

PXI Chassis with Integrated Signal Conditioning

NEW

NI PXI-1050, NI PXI-1052

- Integrated SCXI signal conditioning
- Ideal for high-channel-count data acquisition applications
- Built-in cabling to SCXI slots
- HALT tested for increased reliability

PXI-1050

- 8 PXI slots and 4 SCXI slots
- Multiplexed and parallel operating modes for SCXI
- Latest chassis technology

PXI-1052

- 4 PXI slots and 8 SCXI slots
- Latest chassis technology
- AUTO/HIGH fan-speed selector to optimize cooling and acoustic emissions
- Quieter operation, as low as 42 dBA
- Extended temperature range to 55 °C
- Multiplexed operating mode for SCXI
- SCXI high-voltage analog backplane integrated internally

Model	Slots		SCXI Operation Mode	High-Voltage Analog Backplane
	PXI	SCXI		
PXI-1050	8	4	Multiplexed and Parallel	—
PXI-1052	4	8	Multiplexed	✓

Table 1. PXI-1050 and PXI-1052 Features

Overview

National Instruments offers PXI chassis with integrated SCXI so you can have the benefits of SCXI and the PXI platform integrated in a single PXI chassis. The PXI platform offers a variety of modules such as multifunction I/O, digital I/O, switching, and instrument modules. With SCXI you can expand the functionality of your data acquisition system with modules for multiplexing, linearization, filtering, isolation, amplification, switching, and more. The NI PXI and SCXI combination chassis offer a complete solution for a wide range of test and measurement applications that require signal conditioning, switching and multiplexing. Visit the PXI/SCXI advisor at ni.com/pxiadvisor to view a complete list of SCXI modules and configure a PXI and SCXI system.

PXI-1050, PXI-1052

The PXI-1050 and PXI-1052 offer the latest chassis technology from NI. The PXI-1050 is an upgrade to the PXI-1010, and works with all NI PXI controllers. The PXI-1052 implements fan-speed control of the power supply and module fans to reduce acoustic emissions, and offers an AUTO/HIGH fan-speed selector switch. When set to AUTO, the PXI-1052 optimizes cooling and acoustic emissions based on air intake temperature.

PXI-1052 Acoustic Emissions

Sound Pressure Level ¹ (measured at operator position)	dBA
Auto Fan (25 °C ambient)	41.6
High Fan	51.5
Sound Power ¹	
Auto Fan (25 °C ambient)	51.9
High Fan	60.0

¹Tested in accordance with ISO 7779

Table 2. PXI-1052 Acoustic Emissions

SCXI Operating Modes

NI PXI chassis with integrated SCXI provide a built-in digital and analog bus between the rightmost PXI slot and the SCXI subsystem so that a DAQ or DMM module can control the SCXI subsystem in multiplexed mode without external cabling. Using the PXI-1050, you can also connect additional PXI DAQ modules to SCXI modules in parallel mode (requires additional cabling). In multiplexed mode, one DAQ module controls the entire SCXI subsystem; all measurements are multiplexed back to this one device so users can create a cost-effective high-channel-count system. SCXI handles many types of sensor measurements, including voltages, resistances, thermocouples, strain gages, accelerometers, RTDs, and LVDTs.

Software for Configuring Your System

National Instruments is a leading supplier of integrated hardware and software for test and measurement applications. With software such as Measurement & Automation Explorer (MAX), you can easily configure your PXI/SCXI system. Using LabVIEW and NI-DAQ, you can quickly configure your measurement and begin acquiring signals. MAX automatically detects which PXI and SCXI modules are installed in your system so you can configure your measurements. In Figure 1, MAX is used to configure measurements.

PXI Chassis with Integrated Signal Conditioning

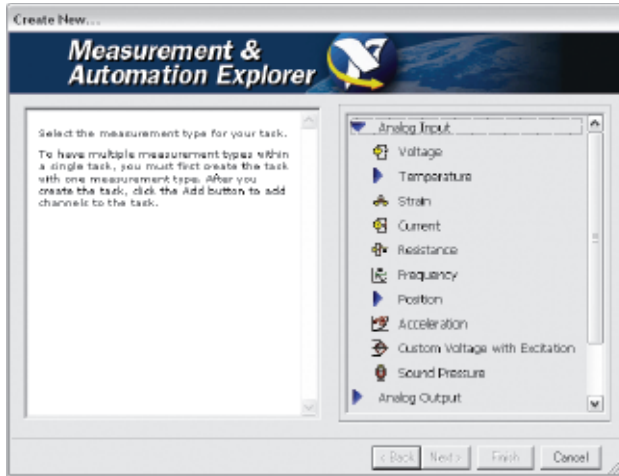

Figure 1. Use MAX to select your measurement type.

Automatic Code Generation

With LabVIEW and NI-DAQ 7.0 or later, you can use NI-DAQ Express VIs to configure your measurement type, as shown in Figure 1, and then automatically generate the code necessary to acquire that measurement. With the flexibility of PXI, the benefits of SCXI, and easy-to-use software such as MAX and LabVIEW, you can take full advantage of flexible hardware and software from National Instruments, to develop robust applications to meet your measurement needs.

Installation

The PXI-1050 and PXI-1052 have differentiated designs that make them ideally suited for different environments. For benchtop use, the PXI-1052 has supporting feet that easily tilt up. You can also set the feet to level the chassis with the benchtop, or completely remove them. The PXI-1050 comes with removable rubber feet for benchtop applications. Both chassis offer mounting points located on each side of the chassis, to which you can attach optional rack-mount kits. You can also use them to recess the PXI-1050 or PXI-1052 chassis in your instrument cabinet. The PXI-1052 is well suited for portable applications, with a built-in carrying handle. It also has the SCXI high-voltage analog back plane (HVAB) built in. All of these configurations can be assembled or disassembled without accessing the interior of the chassis.

Ordering Information

Step 1. Select your chassis.

NI PXI-1050	
120 VAC	779199-01
100 VAC	779199-02
220 VAC	779199-03
240 VAC	779199-04
NI-PXI-1052 (universal input)	778693-01

Step 2. Select one or more power cords.

U.S. 120 VAC	763000-01
Japan 100 VAC	763000-01
United Kingdom 240 VAC	763064-01
Swiss 220 VAC	763065-01
Australian 240 VAC	763066-01
Universal Euro 240 VAC	763067-01
North American 240 VAC	763068-01

Step 3. Select additional accessories.

SCXI-1370 Rack Mount kit for the	
SCXI-1001 or PXI-1050 chassis	776577-70
SCXI-1360 rront filler panel	776576-60
SCXI-1361 rear filler panel	776576-61
SCXI-1374 handle kit	776577-74

PXI-1052 rront rack-mount kit	
(for 19 in. rack)	778931-01
PXI-1052 rear rack-mount kit	
(for 19 in. rack)	778931-02
EMC filler panels (6 single-slot)	778700-01
Filler panels (3 double-slot and	
3 single-slot) ¹	778679-01
Slot blockers (2 single-slot) ²	778678-01

¹Every PXI-1052 chassis comes with two single-slot filler panels.

²Slot blockers are optional for improved thermal performance of your PXI-1052 system. Please refer to National Instruments KnowledgeBase entry on slot blocker usage criteria on ni.com/support for additional information on this optional system feature.

Step 4. Select system setup and installation services.

If you are ordering this chassis as part of a system, select NI Factory Installation Services to have your hardware/software installed and receive your new PXI system ready to use right out of the box.

PXI Chassis with Integrated Signal Conditioning

Specifications PXI-1050

Complies with PXI Specification, Rev 2.1

Electrical

AC Power Supply

AC Input

Input voltage range 100/120/220/240 VAC
 Input frequency 50/60 Hz
 Operating frequency range 47 to 63 Hz

DC Output – Available Power Per Rail

Voltage (V)	I _{MP} (steady-state current) (A)
+3.3	30
+5	20
+12	4
-12	2

Maximum Ripple and Noise

Voltage (V)	Maximum Ripple and Noise (mV _{pp})
+3.3	50
+12	120
+5	50
-12	120

Cooling

Per slot cooling capacity 25 W per slot
 Module cooling system Forced air circulation (positive pressurization) through two fans
 Module cooling intake Bottom rear of chassis
 Module cooling exhaust Top sides of chassis
 Power supply cooling system Forced air circulation from integrated fan
 Power supply cooling intake Rear of chassis
 Power supply cooling exhaust Sides of chassis

Physical

Dimensions 41.3 by 43.8 by 16.2 cm [16.2 by 17.3 by 7.0 in.]
 Height for rack-mount installation 4U
 Weight 13 kg [29 lb]

Mean Time Between Failures (MTBF) 110,000 hours (Predictions performed in accordance with Belcore methods)

Operating Environment

Ambient temperature 0 to 50 °C (Meets IEC 60068-2-1 and IEC 60068-2-2.)
 Relative humidity 10 to 90%, noncondensing (Meets IEC 60068-2-56.)

Storage Environment

Ambient temperature -20 to 70 °C (Meets IEC 60068-2-1 and IEC 60068-2-2.)
 Relative humidity 5 to 95%, noncondensing (Meets IEC 60068-2-56.)

Shock and Vibration

Operational shock 30 g peak, half-sine, 11 ms pulse (Tested in accordance with IEC-60068-2-27. Test profile developed in accordance with MIL-PRF-28800F)

Random vibration
 Operating 5 to 500 Hz, 0.3 g_{rms}
 Nonoperating 5 to 500 Hz, 2.4 g_{rms} (Tested in accordance with IEC-60068-2-64. Nonoperating test profile exceeds the requirements of MIL-PRF-28800F, Class 3)

Safety and EMC/EMI Compliance

Safety EN 61010-1, IEC 61010-1, UL 61010-1, CAN/CSA C22.2 No. 61010.1
 EMC/EMI CE, C-Tick, and FCC Part 15
 Electrical Emissions EN 55011 Class A at 10 m, and FCC Part 15 Class A above 1 GHz
 Electrical Immunity EN 61326:1998, Table 1 A2:2001, Table 1

Specifications PXI-1052

Complies with PXI Specification, Rev 2.1
 Complies with CompactPCI, PICMG 2.0 R3.0

Electrical

AC Input

Input voltage range 100 to 240 VAC
 Operating voltage range 90 to 264 VAC
 Input frequency 50/60 Hz
 Maximum Usable Power 450 W

DC Output – Available Power Per Rail

Voltage (V)	I _{MP} (steady-state current) (A)	
	0 to 50 °C	50 to 55 °C
+3.3	12	12
+5	17	17
+12	2	2
-12	1	1
+20	1.36	1.16
-20	1.36	1.16

Maximum ripple and noise (20 MHz bandwidth)

Voltage (V)	Maximum Ripple and Noise (mV _{pp})
+3.3	50
+5	50
+12	120
-12	120
+20	200
-20	200

Over-current protection All outputs protected from short circuit and overload
 Over-voltage protection 115 to 140% above nominal output voltage

PXI Subsystem Cooling

Fans 1 @ 115 cfm, with filters
 Per slot cooling capacity 25 W with fan speed set to HIGH
 Slot airflow direction P1 to P2, bottom of module to top of module

Module cooling
 System Forced air circulation (positive pressurization) fan with HIGH/AUTO speed selector
 Exhaust Along both sides and top of chassis
 Power supply cooling
 System Forced air circulation through integrated fan
 Intake Right side of chassis
 Exhaust Left side of chassis

Sound Pressure Level (at Operator position)

(Tested in accordance with ISO 7779)
 Auto Fan (at 25°C ambient) 41.6 dBA
 High Fan 51.5 dBA

Sound Power

(Tested in accordance with ISO 7779)
 Auto Fan (at 25°C ambient) 51.9 dBA
 High Fan 60.0 dBA

Environment (Indoor use only)

Altitude 2,000 m
 Installation Category II
 Pollution Degree 2

PXI Chassis with Integrated Signal Conditioning

Operating Environment

Ambient temperature.....	0 to 55 °C (Tested in accordance with IEC-60068-2-1 and IEC-60068-2-2.)
Relative humidity	10 to 90% (Tested in accordance with IEC-60068-2-56.)

Storage Environment

Ambient temperature.....	-20 to 70 °C (Tested in accordance with IEC-60068-2-1 and IEC-60068-2-2.)
Relative humidity	5 to 95% noncondensing (Tested in accordance with IEC-60068-2-56.)

10 MHz System Reference Clock (PXI_CLK10)

Maximum clock skew between slots	250 ps
Built-in 10 MHz clock	
Accuracy	±25 ppm (guaranteed over the operating temperature range)
Maximum jitter.....	5 ps _{rms} in 10 Hz to 1 MHz range
External clock sources	
Connectors.....	BNC on rear of chassis (ground referenced) or Slot 2 J2
Input frequency.....	10 MHz ±100 ppm or better
Input amplitude	
Rear connector.....	200 mVpp to 5 Vpp, 10 MHz squarewave or sinewave
Slot 2.....	5 or 3.3 V, 10 MHz TTL signal
Input impedance	50±5 Ω (rear connector)
Maximum jitter introduced by backplane circuitry.....	1 ps _{rms} in 10 Hz to 1 MHz range

Shock and Vibration

Functional shock.....	30 g peak, half-sine, 11 ms pulse (Tested in accordance with IEC 60068-2-27. Test profile developed in accordance with MIL-T-28800E.)
-----------------------	---

Random Vibration

Operating.....	5 to 500 Hz, 0.31 g _{rms}
Nonoperating.....	5 to 500 Hz, 2.46 g _{rms} (Tested in accordance with IEC 60068-2-64)

Safety

This product is designed to meet the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:

- IEC 61010-1, EN 61010-1
- UL 3111-1, UL 61010B-1
- CAN/CSA C22.2 No. 1010.1

NOTE: For UL and other safety certifications, refer to the product label or to ni.com.

Electromagnetic Compatibility

Emissions.....	EN 55011 Class A at 10 m. FCC Part 15A above 1 GHz
Immunity.....	EN 61326-1:1997 + A1:1998, Table 1

CE, C-Tick and FCC Part 15 (Class A) Compliant

NOTE: For EMC compliance, operate this device with shielded cabling.

CE Compliance

This product meets the essential requirements of applicable European Directives, as amended for CE Marking, as follows:

Low-Voltage Directive (safety).....	73/23/EEC
Electromagnetic Compatibility Directive (EMC)	89/336/EEC

NOTE: Refer to the Declaration of Conformity (DoC) for this product for any additional regulatory compliance information. To obtain the DoC for this product, click Declarations of Conformity Information at ni.com/hardref.nsf/.

NI Services and Support

NI has the services and support to meet your needs around the globe and through the application life cycle – from planning and development through deployment and ongoing maintenance. We offer services and service levels to meet customer requirements in research, design, validation, and manufacturing. Visit ni.com/services.

Training and Certification

NI training is the fastest, most certain route to productivity with our products. NI training can shorten your learning curve, save development time, and reduce maintenance costs over the application life cycle. We schedule instructor-led courses in cities worldwide, or we can hold a course at your facility. We also offer a professional certification program that identifies individuals who have high levels of skill and knowledge on using NI products. Visit ni.com/training.

Professional Services

Our Professional Services Team is comprised of NI applications engineers, NI Consulting Services, and a worldwide NI Alliance Partner Program of more than 600 independent consultants and integrators. Services range from start-up assistance to turnkey system integration. Visit ni.com/alliance.

OEM Support

We offer design-in consulting and product integration assistance if you want to use our products for OEM applications. For information about special pricing and services for OEM customers, visit ni.com/oem.

Local Sales and Technical Support

In offices worldwide, our staff is local to the country, giving you access to engineers who speak your language. NI delivers industry-leading technical support through online knowledge bases, our applications engineers, and access to 14,000 measurement and automation professionals within NI Developer Exchange forums. Find immediate answers to your questions at ni.com/support.

We also offer service programs that provide automatic upgrades to your application development environment and higher levels of technical support. Visit ni.com/ssp.

Hardware Services

NI Factory Installation Services

NI Factory Installation Services (FIS) is the fastest and easiest way to use your PXI or PXI/SCXI combination systems right out of the box. Trained NI technicians install the software and hardware and configure the system to your specifications. NI extends the standard warranty by one year on hardware components (controllers, chassis, modules) purchased with FIS. To use FIS, simply configure your system online with ni.com/pxiadvisor.

Calibration Services

NI recognizes the need to maintain properly calibrated devices for high-accuracy measurements. We provide manual calibration procedures, services to recalibrate your products, and automated calibration software specifically designed for use by metrology laboratories. Visit ni.com/calibration.

Repair and Extended Warranty

NI provides complete repair services for our products. Express repair and advance replacement services are also available. We offer extended warranties to help you meet project life-cycle requirements. Visit ni.com/services.
