu
F4 key	Reserved
F5 key	Restore the previous CMOS value from CMOS, only for Option Page Setup Menu
F6 key	Load the default CMOS value from BIOS default table, only for Option Page Setup Menu
F7 key	Load the default
F8 key	Reserved
F9 key	Reserved
F10 key	Save all the CMOS changes, only for Main Menu

4.2.1 Getting Help

Press F1 to pop up a small help window that describes the appropriate keys to use and the possible selections for the highlighted item. To exit the Help Window press <Esc> or the F1 key again.

4.3 Main Menu

Once you enter the Award BIOS CMOS Setup Utility, the Main Menu will appear on the screen. The Main Menu allows you to select from several setup functions and two exit choices. Use the arrow keys to select among the items and press <Enter> to enter the sub-menu.

▶ Standard CMOS Features	▶ Frequency/Voltage Control	
▶ Advanced BIOS Features	Load Fail-Safe Defaults	
▶ Advanced Chipset Features	Load Optimized Defaults	
▶ Integrated Peripherals	Set Supervisor Password	
▶ Power Management Setup	Set User Password	
▶ PnP/PCI Configurations	Save & Exit Setup	
▶ PC Health Status	Exit Without Saving	
Esc : Quit	F9 : Menu in BIOS	↑↓→← : Select Item
F10 : Save & Exit Setup		
Time, Date, Hard Disk Type...		

NOTE: *A brief description of the highlighted choice appears at the bottom of the screen.*

4.4 Standard CMOS Setup

The Standard Setup is used for the basic hardware system configuration. The main function is for Data/Time and Floppy/Hard Disk Drive settings. Please refer to the following screen for the setup. When the IDE hard disk drive you are using is larger than 528MB, you must set the HDD mode to **LBA** mode. Please use the IDE Setup Utility in BIOS SETUP to install the HDD correctly.

4.6 Advanced Chipset Setup

This section allows you to configure the system based on the specific features of the installed chipset. This chipset manages bus speeds and the access to the system memory resources, such as DRAM and the external cache. It also coordinates the communications between the conventional ISA and PCI buses. It must be stated that these items should never be altered. The default settings have been chosen because they provide the best operating conditions for your system. You might consider and make any changes only if you discover that the data has been lost while using your system.

4.8 PCI / Plug and Play Setup

This section describes configuring the PCI bus system. PCI, or Personal Computer Interconnect, is a system that allows I/O devices to operate at speeds nearing the speed the CPU itself uses when communicating with its own special components. This section covers some very technical items and it is strongly recommended that only experienced users should make any changes to the default settings.

4.9 Peripheral Setup

The IDE hard drive controllers can support up to four separate hard drives. These drives have a master/slave relationship that is determined by the cabling configuration used to attach them to the controller. Your system supports two IDE controllers--a primary and a secondary--so you can install up to four separate hard disks.

Chapter 5

Software Utilities

This chapter contains the detailed information of IDE, VGA, LAN and Audio driver installation procedures. The utility disk that came with the delivery package contains an auto-run program that invokes the installation programs for the VGA, LAN and Audio drivers. The following sections describe the installation procedures of each driver based on Win 95/98, Win 2000 and Win NT operating systems. It is recommended that you install the drivers matching the sections listed in this chapter.

5.1 IDE Driver Installation

5.1.1 Installing Intel Chipset Software Utility

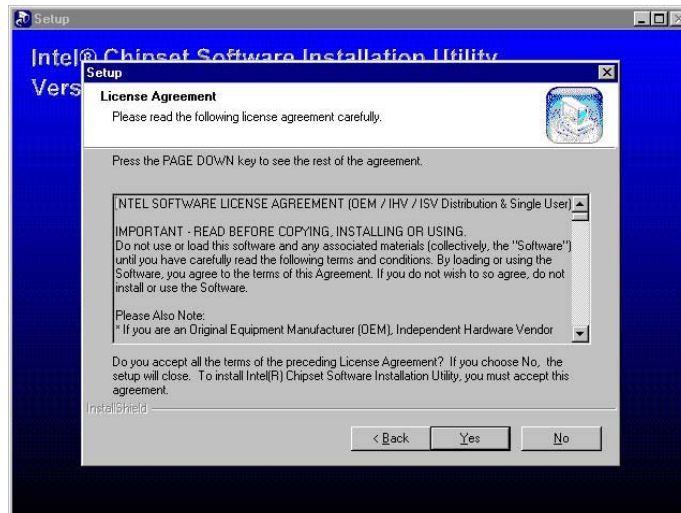

1. Insert Utility CD Disk to your CD ROM drive. The main menu will pop up as shown below. Select on the **HS-4701** button to launch the installation program.
2. Click on the **ICH4 Driver** button to continue.

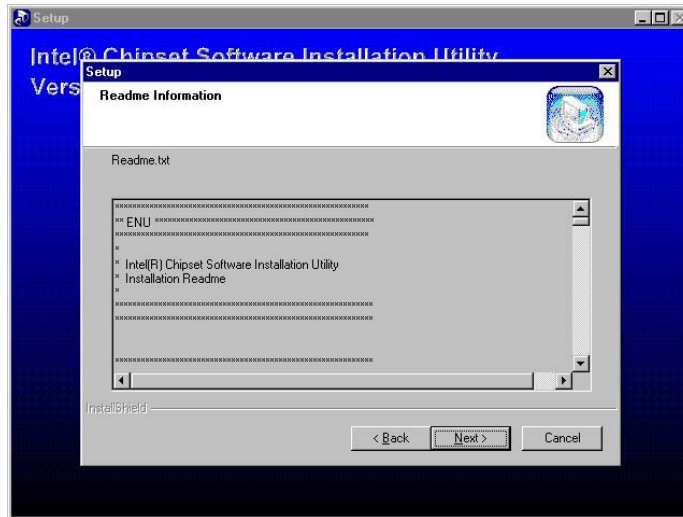

3. Immediately after clicking the IDE button in Step 1, the program launches the InstallShield Wizard that will assist you in the installation process. Click on the **Next >** button to proceed.

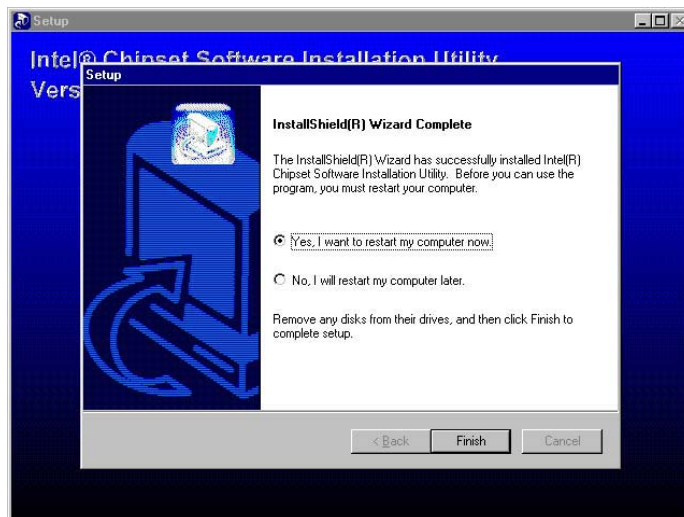

4. The Intel OEM Software License Agreement dialog box then appears on the screen. Choose **Yes** to proceed.

5. When the Readme Information dialog box pops up, just click on the **Next** button to proceed.

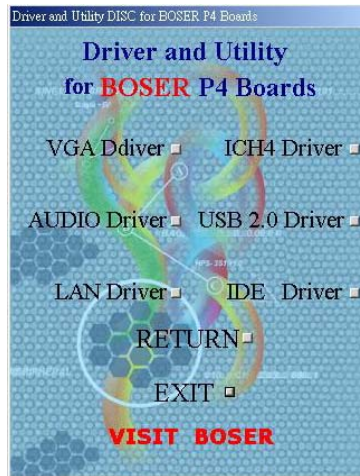

6. Once the Install Shield Wizard finishes updating your system, it will prompt you to restart the computer. Tick on the **Yes, I want to restart my computer now** followed by a click on the **Finish** button to reboot. Only after your computer boots will the new settings take effect.

5.1.2 Installing Intel Application Accelerator

1. Insert Utility CD Disk to your CD ROM drive. The main menu will pop up as shown below. Select on the **HS-4701** button to launch the installation program.
2. Click on the **IDE Driver** button to continue.

3. When the dialog box below appears, make sure you close all other Windows applications then click on the **Next >** button to proceed.

4. The Intel OEM Software License Agreement dialog box then appears on the screen. Choose **Yes** to proceed.

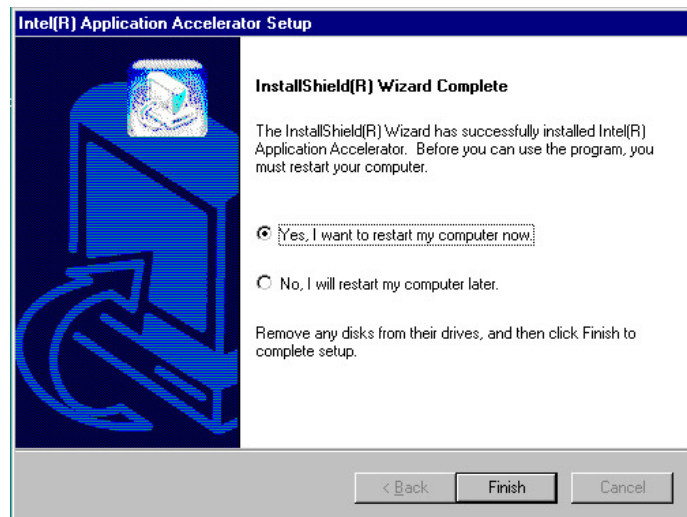

5. Setup will then prompt you to specify the path where you would like the Security driver installed. Select the **Next >** button after you have made your path/installation choice.

6. Once the setup program finishes copying files into your system, it will prompt you to restart the computer. Tick on the **Yes, I want to restart my computer now** followed by a click on the **Finish**

button to reboot. Only after your computer boots will the new settings take effect.

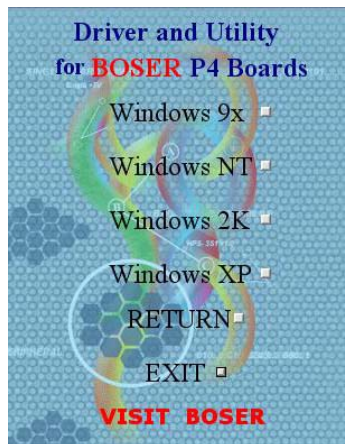

5.2 VGA Driver Installation

5.2.1 Win 98

1. Insert Utility CD Disk to your CD ROM drive. The main menu will pop up as shown below. Select on the **HS-4701** button to launch the installation program.
2. Click on the **VGA Driver** button to continue.

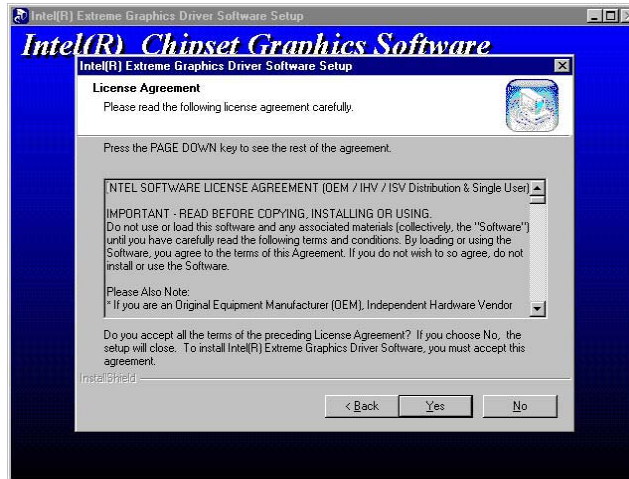

3. Click on the **Windows 9x** button to continue.

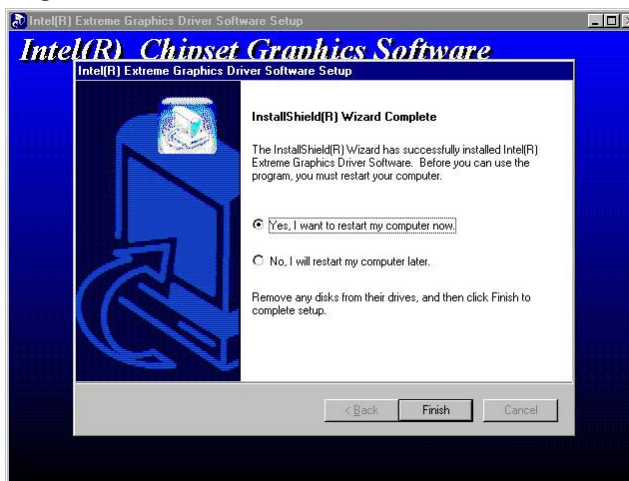

4. When the dialog box below appears, make sure you close all other Windows applications then click on the **Next >** button to proceed.

5. The Intel OEM Software License Agreement dialog box then appears on the screen. Choose **Yes** to proceed.

6. Once the setup program finishes copying files into your system, it will prompt you to restart the computer. Tick on the **Yes, I want to restart my computer now** followed by a click on the **Finish** button to reboot. Only after your computer boots will the new settings take effect.

NOTE: *Installation procedure for Windows 98 is similar to Windows95.*

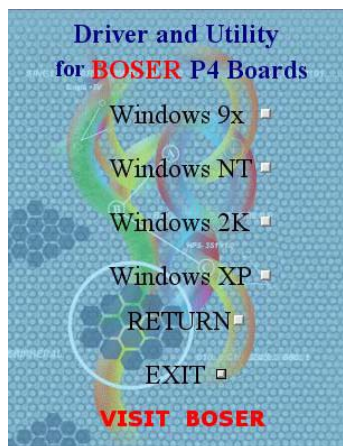

5.2.2 Win NT

NOTE: Please make sure you have already install **Service Pack 6.0**.

1. Insert Utility CD Disk to your CD ROM drive. The main menu will pop up as shown below. Select on the **HS-4701** button to launch the installation program.
2. Click on the **VGA Driver** button to continue.

3. Click on the **Windows NT** button to continue.

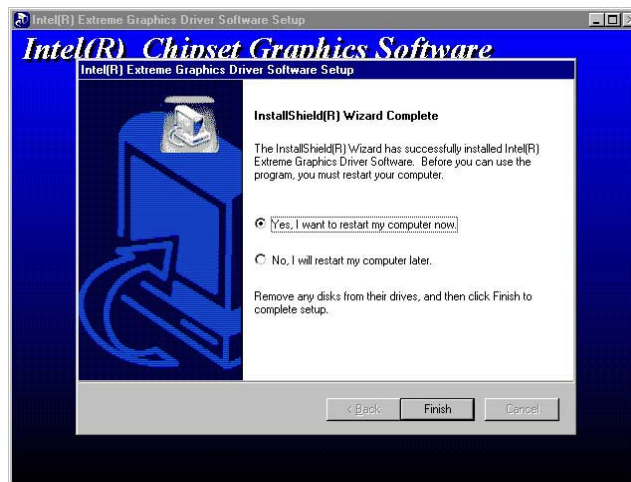

4. When the dialog box below appears, make sure you close all other Windows applications then click on the **Next >** button to proceed.

5. The Intel OEM Software License Agreement dialog box then appears on the screen. Choose **Yes** to proceed.

- Once the setup program finishes copying files into your system, it will prompt you to restart the computer. Tick on the **Yes, I want to restart my computer now** followed by a click on the **Finish** button to reboot. Only after your computer boots will the new settings take effect.

5.2.3 Win 2000

- Insert Utility CD Disk to your CD ROM drive. The main menu will pop up as shown below. Select on the **HS-4701** button to launch the installation program.
- Click on the **VGA Driver** button to continue.

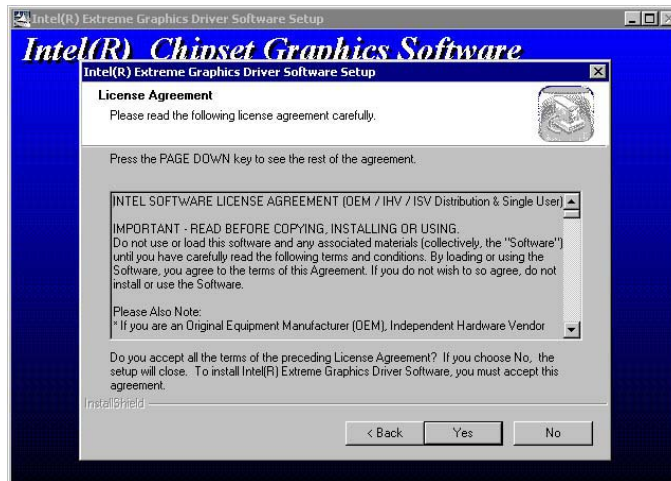

3. Click on the **Windows 2K** button to continue.

4. When the dialog box below appears, make sure you close all other Windows applications then click on the **Next >** button to proceed.

5. The Intel OEM Software License Agreement dialog box then appears on the screen. Choose **Yes** to proceed.

6. Once the setup program finishes copying files into your system, it will prompt you to restart the computer. Tick on the **Yes, I want to restart my computer now** followed by a click on the **Finish** button to reboot. Only after your computer boots will the new settings take effect.

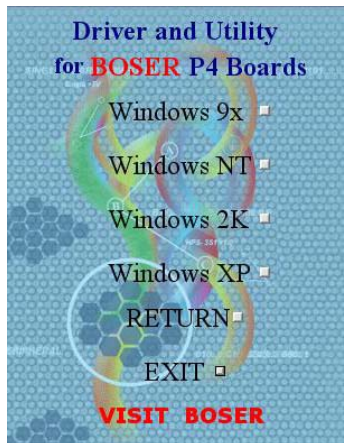

5.3 LAN Driver Installation

5.3.1 Win 95/98

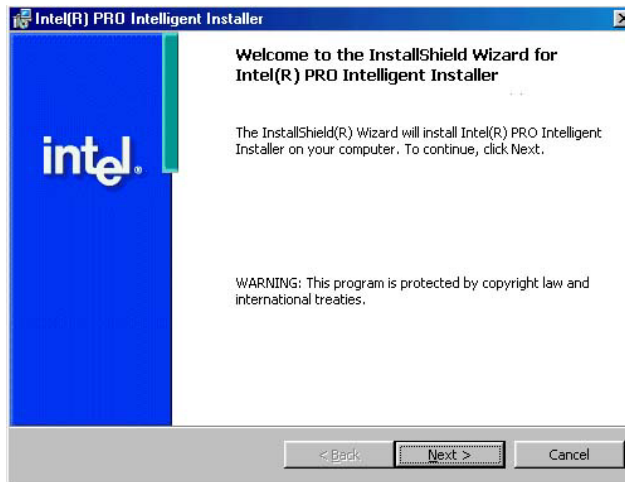

1. Insert Utility CD Disk to your CD ROM drive. The main menu will pop up as shown below. Select on the **HS-4701** button to launch the installation program.
2. Click on the **LAN Driver** button to continue.

3. Click on the **Windows 9x** button to continue.

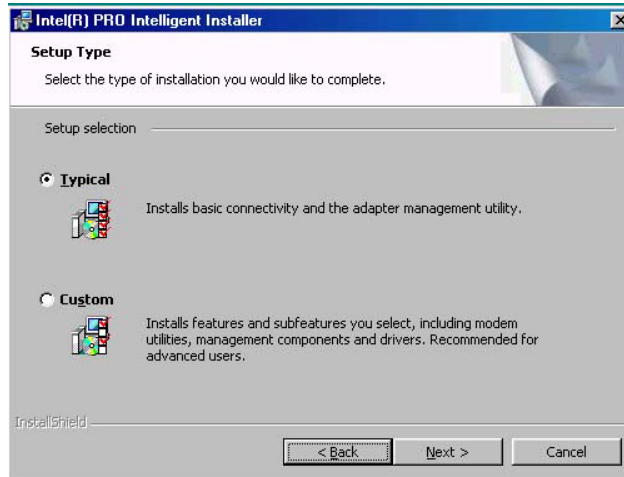

4. When the dialog box below appears, make sure you close all other Windows applications then click on the **Next >** button to proceed.

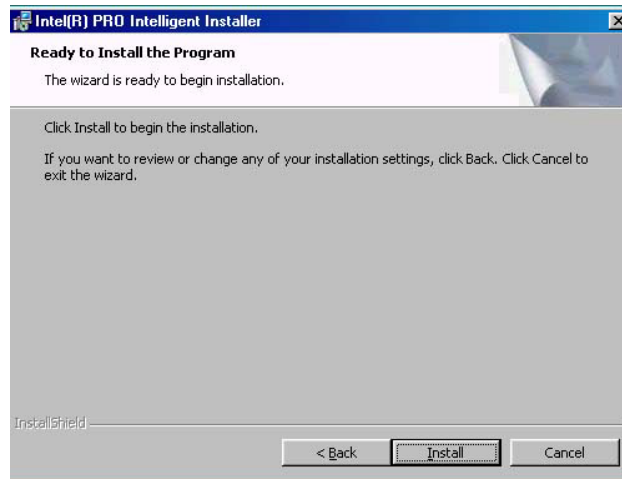

5. The Intel OEM Software License Agreement dialog box then appears on the screen. Choose **Accept** to proceed.

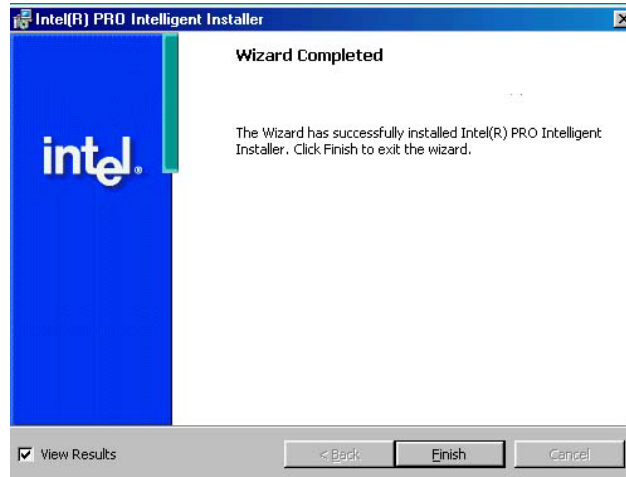

6. The Setup Type dialog box then appears on the screen. Choose **Typical** to proceed.

7. When the dialog box below appears, make sure you close all other Windows applications then click on the **Install** button to proceed.

- When the dialog box below appears, it means your driver is install completed. Click **Finish** button to proceed.

- Once the setup program finishes copying files into your system, it will prompt you to restart the computer. Tick on the **Yes** to reboot. Only after your computer boots will the new settings take effect.

5.3.2 Win NT

NOTE: Please make sure you have already install **Service Pack 6.0**.

- The system automatically detects the absence of Windows NT Networking. Click on the **Yes** button to start installation.

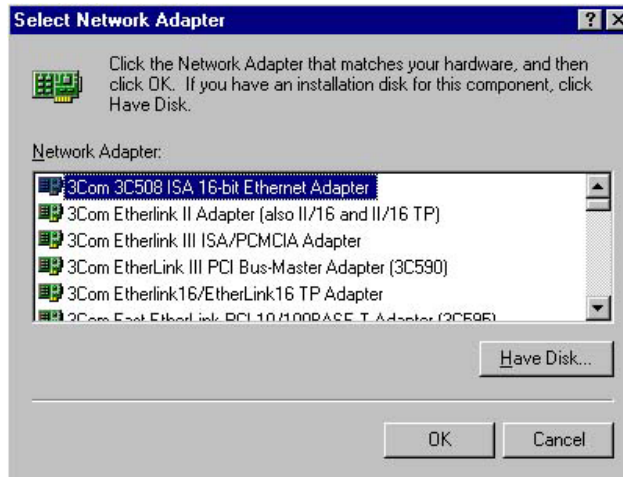

2. Tick on the **Wired to Network** once the following screen appears. Click on the Next to proceed.

3. Click on the **Start Search** button for the program to locate the Network Adapter.

- Once setup finishes the search, it will list a number of adapters for you to choose from. Press on the **Have Disk** button to assign the driver path location.

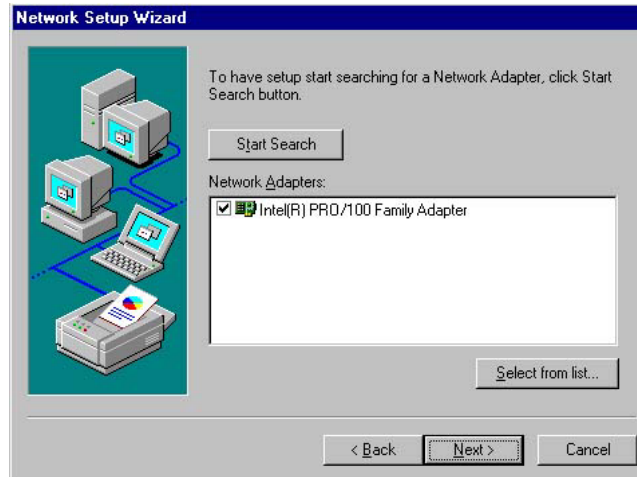

- Setup now asks you for the location of the driver. When you have entered the new driver path, press on the **OK** button to continue.

- When Setup finds the information it needs about the new driver, it will display the device it found on the following screen. Please choose "**Intel(R) PRO/100 Family Adapter**". Press on the **OK** button to accept and proceed.

- Setup then returns to Network Setup Wizard screen and displays your new Network Adapter. Click on **Next** to continue.

- The Network Setup Wizard then allows you to set the Network Protocols on your network. Select the appropriate protocol and then click on Next to continue.

9. Before Setup starts installing the components found and the settings you made, it will give you the option to proceed or go back for changes from the following screen. Click on the **Next** button once you are sure of your devices.

10. Windows NT Setup will then need to copy files necessary to update the system information. Specify the path then press **Continue**.

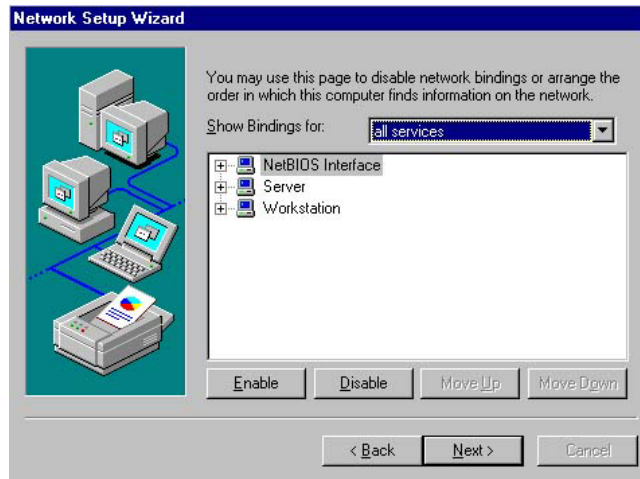

11. When Setup asks if you wish to change the TCP/IP settings of your system, select the appropriately. The default choice is **No**.

12. Setup then starts the Networking installation and copies the files.

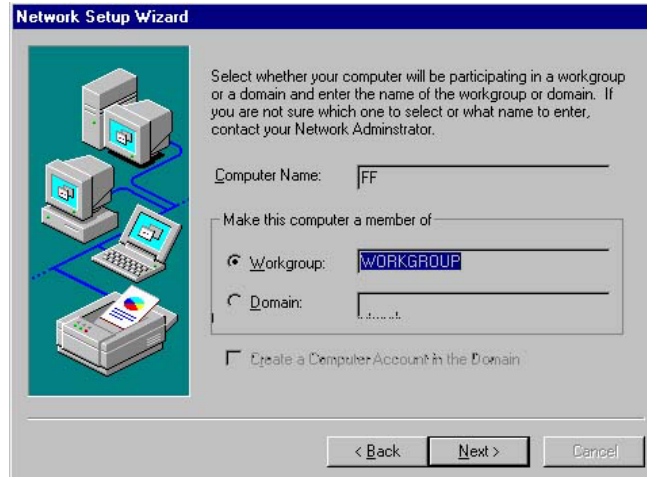

13. When the screen below appears, click on **Next** to continue.

14. Setup then prompts you that it is ready to start the network. You may complete the installation thereafter. Click on **Next** to continue.

15. Assign the workgroup or domain setting of your computer. Click on Next to continue.

16. Click on the **Yes** button to restart your computer. The LAN driver installation for WIN NT4.0 is now complete.

5.4 Audio Driver Installation

1. Insert Utility CD Disk to your CD ROM drive. The main menu will pop up as shown below. Select on the **HS-4701** button to launch the installation program.

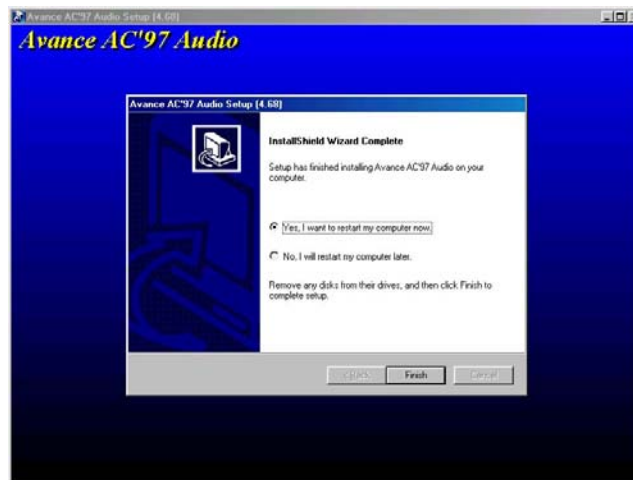

2. Click on the **AUDIO Driver** button to continue.

3. When the dialog box below appears, make sure you close all other Windows applications then click on the **Next >** button to proceed.

4. Once the InstallShield Wizard completes the operation and update of your AC97 driver, it will ask you to remove disks from their drives, and prompt you to restart your system. Tick on the Yes, I want to restart my computer now. Afterwards, click on the **Finish** button to complete the installation process. The system changes you made will take effect after the system restarts.
