

TRIACs, 40A Sunbberless and Standard

FEATURES

- High current triac
- Low thermal resistance with clip bonding
- Low thermal resistance insulation ceramic for insulated TO-3 package
- High commutation capability
- Packages are RoHS compliant

APPLICATIONS

Due to their clip assembly technique, they provide a superior performance in surge current handling capabilities.

By using an internal ceramic pad, the M40T series provides voltage insulated tab (rated at 2500VRMS) complying with UL standards.

The snubberless concept offer suppression of RC network and it is suitable for applications such as :

- Static relays
- Solid state switches
- Motor controls
- Light dimmers
- Copy machines
- Microwave ovens
- Heater controls

MAIN FEATURES
