M62354P/FP/GP

8-bit 6ch D/A Converter with Buffer Amplifiers

R03DS0043EJ0400
Rev.4.00
Jun 03, 2011

Description

The M62354 is an integrated circuit semiconductor of CMOS structured with 6 channels of built-in D/A converters with output buffer operational amplifiers.

The 3-wire serial interface method is used for the transfer format of digital data to allow connection with microcomputer with minimum wiring.

It is able to cascading serial use with DO terminal.

The output buffer operational amplifier operates in the whole voltage range from power supply to ground for both input/output.

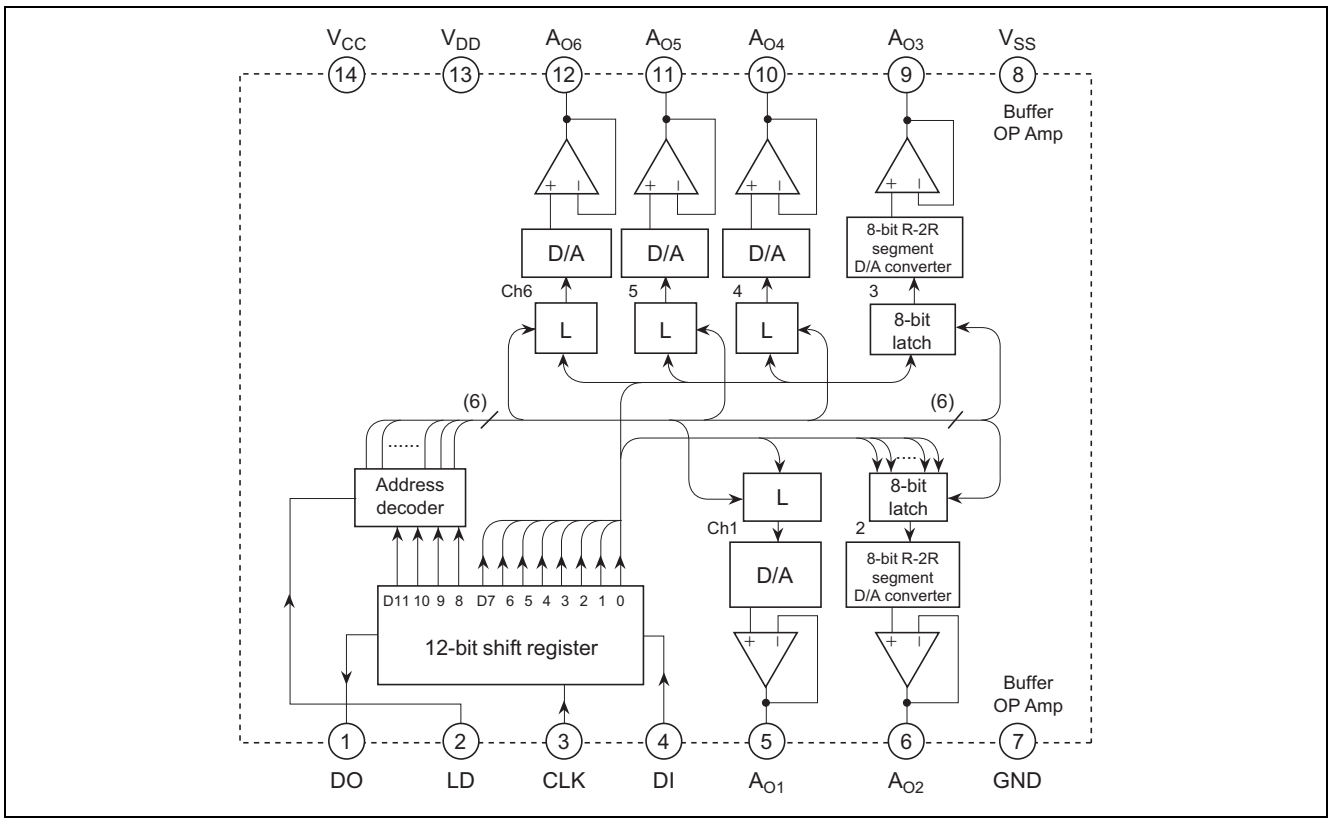

Features

- 12-bit serial data input (3-wire serial data transfer method)
- Highly stable output buffer operational amplifier allow operation in the all voltage range from power supply to ground.

Application

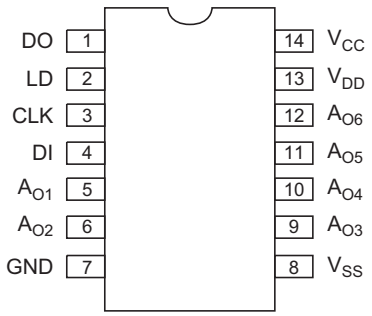

Adjustment/control of industrial or home-use electronic equipment, such as VTR camera, VTR set, TV, and CRT display.

Pin Description

Pin No.	Pin Name	Function
4 (4)	DI	Serial data input terminal
1 (1)	DO	Serial data output terminal
3 (3)	CLK	Serial clock input terminal
2 (2)	LD	LD terminal input high level then latch circuit data load
5 (5)	A_{O1}	8-bit D/A converter output terminal
6 (6)	A_{O2}	
9 (11)	A_{O3}	
10 (12)	A_{O4}	
11 (13)	A_{O5}	
12 (14)	A_{O6}	
14 (16)	V_{CC}	Power supply terminal
7 (8)	GND	Digital and analog common GND
13 (15)	V_{DD}	D/A converter upper reference voltage input terminal
8 (9)	V_{SS}	D/A converter lower reference voltage input terminal

Note: ( ) : M62354GP

Block Diagram for Explanation of Terminals

Absolute Maximum Ratings

Item	Symbol	Ratings	Unit
Supply voltage	V_{CC}	–0.3 to +7.0	V
D/A converter upper reference voltage	V_{DD}	–0.3 to +7.0	V
Input voltage	V_{IN}	–0.3 to V_{CC} + 0.3	V
Output voltage	V_O	–0.3 to V_{CC} + 0.3	V
Power dissipation	Pd	440 (P) / 250 (FP) / 150 (GP)	mW
Operating temperature	Topr	–20 to +85	°C
Storage temperature	Tstg	–40 to +125	°C

Electrical Characteristics

<Digital Part>

(V_{CC}, VrefU = 5 V ± 10%, V_{CC} ≥ VrefU, GND, VrefL = 0 V, Ta = –20 to +85°C, unless otherwise noted.)

Item	Symbol	Limits			Unit	Conditions
		Min	Typ	Max		
Supply voltage	V_{CC}	4.5	5.0	5.5	V	
Circuit current	I_{CC}	—	0.7	2.5	mA	CLK = 1 MHz operation V_{CC} = 5 V, I_{AO} = 0 μA
Input leak current	I_{ILK}	–10	—	10	μA	V_{IN} = 0 to V_{CC}
Input low voltage	V_{IL}	—	—	0.2 V_{CC}	V	
Input high voltage	V_{IH}	0.8 V_{CC}	—	—	V	
Output low voltage	V_{OL}	—	—	0.4	V	I_{OL} = 2.5 mA
Output high voltage	V_{OH}	V_{CC} – 0.4	—	—	V	I_{OH} = –400 μA

<Analog Part>

(V_{CC}, VrefU = 5 V ± 10%, V_{CC} ≥ VrefU, Ta = –20 to +85°C, unless otherwise noted.)

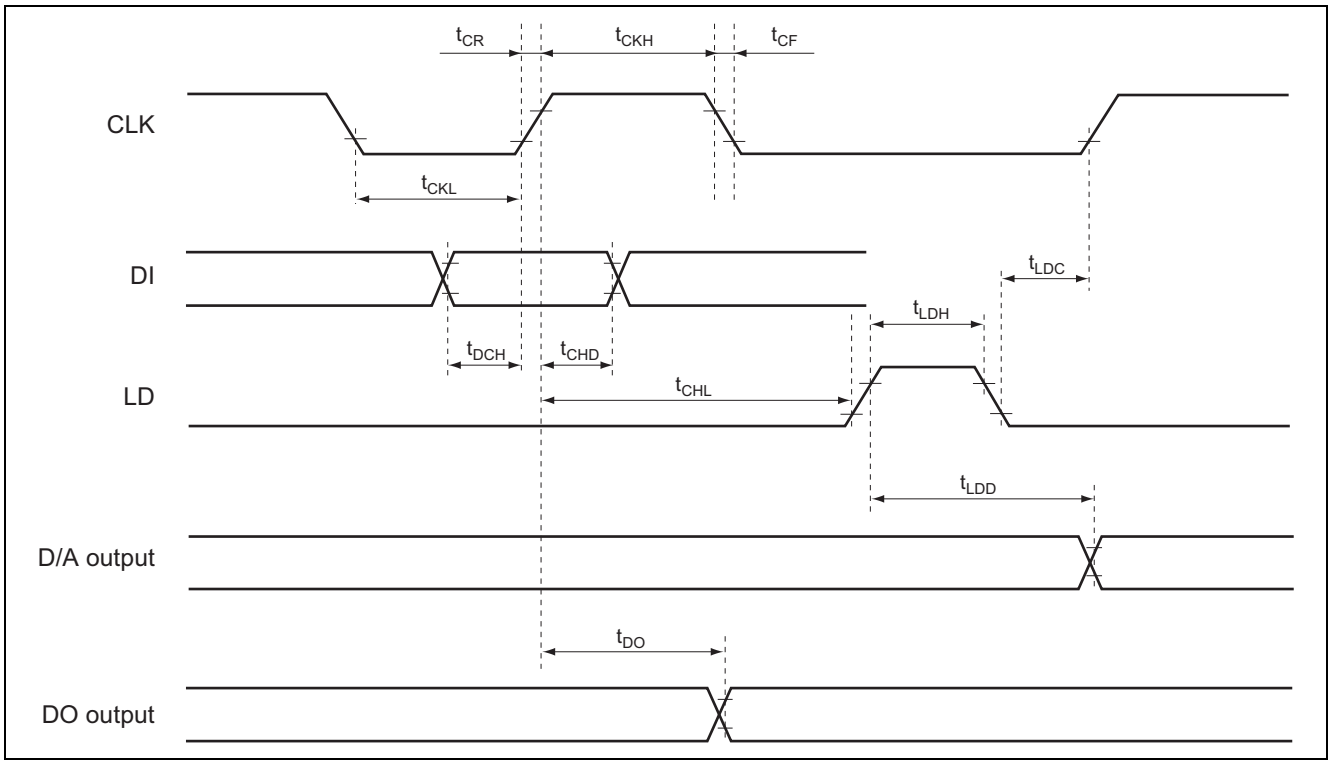

Item	Symbol	Limits			Unit	Conditions
		Min	Typ	Max		
Current dissipation	I_{DD}	—	0.7	1.3	mA	VrefU = 5 V, VrefL = 0 V Data condition: at maximum current
D/A converter upper reference voltage range	V_{DD}	3.5	—	V_{CC}	V	The output does not necessarily be the value within the reference voltage setting range. The output value is determined by the buffer amplifier output voltage range (V_{AO}).
D/A converter lower reference voltage range	V_{SS}	GND	—	V_{CC} – 3.5	V	
Buffer amplifier output voltage range	V_{AO}	0.1	—	V_{CC} – 0.1	V	I_{AO} = ± 100 μA
		0.2	—	V_{CC} – 0.2		I_{AO} = ± 500 μA
Buffer amplifier output drive range	I_{AO}	–1	—	1	mA	Upper side saturation voltage = 0.3 V Lower side saturation voltage = 0.2 V
Differential nonlinearity error	S_{DL}	–1.0	—	1.0	LSB	VrefU = 4.79 V VrefL = 0.95 V V_{CC} = 5.5 V (15 mV/LSB) Without load (I_{AO} = ±0 μA)
Nonlinearity error	S_L	–1.5	—	1.5	LSB	
Zero code error	S_{ZERO}	–2	—	2	LSB	
Full scale error	S_{FULL}	–2	—	2	LSB	
Output capacitive load	C_O	—	—	0.1	μF	
Buffer amplifier output impedance	R_O	—	5	—	Ω	

AC Characteristics

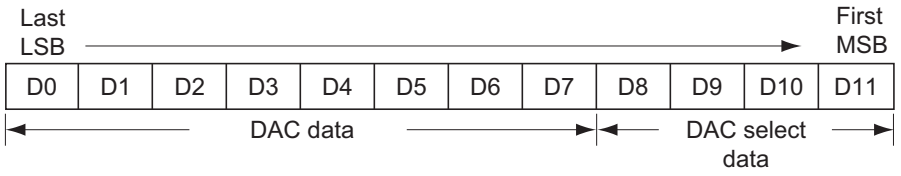

(V_{CC}, VrefU = 5 V ± 10%, V_{CC} ≥ VrefU, GND, VrefL = 0 V, Ta = –20 to +85°C, unless otherwise noted.)

Item	Symbol	Limits			Unit	Conditions
		Min	Typ	Max		
Clock "L" pulse width	t_{CKL}	200	—	—	ns	
Clock "H" pulse width	t_{CKH}	200	—	—	ns	
Clock rise time	t_{CR}	—	—	200	ns	
Clock fall time	t_{CF}	—	—	200	ns	
Data setup time	t_{DCH}	30	—	—	ns	
Data hold time	t_{CHD}	60	—	—	ns	
LD setup time	t_{CHL}	200	—	—	ns	
LD hold time	t_{LDC}	100	—	—	ns	
LD "H" pulse width	t_{LDH}	100	—	—	ns	
Data output delay time	t_{DO}	70	—	350	ns	C_L ≤ 100 pF
D/A output setting time	t_{LDD}	—	—	300	µs	C_L ≤ 100 pF, V_{AO}: 0.5 ↔ 4.5 V The time until the output becomes the final value of 1/2 LSB

Notice

1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
7. Renesas Electronics products are classified according to the following three quality grades: "Standard", "High Quality", and "Specific". The recommended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as "Specific" without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as "Specific" or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is "Standard" unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.
   "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.
   "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.
   "Specific": Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
