

110 WATT SWITCHING POWER SUPPLIES

DESCRIPTION

The PU110 series of compact, open PCB constructed, AC-DC switching power supplies are capable of delivering 110 watts of continuous power at 25CFM forced air cooling or 80 watts at convection cooling. They operate at 85 to 264 VAC input voltage without the need of a selector strap. They are ideally suited for use in small to medium size digitally-based systems, such as point-of-sale equipment, microprocessor based systems, and telecom equipment. All models meet the safety requirements of UL, CSA and IEC.

Overvoltage protection: Provided on output #1 only; set at 112-132 % of its nominal output voltage
Overcurrent protection: All outputs protected to short circuit conditions

 (2) 110 watts maximum at 25 CFM forced air cooling or 80 watts maximum at convection cooling, except model PU110-10-1A which is rated maximum 60W at convection cooling or 72W at 25 CFM forced air cooling.
 (3) Safety agency approvals are for the above listed models in PCB format. To order models with metallic L-bracket or box, change suffix "A" to "B" for L-bracket format, to "C" for enclosed format (mechanical details shown in page 7-2), e.g. PU110-31C.
 (4) The output #1 of model PU110-45-1A needs a minimum current of 2A to support the other outputs at their maximum rated loads.
