THREE PHASE BRIDGE MOSFET POWER MODULE

3017

4707 Dey Road Liverpool, N.Y. 13088

(315) 701-6751

FEATURES:

- All N-Channel Mosfets
- Isolated Package for Direct Heat Sinking, Excellent Thermal Conductivity
- Avalanche Rated Devices
- Interfaces with Most Brushless Motor Drive IC's
- 200 Volt, 30 Amp Full Three Phase Bridge at 25°C

DESCRIPTION:

The MSK 3017 is an all N-Channel three phase power MOSFET Bridge Circuit. Packaged in a space efficient isolated ceramic tab power SIP that allows for direct heat sinking, the MSK 3017 can be interfaced with a wide array of brushless motor drive IC's. The MSK 3017 uses M.S Kennedy's proven power hybrid technology to produce a cost effective high performance circuit for use in today's sophisticated servo motor and disk drive systems.

EQUIVALENT SCHEMATIC

TYPICAL APPLICATIONS

- Three Phase Brushless DC Motor Servo Control
- Disk Drive Spindle Control
- Fin Actuator Control
- Az-El Antenna Control

NOTES:

- ① This parameter is guaranteed by design but need not be tested. Typical parameters are representative of actual device performance but are for reference only.
 ② Resistance as seen at package pins.
 ③ Resistance for die only; use for thermal calculations.
 ④ TA = 25°C unless otherwise specified.

APPLICATION NOTES

BRIDGE DRIVE CONSIDERATIONS

It is important that the logic used to turn ON and OFF the various transistors allow sufficient "dead time" between a high side transistor and its low side transistor to make sure that at no time are they both ON. When they are, this is called "shoot-through", and it places a momentary short across the power supply. This overly stresses the transistors and causes excessive noise as well. See Figure 1.

Figure 1

This deadtime should allow for the turn on and turn off time of the transistors, especially when slowing them down with gate resistors. This situation will be present when switching motor direction, or when sophisticated timing schemes are used for servo systems such as locked antiphase PWM'ing for high bandwidth operation.
