

T-1 (3 mm) Round, Single- and Bi-color PCB Mount Right Angle LED Indicator, G96XB Series

The G96B right angle indicator is primarily designed to use the three-leaded bi-color LED lamp which has pins spaced on 2.54 mm centers in a single row. It has a wide stance and its length permits the front of the holder to protrude further from the edge of the PCB. In addition to those LEDs listed, any of IDEA's 2151 series of T-1 lamps can be used in this indicator. Standard 3-leaded bi-color lamps are common cathode.
