

LUXEON CoB

Uniform, High Efficacy and Easy-to-Design Array

Introduction

Philips Lumileds high uniformity array solution is a new breakthrough in efficacy for arrays. Due to its industry leading small Light Emitting Surfaces (LES), LUXEON CoB arrays are very easy to work with and will enable easier and less expensive designs. All LUXEON CoBs are available in 3-Step as well as 5-Step MacAdam Ellipse, ensuring uniform optical performance in general lighting applications. Next to that, LUXEON CoB LEDs are all hot-tested at 85°C—real world operating conditions—which means that luminaire design is simplified and testing can be minimized.

This document contains the performance data needed to design and engineer LUXEON CoB based applications.

Features

- Efficacy: >130 lm/W, 35.5 V
- Lumen packages from 1000 to >7000 lm
- Industry smallest LES (Light Emitting Surface)
- Industry leading thermal resistance
- Best luminous and color uniformity
- Binned within 3-Step and 5-Step MacAdam Ellipse
- Tested at $T_j = 85^\circ\text{C}$
- Robust MCPCB solution
- Mouse-bites available for M2-M3 screws
- Supported by a comprehensive optical, mechanical, and electrical ecosystem

Benefits

- Breakthrough in LED efficacy
- Enabling halogen and CDM replacement
- Enables smaller and less expensive reflectors
- Enables smaller heatsinks in your system
- More uniform and crisp light beams
- Enabling luminaire to luminaire consistency
- Real world application testing
- Easy to handle in manufacturing and operations
- Easy to screw down the arrays
- Drivers, holders and optics readily available

General Information

Product Nomenclature

LUXEON CoB is tested and binned hot at $T_j = 85^\circ\text{C}$ with a current pulse duration of 20ms.

The part number designation is explained as follows:

L H C A – B B C C – D D E E

Where:

A — designates the generation of the product family

B B — designates ANSI color point (e.g. 30 for 3000K)

C C — designates minimum CRI level (e.g. 80 for minimum 80 CRI)

D D E E — designates product configuration (e.g. 1203 for the 1000–2000 lm package)

Therefore 3000K, 80 CRI LUXEON CoB products will be:

L H C 1 – 3 0 8 0 – 1 2 0 3

Average Lumen Maintenance Characteristics

Lumen maintenance for solid-state lighting devices (LEDs) is typically defined in terms of the percentage of initial light output remaining after a specified period of time. Philips Lumileds projects that LUXEON CoB will deliver—on average—70% lumen maintenance (L70) at 50,000 hours of operation at its nominal, tested conditions. Observation of design limits included in this data sheet is required in order to achieve this projected lumen maintenance

Environmental Compliance

Philips Lumileds is committed to providing environmentally friendly products to the solid-state lighting market. LUXEON CoB is compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS and REACH directives. Philips Lumileds will not intentionally add the following restricted material to the LUXEON CoB: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).

5700K	LHC1-5770-1208	70	73	900	3700	4100	130	15

Notes for Table 1:

1. Philips Lumileds maintains a tolerance of ±6.5% on luminous flux, ±2 on CRI.
2. Light Emitting Surface (LES) is the inner diameter (phosphor area) inside the dam.

Table 2. Optical Characteristics

Nominal CCT	Typical Total Included Angle ^[1] (degrees)	Typical Viewing Angle ^[1]
	$\theta_{0.90V}$	$2\theta^{1/2}$
LHC1 - xxxx - xxxx	125	100

Notes for Table 2:

1. Total angle at which 90% of total luminous flux is captured.
2. Viewing angle is the off axis angle from lamp centerline where the luminous intensity is 1/2 of the peak value.

Electrical Characteristics

Table 3. Electrical Characteristics

Nominal CCT	Part Number	Forward Voltage V, 85°C (V)			Typical Temperature Coefficient of Forward Voltage ^[1] (mV/°C) $\Delta V_F / \Delta T_J$	Typical Thermal Resistance Junction to Case ^[2] (°C/W) $R_{\theta_{J-C}}$
		Minimum	Typical	Maximum		
2700K to 5700K	LHC1-xxxx-1202	33	35.5	38	-16	0.67
2700K to 5700K	LHC1-xxxx-1203	33	35.5	38	-16	0.49
2700K to 5700K	LHC1-xxxx-1204	33	35.5	38	-16	0.40
2700K to 5700K	LHC1-xxxx-1205	33	35.5	38	-16	0.32
2700K to 5700K	LHC1-xxxx-1208	33	35.5	38	-16	0.22

Notes for Table 3:

1. Measured between $T_1 = 25^\circ\text{C}$ and $T_1 = 105^\circ\text{C}$ at test current.
2. Junction temperature to back of PCB.

Absolute Maximum Ratings

Table 4. Operating Condition and Ratings

Parameter	Maximum Performance
DC Forward Current	2x test current ^[2]
ESD Sensitivity	< 8000V Human Body Model (HBM) Class 3A JESD22-A114-E < 400V Machine Model (MM) Class B JESD22-A115-B
Storage Temperature	-40°C - 120°C
LED Junction Temperature ^[1]	125°C
Operating Case Temperature at Nominal Current	-40°C - 105°C
Reverse Voltage	LUXEON CoB is not designed to be driven in reverse bias

Notes for Table 4:

1. Proper current derating must be observed to maintain junction temperature below the maximum, please see preliminary application brief for additional information on thermal measurement guidelines.
2. Residual periodic variations due to power conversion from alternating current (AC) to direct current (DC), also called "ripple", with frequencies ≥ 100 Hz and amplitude $\pm 20\%$ are acceptable, assuming the average current throughout each cycle does not exceed 2x test If.

Who We Are

Philips Lumileds focuses on one goal: Creating the world's highest performing LEDs. The company pioneered the use of solid-state lighting in breakthrough products such as the first LED backlit TV, the first LED flash in camera phones, and the first LED daytime running lights for cars. Today we offer the most comprehensive portfolio of high quality LEDs and uncompromising service.

Philips Lumileds brings LED's qualities of energy efficiency, digital control and long life to spotlights, downlights, high bay and low bay lighting, indoor area lighting, architectural and specialty lighting as well as retrofit lamps. Our products are engineered for optimal light quality and unprecedented efficacy at the lowest overall cost. By offering LEDs in chip, packaged and module form, we deliver supply chain flexibility to the inventors of next generation illumination.

Philips Lumileds understands that solid state lighting is not just about energy efficiency. It is about elegant design. Reinventing form. Engineering new materials. Pioneering markets and simplifying the supply chain. It's about a shared vision. Learn more about our comprehensive portfolio of LEDs at www.philipslumileds.com.
