

## N-Channel Depletion-Mode Vertical DMOS FETs

### Ordering Information

| BV <sub>DSX</sub> /<br>BV <sub>DGX</sub> | R <sub>DS(ON)</sub><br>(max) | I <sub>DSS</sub><br>(min) | Order Number / Package |           |          |
|------------------------------------------|------------------------------|---------------------------|------------------------|-----------|----------|
|                                          |                              |                           | TO-236AB**             | TO-243AA* | Die***   |
| 350V                                     | 35Ω                          | 180mA                     | DN3135K1               | DN3135N8  | DN3135NW |

\* Same as SOT-89. Products shipped on 2000 piece carrier tape reels.

\*\* Same as SOT-23. Products shipped on 3000 piece carrier tape reels.

\*\*\* Die in wafer form.

Product marking for TO-243AA:

DN1S\*

Where \* = 2-week alpha date code

Product marking for SOT-23:

N1S\*

Where \* = 2-week alpha date code

### Features

- ☐ High input impedance
- ☐ Low input capacitance
- ☐ Fast switching speeds
- ☐ Low on resistance
- ☐ Free from secondary breakdown
- ☐ Low input and output leakage

### Applications

- ☐ Normally-on switches
- ☐ Solid state relays
- ☐ Converters
- ☐ Linear amplifiers
- ☐ Constant current sources
- ☐ Power supply circuits
- ☐ Telecom

### Absolute Maximum Ratings

|                                   |                   |
|-----------------------------------|-------------------|
| Drain-to-Source Voltage           | BV <sub>DSX</sub> |
| Drain-to-Gate Voltage             | BV <sub>DGX</sub> |
| Gate-to-Source Voltage            | ± 20V             |
| Operating and Storage Temperature | -55°C to +150°C   |
| Soldering Temperature*            | 300°C             |

\* Distance of 1.6 mm from case for 10 seconds.

### Advanced DMOS Technology

These low threshold depletion-mode (normally-on) transistors utilize an advanced vertical DMOS structure and Supertex's well-proven silicon-gate manufacturing process. This combination produces devices with the power handling capabilities of bipolar transistors and with the high input impedance and positive temperature coefficient inherent in MOS devices. Characteristic of all MOS structures, these devices are free from thermal runaway and thermally-induced secondary breakdown.

Supertex's vertical DMOS FETs are ideally suited to a wide range of switching and amplifying applications where high breakdown voltage, high input impedance, low input capacitance, and fast switching speeds are desired.

### Package Options

10/23/00

Supertex Inc. does not recommend the use of its products in life support applications and will not knowingly sell its products for use in such applications unless it receives an adequate "products liability indemnification insurance agreement." Supertex does not assume responsibility for use of devices described and limits its liability to the replacement of devices determined to be defective due to workmanship. No responsibility is assumed for possible omissions or inaccuracies. Circuitry and specifications are subject to change without notice. For the latest product specifications, refer to the Supertex website: <http://www.supertex.com>. For complete liability information on all Supertex products, refer to the most current databook or to the Legal/Disclaimer page on the Supertex website.

## Thermal Characteristics

| Package  | $I_D$ (continuous)* | $I_D$ (pulsed) | Power Dissipation<br>@ $T_A = 25^\circ\text{C}$ | $\theta_{jc}$<br>$^\circ\text{C/W}$ | $\theta_{ja}$<br>$^\circ\text{C/W}$ | $I_{DR}^*$ | $I_{DRM}$ |
|----------|---------------------|----------------|-------------------------------------------------|-------------------------------------|-------------------------------------|------------|-----------|
| TO-236AB | 72mA                | 300mA          | 0.36W                                           | 200                                 | 350                                 | 72mA       | 300mA     |
| TO-243AA | 135mA               | 300mA          | 1.3W †                                          | 34                                  | 97†                                 | 135mA      | 300mA     |

\*  $I_D$  (continuous) is limited by max rated  $T_J$ .

† Mounted on FR4 board, 25mm x 25mm x 1.57mm. Significant  $P_D$  increase possible on ceramic substrate.

## Electrical Characteristics (@ $25^\circ\text{C}$ unless otherwise specified)
