SDM5 7P/180D Slim2(H)

Overview

Apacer's SDM5 (SATA Disk Module 5) 7P/180D Slim2(H) is our next generation disk-on-module (DOM) series that offer elevated speed boost and higher error correction capabilities. Built with SATA 6.0 Gb/s interface, SDM5 delivers exceptional performance in data transfer.

With its SATA interface compliance and compact size, this high-speed disk module defines an ideal balance of performance, capacities, reliability and cost. SDM5 is effective in boot industrial applications and light operating systems for specific operations, while with some extra memory space for data storage. The architectural nature of SATA disk module provides higher resistance to external environmental influences and better flexibility for motherboard space.

Regarding data reliability, SDM5 is built in with powerful ECC engine that can correct up to 40-bit per 1KB data. In addition, the controller unit of this DOM device supports wear-leveling, SMART and power failure management for data integrity. With its trustable reliability, performance and cost effectiveness, Apacer's SDM5 is definitely the ideal storage or cache solution for embedded and industrial computers, servers and thin clients.
